EDUCATION

The George Washington University, Columbian College of Arts and Sciences	Washington, DC
Master of Science in Data Science, 3.3/4.0	May 2025
Relevant Coursework: Deep Learning, NLP, Time Series Modelling & Analysis, Linux for DevOps, Cloud Computing	
Ramnarain Ruia Autonomous College of Arts and Science	Mumbai, India
Bachelor of Science in Mathematics & Statistics, GPA: 3.6/ 4.0.	April 2022
Relevant Coursework: Operations Research, Applied Statistics, Biostatistics, Stochastic Processes, Applied Combinatorics	

TECHNICAL SKILLS

Programming - Python (NumPy, Pandas, scikit-learn, TensorFlow PyTorch), C++, Java, R, Bash.

Tools & Visualization - Tableau, Matplotlib, Selenium, Git, Docker.

Databases & Cloud - MySQL, PostgreSQL, MongoDB, Neo4j, ChromaDB; AWS, GCP

Concepts - Data Pipelines, NLP, RAG, Time Series, Deep Learning

RELEVANT EXPERIENCE

All People Marketplace	Normal, IL
Data Science Intern	August 2025 - Present
- Calculate KPI metrics using statistical and ML models to evaluate sales growth, customer engagement, and nonprofit partnerships. - Perform predictive analysis on user and sales data to identify revenue drivers and retention trends. - Build automated dashboards and data pipelines to track KPIs and deliver actionable insights.	
The World Bank	Washington, DC
Data Scientist - Capstone Project	January 2025 - May 2025
- Built an automated pipeline with Python, Selenium, and ChromaDB to scrape and index 1,000+ project documents. - Applied NLP and RAG with Llama-3 to detect land acquisition risks, cutting manual review by 70%. - Designed a query-based system to extract land insights, supporting de-risking of global development projects.	
Data Science for Sustainable Development	Washington, DC
Data Science Researcher	June 2024 - May 2025
- Developed pipelines for web scraping and geospatial analysis using remote sensing data to support peacebuilding research. - Processed and visualized geospatial datasets to support sustainable development and conflict resolution. - Created web maps and spatial visualization for the GIS4Peace project to communicate research findings effectively.	
Aedwolf Marketing Technologies LLP	Mumbai, India
Business Analyst	October 2022 - July 2023
- Collected and analyzed financial, market, and operational data to identify business trends. - Developed integrated business analyses that supported strategic planning and decision-making. - Conducted statistical and market analysis to evaluate business performance and recommend improvements.	
Aquaworld Technology Pvt. Ltd.	Mumbai, India
Data Analyst	April 2021 - September 2022
- Analyzed water quality datasets (pH, turbidity, contaminants, throughput) to monitor performance and ensure compliance with sustainability and safety standards. - Applied statistical techniques to evaluate trends and identify anomalies in environmental and operational data. - Provided insights to support water conservation and environmental sustainability goals.	

TECHNICAL PROJECTS

Emotion Speech Recognition Using Deep Learning, Python & TensorFlow	August 2024 - December 2024
Developed a speech emotion recognition model using CNNs and RNNs on Mel-spectrogram and MFCC features. Reached 75% validation accuracy with self-supervised pretrained models, demonstrating the effectiveness of advanced architectures.	
Forecasting Temperature Trends Using Time Series Modeling, Python	August 2024 - December 2024
Modeled long-term weather patterns using ARMA, ARIMA, SARIMA, and Box-Jenkins approaches on 18 years of Madrid climate data. Built ARMA, ARIMA, and SARIMA models on 18 years of Madrid climate data, optimizing features with PCA. Selected ARIMA for robust multi-step forecasting with strong real-world applicability.	

VOLUNTEER INVOLVEMENT

The World Bank International Land Conference	Washington, DC
Conference Volunteer	May 2025 - May 2025
Volunteered at the World Bank International Land Conference, supporting logistics and engaging with global experts on land governance and development.
