## SUMMARY

Graduate student in Business Analytics at The University of Texas at Dallas with strong skills in SQL, Python, R, Tableau, Power BI, and Excel. Experienced in cleaning, analyzing, and visualizing complex datasets to uncover trends and support decision-making. Skilled in predictive modeling, database management, and presenting insights clearly to both technical and non-technical audiences. Available Spring 2026 for Business/Data Analytics internships.

## EDUCATION

### The University of Texas at Dallas

Jan 2025 – Dec 2026 (expected)

*Master of Science, Business Analytics and Artificial Intelligence*

*Analytics Excellence Scholarship*

### Devi Ahilya Vishwavidyalaya, Indore

July 2019 – May 2022

*Bachelor of Commerce, Management*

## PROFESSIONAL EXPERIENCE

### STS & Associates, Indore, India

Oct 2023 – Dec 2024

*Data Analyst*

- Prepared and validated datasets to support reporting accuracy for banking and compliance projects.
- Cleaned and organized 5,000+ monthly records using Excel and SQL to improve efficiency of downstream analysis.
- Assisted in developing dashboards to monitor KPIs and highlight trends for senior staff.
- Standardized reporting processes to improve data consistency across engagements.

### B. Bansal & Co., Indore, India

Sep 2022 – Aug 2023

*Data Analyst*

- Structured and analyzed client datasets (500,000+ records) to identify inconsistencies and improve data readiness.
- Automated recurring validation checks in Excel/SQL, reducing manual processing time.
- Designed Power BI templates that summarized patterns and anomalies for team review.
- Supported development of portfolio-level summaries that enhanced visibility into compliance and operations.

## ACADEMIC PROJECT EXPERIENCE

### Optimizing Amazon Product Selection for Maximum Profitability

Business Analytics with R (BUAN 6356)

Feb 2025 – April 2025

- Combined and cleaned 139 subcategory files into a dataset of 140K+ products.
- Defined a binary target variable based on top 20% revenue.
- Built and evaluated KNN, Logistic Regression, and CART models with cross-validation.
- Compared performance to select the most effective predictive approach.

### Football Performance Analysis Using SQL & Tableau

Database Foundations for Business Analytics (BUAN 6320)

March 2025 – May 2025

- Structured and queried an 8-table football database (Transfermarkt) using SQL.
- Extracted 16 insights using joins, aggregates, and window functions.
- Designed Tableau visuals (treemaps, bar charts, trend lines) to showcase player and team performance.
- Produced a report summarizing value trends, match outcomes, and fan engagement.

## SKILLS

**Tools & Technologies:** SQL, Python, R, Tableau, Power BI, Excel (Advanced), Jupyter, Git, MySQL Workbench, MongoDB Compass

**Analytical Skills:** Data Analysis, Predictive Modeling, Classification, Cross-Validation, Data Cleaning, Data Visualization, Relational Databases, Joins, Aggregates, Window Functions

**Soft Skills:** Analytical Thinking, Problem Solving, Communication, Team Collaboration, Attention to Detail
