

Samatha Thodupunuri

SAS Programmer & Azure Data Engineer

+1-984-278-0169

Valid L2S Visa till Jan-2028

tsamatha.10@gmail.com

Professional Summary

I have over 10 years of IT experience with 4 years in **Data Engineering and Analytics**. Worked with various clients across globe and multiple domains: Manufacturing, Insurance, Health Sciences.

Technical Summary

- On premise **SQL database migrations** to Azure SQL server DB(logical)and **DB performance optimizations**.
- I am proficient in **SQL, PySpark, Python and SAS**,
- Administration of **Azure storage account, ADLS Gen2, DBFS** with respect to Data storage, security (**Access keys, Key Vaults, Encryptions**)
- Live data capture using **Azure stream analytics jobs** to Azure blob storage, SQL DB, SQL pool destinations.
- Well versed with **Spark**, Configuration and Management of **Spark Clusters, Workspace administration**.
- Thorough understanding and implementation of **Medallion, data lake architecture**.
- Designed notebooks using **SQL/Python/Scala** for **ETL and ELT** operations , **python notebooks** with **Dataframes** for data transformations and **Pyspark notebooks** for incremental loads (upserts).
- Data Ingestion from various sources like DBFS, ADLS, Azure Blob storage and load data to various destinations using **Databricks**.
- Implemented **Databricks security, created metrics and scheduled workflows** with notifications.
- Designed and scheduled data pipelines using **Azure Data Factory (ADF)**.
- **Dataflows** creations with activities for **transformations** (conditional splits, surrogate key, aggregations, derived column, pivots)
- Data loads from Azure blob storage, On-premise SQL DB, Azure SQL DB using **Copy data tool** to various destinations.
- Designed Pipelines for **File incremental loads** and **Table incremental loads with control tables**(water mark columns).
- Created **metrics, alert rules, notifications** for ADF.
- Good exposure on ITIL Service Management principles (Incident, Change, Request, Problem Management)
- Hands-on experience on Service Now (SNOW tool)

Azure	Azure Storage Account, ADLS Gen2, Azure Databricks, Azure Data Factory,Spark, Azure SQL Server,
Operating Systems	Windows
SAS Experience	SAS Enterprise Guide, SAS 9.4
Applications and Tools	SQL developer, Microsoft SQL Server Management Studio, MS Excel
Languages	SQL, Python, Spark SQL, SAS
Ticketing tools	Service Now

Project Experience

Employer: IQVIA India Ltd
Client: AstraZeneca
Role: **Azure Data Engineer**
Services/Tools involved:

Jul 2022 to May 2025

Azure blob Storage, ADLS Gen 2 ,MS SQL Server 2019,Azure Data Factory, Azure Synapse Analytics, Power BI

- **Migrated 20+ SQL Databases** from On-premise to Azure SQL Server generating backup files and using **Data Migration Assistant tool(DMA)**.
- Used **Azure Data Factory** for ingesting OLTP data, performed aggregations, loaded into Azure synapse pool (DWH) .
- Created self-hosted **Integration Runtime(IR)** and **Linked services** and performed **On-premise SQL data loads to Azure Blob storage**.
- Created and Scheduled **Pipelines for File incremental loads** from Blob storage to SQL pool .
- Analyzed existing pipelines with respect to source and destination datasets and implemented pipeline optimizations(**DIUs, Staging, Debug, DDCP**) which increased data load efficiency by 50%.
- Written **complex SQL queries** as per application team requirement to fetch data from OLTP for designing their application and tuned existing SQL queries which increased the query performance by 30%.

Employer: HCL India
Client: **State of North Dakota**
Role: **Azure Data Engineer**
Services/Tools involved:

Apr 2021 to Jul 2022

Azure blob Storage, ADLS Gen 2 ,MS SQL Server 2016,Azure Databricks, Azure Data Factory, Azure Synapse Analytics, Power BI, Apache Spark.

- Using **Azure Databricks** created Python notebooks with **parameters (widgets)** to fetch data from ADLS and load data into SQL DB.
- Configured and managed **spark clusters, spark database, workspace**.
- Created Data Factory pipelines for table **incremental loads using Data Copy tool (UPSERT)** and **dataflows** with copy data activity using **water mark columns**.
- Performed ETL operations with dataflows (aggregations, surrogate keys, derived columns) on source datasets from SQL DB, ADLS and loaded into various destinations.
- Created **pipeline metrics and alert rules** and setup **notifications** accordingly which helped in identifying/avoiding issues beforehand by 20%.
- Worked on SQL DB, and pipeline **optimizations** which increased **efficient resource utilization** by 30%.
- Collaborated with Mainframe & Distributed teams and implemented ETL/ELT techniques to transform & refine their data.
- Partnered with AI/ML & Data Scientist teams and produced data based on their requirements.

Employer: IDDCR
Client: Galapagos
Role: Clinical SAS Programmer
Services/Tools involved:

Jan 2015 to Mar 2021

SQL server 2019, Oracle 12c, DBForge, OEM, SSIS

- Produced high-quality statistical reports utilizing SAS procedures such as Proc Report, enhancing data interpretation for clinical studies.
- Implemented efficient data sorting and merging techniques for data preparation, ensuring accuracy and reliability of analysis outputs.
- Created comprehensive analysis datasets and performed robust statistical analyses to evaluate safety and efficacy outcomes of clinical trials.
- Validated datasets, tables, and listings for accuracy in safety and efficacy studies, ensuring compliance with study protocols.
- Coordinated project initiation activities, including the development of global programming specifications and tracking documentation.
- Collaborated with cross-functional teams to ensure seamless data management processes throughout the clinical trial lifecycle.
- Utilized advanced SAS techniques to produce Tables, Listings in accordance with regulatory requirements.
- Utilized SQL and SAS to extract, manipulate, and analyze data from various sources, ensuring accuracy and integrity.
- Mentored junior programmers in SAS techniques and best practices, fostering a culture of continuous improvement.

Accolades:

IQVIA

Received Bronze award consecutively for 3 times for my continuous efforts towards a critical listings project which was completed flawlessly within the agreed timelines.

HCL

Received Employee of the month award for my contributions towards a streamlining project related to Clinical trial data in a Prod environment.

Personal Details

- Name : Samatha Thodupunuri
- Date of Birth : April 1988
- Address : C205, Aparna Kanopy Marigold, Kompally, Hyderabad, India
- Education : Masters from JNTU Hyderabad
- Visa Status : L2S Work Visa (Valid till Jan 2028).
