OBJECTIVES

Enthusiastic and highly motivated engineering management master's student seeking internship/full-time opportunities to leverage academic knowledge and practical experience in manufacturing/automobile engineering, project management, supply chain management, industrial engineering, process, and quality management.

SKILLS

Six Sigma Green Belt / SOLIDWORKS / AutoCAD / Microsoft (Excel, Word, PowerPoint) / Data Analysis / Power BI

EXPERIENCE

Softura, Farmington Hills, MI

Project Management/Business Analyst Intern | July 2024 – Present

- **Requirement Gathering & Analysis:** Engaged directly with clients to gather and analyze business requirements, ensuring alignment with project objectives. Documented detailed user stories and acceptance criteria in **Azure DevOps** to provide developers with clear guidance.
- **Functional Requirement Documentation (FRD):** Authored comprehensive **FRDs** outlining system behaviors, workflows, and technical specifications to ensure developers had a clear understanding of project requirements.
- **Stakeholder Communication:** Acted as the primary liaison between clients, developers, and designers to clarify requirements, resolve queries, and ensure project alignment.
- **Agile Project Management:** Managed project timelines, facilitated **sprint planning**, conducted **daily stand-ups**, and tracked progress to ensure project milestones were met.
- **Azure DevOps Management:** Created and maintained detailed project documentation, ensuring developers had clear and actionable insights for effective implementation.
- **Data Analysis & Reporting:** Utilized **Power BI** to analyze data, identify key trends, and generate insights to support data-driven decision-making.
- **Data Pipeline Development:** Documented existing data structures and designed data pipelines to streamline data flow between relational databases and OLTP systems.
- **Azure Data Factory Integration:** Leveraged **Azure Data Factory** to design, transform, and transfer data, improving data quality and supporting data-driven product enhancements.
- **Python Development:** Developed Python algorithms to enhance product features such as **recommendation engines** and **anomaly detection** models.
- **User Acceptance Testing (UAT):** Created detailed UAT test cases, coordinated testing efforts, and ensured successful validation of project deliverables.
- **Risk & Issue Management:** Identified project risks, dependencies, and blockers, implementing mitigation strategies to ensure project timelines and objectives were achieved.
- **Process Improvement & Documentation:** Created detailed **process flows**, **wireframes**, and comprehensive documentation to improve clarity and streamline communication between technical and non-technical teams.

Mounika Pharmaceutical Distribution- Hyderabad, India
11/2022

11/2021-

Junior Manager in the Operation Department

- Strategizing and overseeing the supply chain processes to ensure the efficient and timely distribution of pharmaceutical products.
- Collaborating with suppliers and logistics partners to streamline the flow of materials and products, ensuring a continuous and reliable supply.

- Implementing quality control measures to guarantee the accuracy and integrity of the pharmaceutical products during the distribution process.
- Analyzing operational data to identify areas for improvement and implementing corrective actions to enhance overall efficiency.

Mounika Pharmaceutical Distribution- Hyderabad, India

5/2021-10/2021

Sales Representative

- Sales and Customer Relationship Management: I established and upheld enduring bonds with pharmaceutical customers, hitting sales goals and guaranteeing client contentment via consistent follow-ups.
- Product Knowledge and Sales Presentations: I developed a thorough understanding of our pharmaceutical products and persuaded clients with my persuasive sales presentations, highlighting each item's advantages.
- Order Processing & Account Management: I handled client orders, made sure they were delivered on time, and handled customer accounts, addressing problems and encouraging client referrals.

Tirumala Engineers, Pvt. Ltd- Hyderabad, India

8/2020-3/2021

Engineering Intern

- Optimized metal CNC and laser cutting processes, reducing production cycles and enhancing efficiency.
- Ensured high-quality manufacturing through rigorous quality control procedures and a focus on precision.
- Proficient in CNC machine programming, troubleshooting, and translating design specifications into executable code.
- Applied data-driven decision-making, analyzed production metrics, and contributed to comprehensive SOP documentation.

ADDITIONAL EXPERIENCES

SAEINDIA SOUTHERN SECTION - Internship in EMBEDDED Systems

3/2021-4/2021

- Design and develop embedded software for automotive control systems.
- Assist in project planning and execution, contributing to achieving project milestones.
- Learn to make informed decisions based on analysis and problem-solving techniques.

Electronic Arts Product Management Job Simulation on Forage - June 2024

- Completed a job simulation where I developed a solid understanding of different KPIs, and selected the most appropriate KPIs for measuring and assessing specific business problems related to a strategy RPG mobile game.
- Demonstrated my knowledge of key performance indicators within the video game industry.
- Broke down tasks for creating a data-driven video game presentation.

Accenture North America Project Management Job Simulation on Forage - April 2024

- Completed a job simulation where I was a project manager for a hypothetical client launching a new brand.
- Mapped suitable project management approaches including Plan Driven, Agile, Second Agile, and Hybrid to a portfolio of projects.
- Presented a project status update to senior leadership and project team members.

Diageo Manufacturing Job Simulation on Forage - April 2024

- Completed a job simulation in which I reviewed the entire bourbon production process for Diageo's supply chain and manufacturing team.

- Analyzed deviations from standard process parameters and identified their underlying causes.
- Evaluated downtime data and created a strategic plan to improve operational efficiencies as part of a continuous improvement mindset.

EDUCATION

Masters – Master of Science in Administration – Engineering Management

MAY, 2024

Central Michigan University

Bachelor of Technology – Automobile Engineering

August 2022

Maturi Venkata Subba Rao Engineering College, affiliated to Osmania University

PROJECTS

Design and analysis of knuckle joint for an all-terrain vehicle

8/2021-5/2022

- Conducted a comprehensive design and analysis of a knuckle joint tailored for an All-Terrain Vehicle (ATV) in automobile engineering.
- Led a team in applying advanced engineering principles to ensure the structural integrity, load-bearing capacity, and durability of the knuckle joint under varying terrains as part of the coursework for Machine Design.
- Applied principles from Mechanics of Materials to evaluate the structural integrity and load-bearing capacity of the knuckle joint under various operating conditions.
- Utilized Finite Element Analysis (FEA) techniques to simulate and optimize the performance of the joint, ensuring durability and safety in diverse terrains.

Advanced CNC Machine Programming Optimization

8/2020-3/2021

- Led the Advanced CNC Machine Programming Optimization Project to enhance precision and efficiency in metal CNC and laser cutting operations. Conducted a thorough analysis of existing programming processes, identifying opportunities for improvement.
- Collaborated with the programming team to implement advanced CNC programming techniques, optimize tool paths, and integrate innovative strategies. Achieved a remarkable 15% reduction in production time and a 12% increase in cutting accuracy, showcasing an ability to bring technical innovation to manufacturing processes.
- Effectively collaborated with the programming team throughout the project, fostering a cross-functional approach to problem-solving. This collaboration ensured the seamless integration of advanced CNC programming techniques and innovative strategies, contributing to the project's success and underscoring my ability to work collaboratively in multidisciplinary teams to achieve project goals.
- Successfully delivered tangible improvements in manufacturing outcomes, including the establishment of a sustainable system for ongoing CNC programming excellence. This project demonstrates a track record of achieving measurable results, highlighting my proficiency in optimizing technical processes for enhanced efficiency and precision.
