OBJECTIVE

To seek a Software Engineering role where I can build high-performance, scalable solutions. Recognized for problem-solving, adaptability, and collaboration, I aim to deliver clean, efficient, and maintainable code that aligns with business objectives and drives measurable results. I am passionate about developing technology that creates impact and enhances user experiences.

EDUCATION

Masters of Science , Computer Science

January 2024 - Present

California State University , Fullerton , California

GPA 3.8/4

Related Coursework: Machine Learning & AI, Data Science, Cloud Computing, Data Structures & Algorithms

Bachelor of Engineering (Computer Science)

July 2019 - June 2023

MIT World Peace University

GPA 3.9/4

Related Coursework: Relational Databases, Data Visualization , OOP, Data Structure

PROFESSIONAL EXPERIENCE

Software Development Engineer , Tarento Technologies, Bengaluru

July 2022 – December 2023

- Designed and developed scalable backend services and APIs using Java, Spring Boot, and RESTful architecture, improving system performance and reliability.
- Implemented microservices architecture for modular product components, enabling faster feature deployment and reducing integration issues by 30%.
- Optimized application performance by refactoring code, reducing load times by 35%, and improving memory efficiency through better data handling.
- Built responsive front-end features in React to enhance user experience and streamline workflows
- Deployed applications to AWS and Azure with automated CI/CD pipelines using Jenkins and Docker, increasing deployment efficiency and system uptime.

Software Development Intern, Omnisys IT Solutions, Pune

May 2021– December 2021

- Developed and maintained Java-based enterprise applications, improving functionality and performance by 20%
- Integrated new modules into production systems, increasing feature adoption and user engagement.
- Enhanced backend systems using Spring Boot & Hibernate, improving database interactions, reducing latency by 25%.
- Participated in Agile development sprints, performing code reviews and implementing feedback for quality assurance.

SKILLS

- Programming Languages:** Java, Python, C++, React
- Databases:** Oracle Database, MySQL, MongoDB
- Cloud & DevOps:** Microsoft Azure, AWS, Kubernetes, Docker
- Data Analytics:** Machine Learning, ETL Pipelines,
- Business Intelligence:** Power BI, Tableau, Alteryx
- AI :** NLP, Generative AI, Computer Vision

PROJECTS

Smart Inventory Management System (Java)

- Developed a Java-based Smart Inventory Management System, automating stock tracking and reducing discrepancies
- Implemented RESTful APIs with Spring Boot and integrated Hibernate ORM, improving database efficiency by 25%.
- Optimized order processing using multi-threading, increasing system throughput by 40%.

Online Sports Booking Platform (React + Java)

- Built a full-stack sports booking application with React front-end and Java/Spring Boot backend.
- Implemented authentication, booking calendar, and payment module integration.
- Deployed on Azure App Services with CI/CD pipelines.

ACHIEVEMENTS

- National Badminton Player for Maharashtra and University Team Captain, leading a squad of 12.
- Assisted in raising \$42,000 at Rotary International for humanitarian relief aid in severely affected flood areas.
