

Summary

- Full Stack Developer with 3+ years of IT experience, specializing in enterprise and web application development, including system architecture, design, and maintenance.
- Master in designing and implementing data models to ensure accuracy and efficiency in data handling.
- Champion in data analysis, utilizing statistical methods and visualizations to derive actionable insights.
- Expertise in optimizing databases for enhanced performance and faster queries execution.
- Advocate for automation, creating scripts to streamline data processing workflows and minimize manual tasks.
- Guardian of data quality, implementing rigorous quality checks to maintain accuracy and reliability.
- Specialist in process improvement, implementing efficiency enhancements to accelerate data processing.
- Explorer of machine learning techniques, applying algorithms for predictive analytics and customer segmentation.
- Champion of data security and privacy, maintaining high standards to safeguard sensitive information.

Skills

- **Languages:** C#, C++ , JAVASCRIPT ,JQUERY, SQL & PL/SQL, Direct X, Swift, Java, HTML, CSS,Java Script, Type Script, Angular
- **Frameworks:** .NET Framework 7.0/8.0/9.0/10.0/11.0, Blazor, Razor
- **Web development:** HTML, CSS, Bootstrap, JQuery, AJAX, JavaScript, Type Script, AngularJS, ReactJS
- **Development Tools:** MS Visual Studio, MS visual studio code, Sublime Text, Selenium IDE, Eclipse
- **Version Controller:** MS TFS, GitHub, Perforce (Helix P4V)
- **Web services:** RESTful API , MVC
- **Database:** SQL Server, My-SQL, Azure SQL
- **Testing:** Unit testing and test automation support (e.g. NUnit, XUnit, MSTest, Karma, Jasmine), Regression testing
- **Operating System:** Windows Variants
- **Cloud hosting technologies :** Pivotal Cloud Foundry/PCF, Amazon Web Services/AWS, and Google CloudPlatform/GCP
- **Modeling Tools** – Blender, Probuilder, AutoCAD, Maya

Professional Experience

WAWANESA GROUP

Aug 2023-Present

Full Stack Developer

- Expertise across the software development life cycle, from requirements analysis to deployment and maintenance.
- Enached in leveraging ReactJS for responsive user interfaces.
- Design and implementation of front-end solutions aligned with modern development best practices.
- Conducted code reviews to ensure adherence to standards and providing mentorship.
- Collaborated with cross-functional teams to deliver scalable applications.
- Coordinated architectural decisions for scalability, performance, and maintainability.
- Analysed diverse technologies including REST Web Services, ASP.NET, Azure, and NoSQL.
- Introduction of daily stand-up meetings and process improvements for enhanced team collaboration and efficiency.
- Proficiency in database management systems like SQL Server, MySQL, or MongoDB.
- Implementation of authentication and authorization mechanisms, such as OAuth or JWT.
- Streamlined application functionality by integrating four third-party APIs, resulting in a 50% reduction in manual data entry and saving an average of 20 hours per week for the team.
- Optimization of application performance and scalability through caching, load balancing, and database indexing.

- Familiarity with cloud platforms like AWS, Azure, or Google Cloud for deployment and hosting.
- Continuous integration and deployment (CI/CD) pipeline setup using tools like Jenkins or GitLab CI/CD.
- Orchestrated the implementation of robust testing strategies, incorporating unit testing, seamless integration testing, and comprehensive end-to-end testing; contributed to a 25% increase in software reliability and user satisfaction

COFORGE

Mar 2019 - Dec 2021

Full Stack Developer

- Familiarity with frontend frameworks such as React.js, Angular, or Vue.js for building user interfaces.
- Proficiency in backend development with technologies like Node.js, Express.js, or Django.
- Experience in RESTful API design and implementation for seamless communication between frontend and backend.
- Knowledge of version control systems such as Git for efficient collaboration and code management.
- Knowledge of cloud platforms like AWS, Azure, or Google Cloud for deployment and hosting of applications.
- Coordinated implemented OAuth authentication mechanism, resulting in a 30% reduction in unauthorized access attempts to web applications.
- Integrated 5 third-party services and APIs, enhancing application functionality and leading to a 20% increase in user engagement.
- Managing Docker for containerization, reducing deployment time by 40% and ensuring consistency across environments, resulting in a more reliable application delivery process.
- Worked engaged in continuous learning, attending 10 industry-related workshops and courses annually, resulting in the adoption of 3 new technologies and practices, leading to a 15% increase in productivity and efficiency.

Education

- **Masters Computer Science**
UNIVERSITY OF NORTH TEXAS
- **B.TECH Information Technology**
G.Narayanamma Institute of Technology and Science
