EXPERIENCE

Data Analyst

May 2025 – Present

Rebecca Everlene Trust Company

Remote, Chicago

- Developed database schema and ER diagrams for the ASPECTS platform, clarifying 10+ entity relationships and enhancing consistency and scalable data modeling best practices for the platform.
- Executed SQL and Python data wrangling and preprocessing on 4,000+ records, supporting ad-hoc and scheduled reports to drive predictive analysis and informed business decisions.
- Designed interactive Tableau dashboards with KPIs for 10,000+ student records, accelerating decision-making for business stakeholders.
- Automated weekly reporting via Python scripting, reducing manual work by 30% and streamlining workflow optimization.
- **Skills:** SQL, Python (Pandas, NumPy), Tableau, Data Engineering, Workflow Automation, Data Storytelling, Process Improvements

ISEE Peer Mentor

Aug 2024 – Jun 2025

DePaul University

Chicago, IL

- Mentored 10+ international students weekly, strengthening academic engagement and cultural adaptation based on survey feedback.
- Facilitated 5+ intercultural events, increasing student participation and fostering stronger community engagement.
- **Skills:** Leadership, MS Office (Word, Outlook, PowerPoint, Excel), Communication, Mentorship, Event Coordination

Data Analyst

Jul 2021 – Mar 2023

ABC Techno Labs India, Pvt. Ltd.

Mumbai, India

- Analyzed spatial datasets in ArcGIS for the Saltwater Intrusion Project, identifying 15+ high-risk coastal zones and delivering insights that supported regulatory compliance and project milestones.
- Streamlined ETL workflows using SQL & Python, increasing data integrity by 20%, applied troubleshooting to resolve workflow errors and ensuring key KPI alignment.
- Performed clustering, regression, and hypothesis testing in R/Python, deriving data-driven actionable insights and recommendations.
- Created Tableau dashboards & collaborated with cross-functional teams to deliver EIA reports, reducing reporting turnaround by 30%.
- **Skills:** SQL, Python, R, Tableau, ETL, Data Analysis, ArcGIS, Agile (Jira), KPI Tracking

PROJECTS

GITHUB

Maven Market Business Dashboard | *Power BI, Power Query, DAX*

- Engineered a multi-regional sales data model of 50K+ transactions using Power Query (star schema), enhancing data refresh and scalability.
- Formulated advanced DAX metrics for YoY growth, profit variance, and customer segmentation, boosting forecast precision by \$450K+ and improving KPI tracking.
- Implemented interactive Power BI dashboards with drill-through and dynamic visuals, increasing stakeholder engagement by 30% through actionable insights.

Payroll Management System Data Warehouse | *PostgreSQL, Talend, Tableau*

- Constructed a centralized payroll data warehouse using Talend ETL, improving HR data accessibility and reporting reliability by 40%.
- Integrated and reconciled multi-source payroll, overtime, and deduction data via API integrations and ETL workflows; ensuring accuracy, scalability, and stakeholder approval for workforce analytics and strategic decision-making.
- Visualized payroll KPIs and attrition trends in Tableau dashboards, guiding strategic HR and business strategy decisions.

Car Claim Insurance Data Analysis | *Python (Pandas, NumPy, Seaborn), Scikit-learn, XGBoost*

- Deployed machine learning models to predict car insurance claims with 96% accuracy, optimizing policy and risk evaluation.
- Explored EDA, feature engineering, and PCA to extract key drivers from customer and vehicle data.
- Refined model hyperparameters and decision thresholds, enhancing predictive reliability and supporting data-driven risk mitigation.

EDUCATION

DePaul University

Chicago, IL

Master of Science in Information Systems, GPA: 3.8

Sept 2023 – Jun 2025

Maharashtra Institute of Technology

Pune, India

Bachelor of Engineering in Electronics and Telecommunications

Jul 2016 – Apr 2021

SKILLS AND CERTIFICATIONS

Databases & Querying: SQL (MS SQL Server, PostgreSQL, MySQL, Snowflake), Relational Schema Design, Data Warehousing
Programming & Data Processing: Python (Pandas, NumPy, Matplotlib, PySpark), R, Java, JavaScript, .NET, HTML/CSS, SAS, Data Wrangling, Data Cleaning, Jupyter Notebook, Google Colab
Analytics & Visualization: Tableau, Power BI, Excel (VLOOKUP, PivotTables, PowerPivot, PowerQuery), Google Sheets
Machine Learning & AI Tools: Scikit-learn, TensorFlow, PyTorch, Predictive Modeling, NLP, Time Series Analysis, A/B Testing, LLM Tools (Claude, ChatGPT, Perplexity, Grok, Genspark, Copilot, Gemini)
Cloud & ETL Workflows: AWS (S3), Azure, Databricks, Talend, Google Cloud Platform, Salesforce (CRM), SaaS Platform
Soft Skills: Analytical & Problem-Solving, Technical Communication, Attention to Detail, Cross-Functional Collaboration
Certifications: Tableau Certified Data Analyst, Microsoft PowerBI, Advanced Google Analytics, ChatGPT Prompt Engineering (DeepLearning.AI), AI/ML for Geodata (ISRO), Introduction to GenAI
