github.com/Samiksha2305

Education

University of Colorado, Boulder

Masters in Data Science

Aug. 2023 – May 2025

Boulder, Colorado

PES University

Bachelors in Electronics and Communication Engineering

Aug. 2019 – May 2023

Bangalore, India

Technical Skills

Programming Languages: Python, SQL, R, MATLAB, Bash, BigQuery, Databricks, DB, React js
Data Tools: NumPy, Pandas, Scikit-Learn, PySpark, Hypothesis Testing, Machine Learning, Power BI, Tableau, QuickSight, Mixpanel, MS Excel, Jupyter Notebook, A/B Testing, Time Series Analysis, Data Pipelines, Data Analysis
Cloud & DevOps: AWS (S3, Lambda, Glue, Athena, RDS), GCP, Kubernetes, Docker, Hadoop, Big data tools, ETL
Developer Tools: REST APIs, Flask, TensorFlow, PyTorch, VS Code, Jira, GitHub Actions, Apache, Grafana

Experience

Sarona Investments LLC

June 2025 – Present

Data Research Analyst Intern

- Conducted market research analyzing demographics, financial indicators, and regulations; built interactive dashboards and a web platform to streamline launch strategy.
- Applying predictive analytics and financial modeling to develop a data-driven business plan, enabling real-time KPI tracking and informed strategic decisions throughout the launch lifecycle.

Asante

July 2024 - May 2025

Data Science Intern

- Built a scalable full-stack application with a React.js frontend (Tailwind CSS) and gRPC-based backend services; containerized with Docker to ensure consistent multi-environment deployment.
- Boosted engagement by 40% with LLM-based recommendations, increasing session time and repeat usage.
- Queried complex datasets using pgAdmin with PostgreSQL and developed 5+ dynamic Tableau dashboards to drive real-time insights and data-driven decisions.

Banich Lab

August 2024 – Dec. 2024

Research Assistant

- Analyzed data from a functional MRI experiment in which participants were shown images and instructed to perform one of three thought control strategies: maintain, suppress or clear; classified neural responses as typical vs. atypical
- Engineered an ML pipeline using MVPA to classify brain states, achieving a 57% accuracy (AUC 0.73), enabling novel insights into neural differentiation strategies.

TrendyTech Company

May 2024 – July 2024

Data Analyst Intern

- Developed data pipelines for Mixpanel and VdoCipher using AWS services (S3, Athena, Glue, Lambda) and implemented automated data fetching with Python, enhancing data accessibility and processing efficiency.
- Integrated large datasets with AWS Glue and created a master table linked to Power BI, enabling real-time insights and Improved decision-making speed by 40% through enhanced data integration and real-time analytics

Projects

BiteMap | *Python, Golang, ReactJS*

January 2024

- Built a restaurant recommendation app using React.js for frontend, integrated with Google Maps API, featuring an analytics heat map for price and rating, and an interactive map for 5,000+ restaurants within a user-defined range.
- Collaborated with the backend team using GoLang for APIs, pgAdmin, Postman, and Docker for system scalability.
- Deployed on GCP (GKE, PostgreSQL) for real-time restaurant analytics, enhancing scalability with CI/CD integration via GitHub Actions.

Spotify Top Tracks Analysis (2023–2024) | *Python, Power BI*

January 2025

- Engineered a Python data pipeline to extract, clean, and impute missing Spotify audio features; clustered granular genres into major categories for trend analysis.
- Developed an interactive Power BI dashboard leveraging engineered features to highlight evolving music trends.

BrewBuzz | *Machine learning Algorithms, Python*

January 2024

- Scraped and merged geospatial brewery data via APIs; built ML models and deployed an interactive web tool with map-based visualizations, enabling predictive trend analysis across 500+ locations.
- Deployed a custom-built interactive web interface that integrates map-based visualizations and predictive analytics
