Professional Summary

Data Analyst with 4+ years of experience in SQL, Python, Power BI, and ETL pipelines. Skilled in data governance, metadata management, and ensuring data accuracy and consistency across multiple systems. Experienced in automating workflows, building dashboards, mentoring junior analysts, and improving operational efficiency in healthcare and business environments.

Core Skills

- **Data Analysis & Programming:** SQL, Python (pandas, NumPy, matplotlib, seaborn), R, Data Cleaning & Validation, Statistical Analysis
- **Data Governance & Metadata:** Data dictionaries, Data Standardization, Data Quality, Metadata Management, SOP Documentation
- **Business Intelligence & Visualization:** Power BI (DAX, Power Query M), Tableau, Excel (Pivot Tables, Power Pivot, Advanced Functions)
- **Databases & ETL:** SQL Server, Snowflake, Azure SQL, SSIS, Azure Data Factory
- **Tools & Platforms:** Git, JIRA, Power Automate, Microsoft Azure, Google Cloud, MS Office Suite

Professional Experience

Power BI Developer | Fortuna-Tech (USA) | Jan 2024 – Present

- Developed dashboards integrating Snowflake, Azure SQL, and Excel to monitor KPIs across departments.
- Ensured data accuracy and integrity by implementing automated validation checks across datasets.
- Created and maintained metadata repositories and standardized data definitions to improve transparency.
- Collaborated with stakeholders and cross-functional teams to align data governance standards.
- Conducted training sessions on data governance, reporting tools, and dashboard usage.
- Optimized ETL pipelines and report refresh times, improving operational efficiency.

Data Analyst | Capgemini (India) | Aug 2020 – Aug 2023

- Built Power BI dashboards and SSRS reports for finance, operations, and management reporting.

- Implemented Tabular Models, DAX calculations, and Row-Level Security (RLS) for secure BI.
- Standardized data definitions and reporting processes across departments.
- Conducted root cause analysis for data discrepancies, ensuring accuracy in operational and financial reports.
- Mentored interns and junior analysts on best practices in data visualization and data governance.
- Streamlined ETL processes, reducing redundant transformations and saving 10+ hours/week.

Key Projects

Airbnb Price Prediction Dashboard (Python, Power BI, SQL)

- Built predictive models and interactive dashboards to visualize pricing trends and feature importance.

Retail Sales Forecasting & Inventory Optimization (Python, Power BI)

- Designed forecasting models and linked forecasts to inventory planning; reduced stock-outs by 15%.

Customer Segmentation & Churn Analysis (Python, SQL, Power BI)

- Performed K-Means clustering for customer segmentation and churn risk visualization in Power BI.

Loan Default Prediction (Python, SQL, Power BI)

- Built predictive models for loan defaults and created dashboards tracking risk by geography and customer profile.

Healthcare Analytics – Hospital Readmission Analysis (Python, SQL, Power BI)

- Analyzed patient readmissions, built predictive models, and developed dashboards to guide management decisions.

Education

Master's in Data Analytics – Lewis University, Illinois, USA
