Profile

High level of work, motivated professional ready to provide combined knowledge and skills, to improve business results. Works effectively individually as well as in a team environment. Results-driven and resourceful with enthusiasm for growth and efficiency to meet company needs and enhance service value.

Education

08/2024 – present **Master's in Mechanical Engineering**

Pittsburg, USA *Pittsburg State University*

12/2024 **Mechanical Engineering**

India *Kalasalingam Academy of Research and Education*

Projects

Erosion Studies

An experimental investigation of Monel 400 coated with Stellite 6 through the HVOF thermal spray process took place. SEM and air jet erosion testing analyzed erosion resistance as well as microstructural characteristics. The research evaluated how the flow velocity together with discharge rate and impact angle measurements affected erosion resistance. The HVOF coating application proved effectively resistant to wear under different operating conditions.

Professional Experience

2025 – Present **Graduate Teaching Assistant**

Pittsburg KS, United States Full-time Graduate Teaching Assistant in the Department of Automotive and Engineering Technology at Pittsburg State University

Skills

CAD

Microsoft office

Teamwork and Collaboration

Multitasking

Certificates

- CAD Advanced Processes [🔗](#)
- Design for Additive Manufacturing [🔗](#)
- FactoryCAD [🔗](#)
- SAP Material Management

Organizations

2025 – Present **Cricket Club Organization**

Pittsburg KS, United States *President*
Pittsburg State University
