## EDUCATION

**University of Maryland, College Park** - B.S. in Computer Science: Data Science

May 2025

**Minor:** Statistics

GPA: 3.7

Apex Quant, Dean's List, AppDev Club, College Park Scholar, Girls Code It, Bitcamp, Maryland Dhoom

**Related Coursework:** OOP I & II, Computer Systems, Algorithms, Database Design, AI, ML, Actuarial Mathematics, Compilers

## SKILLS

**Languages:** Java, C, C++, Python, JavaScript, TypeScript, OCaml, Rust, Kotlin, Golang, SQL, HTML, R, Scala

**Technologies:** Unix, Linux, Object-Oriented Programming, Pandas, Jupyter, PostgreSQL, REST API, JEST, NVDA

**Tools:** PyCharm, MS Office, Git, AWS, SoapUI, Postman, Docker, Minitab, SAS, Firebase, Anaconda, Spark, React, Power BI

**Certifications:** *AWS Certified Cloud Practitioner Certification*, Oracle Cloud Infrastructure Certified AI Foundations Associate

## EXPERIENCE

### CVS Health

June 2025 - Present

Software Development Engineer

- Implemented anomaly detection on the Enrollment Management database, catching 95% of anomalies and cutting errors 18%.
- Developed and integrated new GAILE-driven features into Enterprise Virtual Assistant conversational flows, improving intent recognition accuracy by 15% and reducing user drop-off by 20%.
- Deployed scalable LLM features via REST APIs to support 100K+ weekly users, accelerating feature delivery by 25%.

### NitesOut Entertainment

November 2023 - May 2025

Full Stack Developer

- Led development of a React Native ticketing app to eliminate service fees, resulting in a 27% reduction in prices for users.
- Integrated secure payment processing APIs handling \$50K+ in monthly transactions, ensuring reliable and compliant checkout.
- Implemented automated event alerts and notifications, increasing attendance rates by 25%.

### CVS Health

May 2024 - August 2024

Software Engineer Intern

- Transitioned chatbot experience from guided boxes to free-form input using machine-learning models to boost accuracy from 85% to 96%, cutting user attrition by 20%.
- Experimented with Random Forest, XGBoost, and SVM models to reduce costs and improve performance, raising accuracy to 98% over the previous LLM.
- Integrated RESTful APIs with Axios/Fetch and ran comprehensive WCAG 2.1 accessibility testing with NVDA, increasing accessibility test pass rates by 40%.

### Softweb Solutions

May 2023 - August 2023

Data Analyst Intern

- Delivered automated visual reports using cloud tools to replace manual reporting, reducing analyst time by 30%.
- Analyzed client sales and operational datasets to identify trends, resulting in a 12% improvement in a retail client's inventory turnover through targeted stock recommendations.
- Utilized cloud-based tools to improve reporting scalability, enhancing support for future cloud migration.

### UMD FIRE

August 2022 - August 2023

Genome Computing Project Manager and Lead Researcher

- Led research team analyzing DNA configurations using Python and R, improving analysis performance/accuracy by 25%
- Optimized genomic data processing workflows leveraging C++ and parallel computing, reducing execution time by 65%

### George Mason University

August 2021

Computational Biology Researcher

- Researched solvent effects in organic reactions with Dr. Kenneth Foreman on ARGO and HOPPER clusters, yielding key insights.
- Used GAMESS on Hopper to optimize reactants/products with B3LYP/6-31G+ and QM/MM in NWChem, improving transitions.
- Streamlined simulation workflows to automate steps, resulting in a 15% reduction in compute time and faster iteration cycles for experimental design.

### Girls Code It

September 2020 - May 2024

Founder

- Founded a non-profit mentoring 300+ girls (ages 6–18) through coding workshops, boosting STEM confidence and participation.
- Designed and implemented a structured mentorship program focused on skill-building and confidence, leading 75% of participants to pursue advanced coding projects or STEM clubs.

### Best Brains Learning Center

November 2021 - Present

Coding Mentor
