

Samin Khan

sam60002@live.com | +1(469) 353-3377 | <https://www.linkedin.com/in/-saminkhan-/> | Dallas, TX

Professional Summary

Results-driven Data Analyst with 1+ years of experience and a strong background in Data Science and Artificial Intelligence. Proficient in Python, AI solution architecture, SQL, data visualization and advanced Excel for analyzing and interpreting large datasets to provide actionable insights. Experience in creating complex SQL queries, building interactive dashboards with Power BI and Tableau and leveraging data to drive operational efficiencies. Adept at collaborating cross-functionally to solve complex problems and optimize business performance.

Education

Master of Science, Business Analytics and Artificial Intelligence | University of Texas at Dallas | Dallas, TX **May 2025**
Bachelor of Technology, Computer Science & Engineering | Sir Padampat Singhanian University | Udaipur, India **July 2019**

Skills

SQL | Python | R | MS Excel (Macros, Pivot Tables, VLOOKUP) | Tableau | Microsoft Power BI | ETL | MySQL | Data Mining | Data Visualization | Data Modelling | Regression Analysis | Supply Chain Management | Database Management | Statistics | Pandas | MongoDB | Natural Language Processing | Deep Learning | Data Pipeline | Epic EHR | Adobe Photoshop | Adobe Blender | Adobe Analytics | Salesforce

Academic Projects: University of Texas at Dallas

Aug 2023 – May 2025

- Collaborated with a team to develop a data engineering solution for gathering, cleaning, and processing healthcare pricing and insurance data, creating a dashboard to help users compare prices and plans for informed decision-making. Also designed a scalable system implementation using GCP components.
- Conagra Data Science Hackathon: Ranked Top 4 out of 28 teams creating advanced panel regression models in Python with 84% adj. R-squared to predict sales of the Gardein line of products. Spearheaded the identification of key KPIs and optimized product assortments through advanced clustering models, achieved a 25% increase in sales across diverse regions in the USA within the first quarter.
- Developed advanced customized models using maximum likelihood estimation (MLE) and implemented data automation techniques in python to analyze candy purchase behaviors and predict article publication counts.
- Executed 'Modeling for Business Analytics' using Python, Jupyter and SQL, achieving efficient predictive modeling outcomes.
- In "UTD Patient Data Management System", used MongoDB and complex SQL queries to build an ETL process for patient records, enhancing data integrity and accessibility.
- Created an interactive Power BI dashboard for UTD hospital system to visualize and categorize patients based on various health issues such as diabetes, hypertension, and asthma.
- In "UTD Library System", automated library operations with Python and Excel, managing data for authors, books and members, including tracking loans and publishing details.

Work Experience

Academic Data Counselor **Vedantu** *Indore, India* **Jan 2021 – Apr 2021**

- Conducted engaging and informative home demonstration sessions, effectively highlighting product features and benefits to potential customers, resulting in a 100% customer satisfaction rate.
- Increased sales of Vedantu subscription by 20% by advising students on the benefits of the platform.
- Utilized SQL to analyze customer engagement data, identifying key insights to refine sales strategies and improve customer retention by 15%.
- Developed Excel-based reports with macros and pivot tables, tracking key customer interaction metrics and providing actionable insights to the sales team.

Certified Internet Consultant (CIC) **Justdail** *Udaipur, India* **Feb 2019 – May 2019**

- Promoted company services to commercial establishments, adding 10 new clients within the assigned area.
- Ensured that client contract checks were cleared and accounts were activated within the company's system.
- Developed complex SQL queries to join multiple datasets, enabling insights into client behavior that optimized sales targeting strategies and improved client engagement by 12%.
- Built Power BI reports to monitor sales performance, enhancing decision-making for resource allocation across regional teams.
- Recognized as 'Star Performer' and earned certificate for the month of Feb with 189% of Sales and Mar with 105% of Sales.

Social Media Intern **Obbserv** *Udaipur, India* **May 2018 – Jun 2018**

- Developed an AI-powered messenger chatbot that answered customer FAQs, improving customer engagement by 23%.
- Analyzed social media performance data using SQL and Google Analytics, identifying trends increasing user engagement by 15%.
- Automated report generation using Python, saving 10+ hours per week by streamlining performance tracking for social media campaigns.

Certifications

- IBM Generative AI: Foundation Models and Platforms **2025**
- Google Analytics Certified **2024**
- Salesforce Certified Administrator (SCA) **2024**
- Tableau Prep and Tableau, University of Texas at Dallas **2023**
