

Career Summary

Results-driven **Python and Full-Stack Developer** with 3+ years of experience building scalable web applications, APIs, and cloud-native solutions. Proficient in Python, FastAPI, Flask, React.js, and SQL with strong expertise in CI/CD automation, containerization, and AWS architecture. Skilled in designing and deploying full-stack platforms, integrating third-party APIs, and optimizing backend performance.

Education

M.S. Computer & Information Science | Christian Brothers University, Memphis, TN | GPA: 3.81/4

2025

• Member of The National Society of Leadership and Success, an honor awarded to the top 8% of college students across country.

B.Tech Electronics & Communication | SRKR Engineering College, India | CGPA: 8.44/10

2023

Key Achievements

- Increased user engagement by 30% with interactive dashboards and advanced data visualization for economic insights.
- Built and deployed a microservices architecture with FastAPI and Docker, improving scalability by 40% & deployments by 35%.
- Created LLM-powered web-scraping pipeline (Playwright + Anthropic/OpenAI on AWS Bedrock) for real-time market insights.
- Executed large database migration to MongoDB, cutting query latency by 45% and boosting statistical workload performance.
- Automated infrastructure provisioning with Terraform + CloudFormation, reducing setup time by 60% & enabling deployments.
- Integrated payment, email, and geolocation APIs, extending full-stack app functionality and reducing dev effort by 20%.
- Implemented real-time streaming pipelines with AWS Lambda + API Gateway, powering dashboards with <2s data latency.

Work Experience

Full Stack Engineer | Kgate Technologies Inc | Houston, Texas

Feb 2024 – Present

- Led full research lifecycle, deploying scalable econometric apps with FastAPI/Flask/React, accelerating analysis delivery by 35%.
- Automated large-scale data conversion & RESTful CRUD ops with Python/Bash, reducing dataset processing time 50%.
- Integrated CloudWatch/Elasticsearch for log analytics+anomaly detection, cutting downtime 20% & boosting system availability.
- Engineered Python modules on Linux to automate hypothesis testing and econometric simulations for statistical research.
- Built Matplotlib dashboards & predictive analytics, improving executive decision-making speed by 25% across units.
- Established CI/CD pipelines via Jenkins/GitHub Actions, cutting research release cycles by 35% for rapid updates.

Software Engineer | BootLabs | Bengaluru, India

Jun 2021 – May 2023

- Designed responsive economic data dashboards with React/HTML/CSS, boosting 30% user engagement & visualization.
- Built and maintained FastAPI RESTful APIs to integrate research datasets with front-end economic modeling dashboards.
- Authored Python modules to process and validate high-volume datasets for accurate predictive economic analysis.
- Utilized DynamoDB for scalable data storage, optimizing complex queries and maintaining adaptive analytical schemas.
- Dockerized statistical research environments to guarantee consistent and reproducible economic modeling across stages.

Key Projects

Expense Tracker System (Capstone Project)

- Delivered full-stack expense analytics platform (React + FastAPI), supporting 500+ concurrent users with real-time forecasting.
- Implemented secure login, advanced filters, and REST APIs, enabling 99.9% reliable multiuser data ingestion.
- Optimized PostgreSQL with SQLAlchemy ORM, handling millions of transactions monthly with strict relational integrity.
- Deployed on AWS EC2 (Gunicorn + Nginx), achieving near-zero downtime and seamless horizontal scalability.

Hotel Management System

- Built a full-stack data platform (FastAPI, Flask, React, MongoDB, AWS), scaling to 10K+ daily booking transactions.
- Automated housekeeping/reservation scheduling, saving 120+ staff hours monthly and raising operational accuracy by 40%.
- Deployed real-time dashboards for forecasting/booking trends, enabling a faster 25% response to service-level bottlenecks.

Skills & Tools

Databases: PostgreSQL, MySQL, SQLite, SQL Server, MongoDB, DynamoDB

Programming & Data: Python (Pandas, NumPy, SciPy), React.js, SQL, C, Scikit-learn, TensorFlow, Matplotlib, BeautifulSoup, Playwright, HTML5/CSS3,

Cloud & DevOps: AWS (EC2, S3, Lambda, RDS, CloudWatch, CloudFormation, ECS, Bedrock), Docker, Terraform, Jenkins, Git, GitHub

Data Engineering: ETL, Pipeline Engineering, Big Data Analytics, RESTful API, Microservices Architecture, CI/CD Automation

Tools & Platforms: Powerbi, Excel, Linux, Bash, Visual Studio Code, Grafana, NewRelic, Prometheus, Langchain.

Data Science and Analytics: Machine Learning, Predictive Analytics, Econometrics, Data Visualization (Time Series, Hypothesis Testing, Regression), RAG, Data Structures & Algorithms (Linked Lists, Stacks, Trees, DP, Greedy, DFS/BFS)
