Profile

Data analyst with an accounting and finance background seeking to **transition** into an **analyst** role, leveraging a strong foundation in the **finance domain** and **analysis tools**. Highly motivated to showcase my analytical capabilities and solve complex business challenges in a dynamic environment.

Highlighted Skills & Tools

- **Data Analytics:**
 - SQL (PostgreSQL, MySQL, SQLite)
 - Excel (Lookups, Conditional Formatting, Pivot Table)
 - Python (Pandas)
- **Languages:** English (fluent), Arabic (native)
- **Data Visualization:** Power BI, PowerPoint, Tableau
- **Soft skills:** Communication, Teamwork, Active listening

Work Experience

Data Analytics Bootcamp, General Assembly, Bahrain, Instructor

APR 2025 - Present

- Demonstrated core concepts into **practical** applications, illustrating how to select the best tools and frameworks for specific **real-world** scenarios.
- Provided **personalized** instructions based on individual student **needs** and managed administrative functions, including tracking, student relations, and scheduling.

Bank of Bahrain and Kuwait, Bahrain, Risk Analyst

DEC 2024 - Jun 2025

- Delivered data-driven insights to executive leadership by analyzing historical data and **building** comprehensive dashboards to guide strategic **planning** and **policy**.
- Generated **weekly** performance **reports** on the bank's portfolio, providing in-depth analysis of different departments.

Projects

Going clean energy - General Assembly group project

DEC 2024

- Exploring clean energy industries to invest in based on data, market size, future trends, laws, and regulations in the USA that yield a return in **less than 10** years.
- Implemented agile methodology leveraging **Excel** for exploratory data analysis and cleaning, and communicated actionable insights through **PowerPoint** presentations

Investing in Madrid - General Assembly group project

NOV 2024

- Created a recommendation list based on property and location characteristics for investors that can **generate 10%** more revenue than the average.
- Performed exploratory data analysis and data cleaning, leveraging pivot tables and IF statements in **Excel** to transform and provide key data summaries in **PowerPoint**

Customer Churn - General Assembly group project

OCT 2024

- Generating customer segmentations and behaviour reports with recommendations that lead to a **decrease** of **6-10%** in customer churn.
- Developed and visualized key insights using **Power BI** dashboard and **PowerPoint**, explaining our conclusions.

Education

BIBF, Bangor, Bahrain, BSc Accounting and Finance

2020 - 2024

Modules include: Economy, Finance, Ethics, Audit and Law, Accounting

- Acquired a deep understanding of stock market dynamics, reaction to news, and market expectations.
- **Designed** and built portfolio strategies to **minimize** volatility across different market conditions using financial modeling with **Excel** for analysis and **PowerPoint** for presentation.

Volunteer & Activity
