

Samuel Joseph Godfrey

803-542-1343 | sam@godfreysite.com | Ridgeway, South Carolina, 29130

Summary

Analytical and detail-oriented Computer Science graduate with hands-on experience coding in Python, Javascript, HTML, and CSS, using version control systems like Git, and working with SQL. Seeking an Entry-Level Python Developer role at Synergie Systems Inc. to develop, test, and maintain scalable and efficient code and document development processes, code, and APIs for future reference.

Skills

- **Programming Languages:** Python, Javascript, HTML (Hypertext Markup Language), CSS (Cascading Style Sheets), C++, Java, Prolog, Haskell, MIPS
- **Frameworks/Tools:** Node.js, Git, React Native, JUnit, Firebase
- **Development Practices:** Agile/SCRUM methodology, SDLC (Software Development Life Cycle) best practices, UML (Unified Modeling Language) modeling, Unit Testing
- **Databases & Backend:** DB Browser for SQLite, Firebase, JSON (JavaScript Object Notation) file handling
- **Version Control & IDEs:** Git, IntelliJ IDEA, Oracle IDEs (Integrated Development Environments)
- **Software & OS:** Microsoft Office, Windows, Linux, Google Workspace
- **Soft Skills:** Team collaboration, problem solving, adaptability, communication

Education

Bachelor of Science in Computer Science

University of South Carolina, Columbia, SC

Graduated: December 2023 | GPA: 3.234 / 4

Relevant Courses: Data Structures & Algorithms, Software Engineering, Operating Systems, Computer Architecture, Information Security Principles, Capstone Projects I & II

Associate in science

Midlands Technical College, Columbia, SC

Graduated: May 2021 | GPA: 3.5 / 4

Relevant Courses: Intro to Java, Algorithmic Design I & II, Operating Systems, UNIX/Linux Fundamentals

Collaborative Work Experience

Harmony App – Capstone Project

- Developed a React Native web app for online schooling in a collaborative team setting
- Created front-end discussion forums using HTML, CSS, JavaScript
- Integrated Firebase for data storage; version control managed through Git
- Participated in Agile development using SCRUM roles and task boards

Flight Management System – Software Engineering Course

- Java-based application to manage flight data; utilized JSON files and unit-tested via JUnit
- Developed Data Loader and Writer classes and documented architecture with UML diagrams
- Used Git for collaboration and followed Agile methodology for sprints and deliverables

Group Chat App – Intro to Computer Networks

- Designed and implemented client-server architecture using Java and TCP sockets
- Worked in a team to develop real-time chat functionality
- Gained hands-on experience with socket programming and network protocols

Awards

- Dean's List: Fall 2022, Spring 2023, Fall 2023
- Palmetto Life Academic Scholarship: 2019–2023
- Completed 4 college-level courses while in high school
- LinkedIn Learning Courses
 - o Building Modern Projects with React 2020
 - o Learning C
 - o Linux Tips

- o **SQL Essential Training**
