Education

Master of Science, Information Technology - University of Cincinnati <i>Coursework: Advanced Algorithms, Technologies for Mobile Applications, Data Driven CyberSecurity, Human Computer Interaction, Advanced Storage Technologies</i>	Expected Graduation: December 2024 CGPA-3.93
Bachelor of Technology - GuruNanak Institutions Technical Campus <i>Coursework: C, C++, Operating systems, Database Management System, Data Structures</i>	June 2018 – August 2022 CGPA – 4.0

Technical Skills

- Languages:** Python, Java, C, C++, TypeScript, OOP (Object-Oriented Programming) principles
- Web Programming:** JavaScript, CSS3, HTML5, jQuery, React, Angular, SPAs, VueJS, GraphQL, Node.js, JSON, Django, Flask
- Database & Cloud Platforms:** SQL, MySQL, SQL Server, MongoDB, NoSQL
- Tools & Data Management:** Git, JIRA, CI/CD, Docker, Agile, ETL (Extract, Transform, Load)
- IDEs & Operating Systems:** Eclipse, Visual Studio Code, PyCharm, Jupiter Notebook, Windows, Linux/UNIX, MacOS
- Cloud Platforms:** Amazon Web Services (AWS), Azure

Work Experience

University of Cincinnati Technical Developer Cincinnati, OH.	January 2024 - December 2024
- Developed the backend of a Research Tracking System, demonstrating proficiency in Python and Ruby for data processing and backend development. - Optimized data storage and retrieval, showcasing a strong understanding of data structures and database management. Leveraged MongoDB and NoSQL to handle diverse research data. - Implemented a multi-factor authentication system in Python, highlighting problem-solving and security implementation skills, resulting in a 30% reduction in unauthorized access attempts, demonstrating a focus on system integrity. - Designed a responsive, interactive frontend using JavaScript and HTML/CSS, demonstrating foundational knowledge in web development technologies and a commitment to creating user-friendly interfaces.	

Cognizant Technology Solutions Software Engineer Hyderabad, India.	December 2022 - June 2023
- Designed and executed end-to-end diagnostics using Python for backend processing and integrated JavaScript with HTML on the frontend, streamlining development workflows and reducing processing time by 40%. - Resolved performance issues through troubleshooting and debugging, optimizing applications for enhanced efficiency and scalability. - Established unit testing protocols and automated test suites in Python to ensure software quality, integrating seamlessly with Git for version control and Continuous Integration & Continuous Deployment (CI/CD) pipelines, achieving 95% reliability. - Employed Python alongside cloud services and automation tools to create secure applications, increasing application security by 30% through advanced technology integration. - Utilized ETL processes to streamline data integration and transformation, enhancing both data consistency and system performance. - Collaborated in Agile teams to gather requirements & deliver high-quality solutions, leveraging Scrum and JIRA tools.	

Gem Soft Tech Solution Software Engineer Hyderabad, India	October 2021 - October 2022
- Developed and implemented key functionalities for the web application, including data storage, retrieval, validation, and integration with microservices, using Angular and Vue.js, improving system reliability and reducing downtime by 20%. - Led the creation of a high-performance web application optimizing front-end processing and achieving a 30% improvement in page load speed through efficient state management and rendering techniques. - Worked with cross-functional teams to optimize algorithms and API interactions, enhancing scalability and reducing response times for end-users by 25%.	

Academic Projects

Doctor-Patient Appointment Management System	January 2022 - July 2022
- Utilized React.js to design and implement a user-friendly interface, ensuring doctors and patients could efficiently book, manage, and track appointments, while incorporating CSS for responsive and modern UI components. - Leveraged Node.js and Express.js to develop a robust backend API, handling 30% of the application’s functionality, including user authentication, appointment scheduling, and seamless communication between the client and the database. - Employed MongoDB for 25% of the system's operations, focusing on the secure and efficient storage of patient records, doctor profiles, and appointment schedules, with robust data consistency. - Achieved seamless integration of the MERN stack components, contributing 15% to the project, and deployed the application to ensure scalability and accessibility.	

Weather forecast App:	September 2021 - December 2021
- Created Integrated the Open Weather Map API to retrieve real time weather data, implementing logic for processing user requests and dynamically rendering weather forecasts based on user location and preferences. - Utilized HTML and CSS in conjunction with the Flask framework to create a visually appealing user interface that ensures seamless user experience.	

Certifications

- Get Started with Python - Coursera: Completed foundational Python programming course covering syntax, data structures, and scripting.
- HTML, CSS3 & Bootstrap Certification - Udemy: Mastered web development essentials including HTML, CSS3, and Bootstrap for responsive design.
- Microsoft Azure Fundamentals Certification (AZ-900).

Accomplishments

- Received the Graduate Incentive Award (GIA) by the University of Cincinnati valued at \$18,729, in recognition of academic excellence.
- Awarded the Gold Medal for academic excellence from Guru Nanak Institutions Technical Campus, representing the 2018-2022 graduating batch.
- Participated in the event C-Champs organized by innovative GNI Technical Events (IGNITE-2019).
