

SANJANA VENKATESH

Atlanta, GA | (213) 913-1568 | sv51119@usc.edu | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

EDUCATION

University of Southern California

Master of Science in Analytics GPA: 3.8/4.00

Relevant Coursework: Data Mining & NLP, Visualization, Database Systems, Data Warehousing/ETL, Cloud Analytics

Los Angeles, CA

Aug 2023-May 2025

BMS College of Engineering

Bachelor of Technology in Computer Science; GPA: 3.7/4.00

Bengaluru, India

Jul 2017 - Jul 2021

WORK EXPERIENCE

University of Southern California

Data Analyst Research Assistant

Los Angeles, CA

May 2025 – Present

- Orchestrated **ML pipelines** on **Vertex AI** with **Snowflake and GCS**, cutting training time **42%** by gathering and cleaning data from 30+ data sources
- Built EDA and feature engineering in **Power BI**; optimized **BigQuery** (partitioning, clustering) using Advanced **SQL** to reduce query cost **38%**; delivered drill-through KPI pages and stakeholder packs.

SAG-AFTRA Health Plan

Data Analyst Intern

Burbank, CA

May 2024 – Aug 2024

- Defined adoption **KPIs** (MAU, active viewers, query depth) in **Tableau and Power BI**; produced weekly exec readouts and surfaced content rationalization opportunities (top 10% dashboards **drove 80% of views**)
- Engineered an automated metadata management system in **Python** to sync **Snowflake** glossary terms to ThoughtSpot worksheet descriptions, cutting manual updates and improving governance; **reduced run time by 57%**
- Built **REST-API pipelines** to ingest ThoughtSpot usage logs into **Snowflake** and transform them for adoption analytics, reducing retrieval time by 42%

Quantiphi, Inc.

Data Engineer

Bengaluru, India

Feb 2021 – Jul 2023

- Modernized a legacy Hadoop estate on GCP: **migrated Hadoop/MapReduce jobs to Dataproc**, tuned Spark parameters, yielding **\$1.2M/year infrastructure savings**
- Directed an 8-engineer program to migrate **1,500+** tables to **BigQuery**; hardened data quality with SQL checks and DVT, achieving **≥99% accuracy** and audit-ready reporting compliance
- Modeled **Excel analytics with Power Query (M) and PivotTables**, cleaning/merging BigQuery and CSV sources into parameterized, reusable models for ad-hoc analysis and self-serve reporting
- **Defined standardized datasets** and KPI logic (**DAX**) in **Power BI**, delivered **Excel** reporting templates, and configured **Power Automate** refresh/alerts with drill-through navigation—holding **~99% SLA**
- Operationalized a governed metrics layer: authored **LookML** and launched energy **KPI** dashboards that drove **\$1.2M annual cost savings**; presented results to client VPs, enabling cross-functional adoption

PROJECTS

Retail Data Analytics | [Link](#)

Mar 2024 – Jul 2024

- Automated ETL with **Apache Airflow + Python** to ingest GCS to BigQuery, slashing data latency from **2 hours to 12 minutes** and enabling reliable daily refresh SLAs
- Built the analytics layer: **dbt** star schema with data quality tests, partitioning & clustering for performance; delivered **Power BI** dashboards with **DAX** for Top Products /Markets, **reducing manual reporting time by 48%**

Intelligent Fab Monitoring & Maintenance System | [Link](#)

Jan 2024 – Mar 2024

- Built a real-time geospatial analytics platform tracking **2M+** devices using public predictive-maintenance manufacturing datasets; delivered **Power BI KPI dashboards**, interactive data visualization, and event-driven alerts, eliminating manual monitoring
- Engineered ETL/ELT for 100K+ RTLS logs using Python performed data cleaning, geofencing, feature engineering, and time-series modeling; trained **XGBoost** for RUL prediction (**82% accuracy**). **1st place among 20+ USC capstone teams**

TECHNICAL SKILLS

Languages: Python, SQL, PySpark, Java, C++ **Certification:** Associate Cloud Engineer (Google Cloud)

Business Intelligence: Power BI (Power Query M, Power Automate), Microsoft Excel (Power Query), Tableau, Thoughtspot

Data Engineering & Cloud: BigQuery, Snowflake, GCP, dbt, Apache Airflow, REST APIs, CI/CD (GitHub Actions), AWS

Machine Learning: Predictive Analytics, XGBoost, Customer Insights, Time Series Analysis, A/B Testing, Forecasting
