TECHNICAL SKILLS

Full Stack : React JS, React Native, Flutter, Swift, Micro Services, SpringBoot, MongoDB, MySQL

Tools: Git, Github, Docker, PostMan, Jira, Hadoop ecosystem

AI&ML: LLM Training and Testing, Neural Network Development, Keras, PyTorch and TensorFlow

Security and Encryption: DES, AES, SHA-512, RSA, MD5

Programming Languages: Java, Python, C, C++, HTML, JavaScript

PROFESSIONAL EXPERIENCE

Illinois State University Graduate Teaching Assistant

Aug 2024 - Jun 2025

- Delivered laboratory lectures for IT168(Structured Problem Solving using Java) and IT 166 (Python programming for Science and Data Analysis).
- Lectures on writing classes from scratch in Java using **Eclipse IDE** and using predictive/analytical libraries in Python using **Sk-Learn**, **Matplotlib**, **Pandas**, and **NumPy** for Data Science.
- Tutored and helped undergraduate students with their core understanding of course material and programming assignments at the IT Learning Center.
- Graded assignments and exams of over **50+** students.

Purview Services Student Intern

Mar 2022 - Jun 2022

- Designed and implemented end-to-end web solutions, leveraging expertise in both front-end and back-end technologies to deliver responsive, scalable, and user-focused applications.
 - Proficient in modern development frameworks, having engineered a full-stack payment tracking platform, 2PayuBack, using **React.js** for a dynamic front-end and **Spring Boot** for secure, **RESTful** back-end services, ensuring seamless integration, reusability, and optimal performance.
 - Mentored and supervised a team of five student interns throughout the software development lifecycle of the 2PayuBack project, coordinating task delegation and providing hands-on training in **Git** workflows and **CI/CD** practices. Fostered a collaborative learning environment, leading to a **30%** boost in productivity and successful project delivery within three months.
-

EDUCATION

Illinois State University
Master of Science in Computer Science
CGPA of 3.75/4

Aug 2023 - Aug 2025

Gitam University
Bachelor of Technology in Computer Science

Aug 2019 - June 2023

PROJECTS

Pluto AI

- Source code: [Github](#)
- Developed an AI chatbot using **OpenAI API** to help students learn Java. **Scraped data** off of open source web sites using **beautiful soup**. Implemented a GUI called Streamlit using **Ngrok API**.

Patricia Trie

- Source code: [Github](#)
- Implemented a radix trie using **dynamic radix** i.e. the number of children of a node depends on the common prefix of the key in Python.
