

Sankeerth Reddy Annapureddy

Software Engineer | sankeerthreddy311@gmail.com | +1 (731) 228-9090

Summary

Skilled Software Engineer with 5+ years of experience in designing, developing, testing, and deploying scalable web applications using **Java, Python, Spring Boot, Hibernate, REST APIs**, and **microservices architecture**. Proficient in building high-performance backend systems, optimizing **SQL** queries, managing **CI/CD** pipelines using **Jenkins** and **Git**, and leveraging tools such as **Docker, Kubernetes**, and **AWS** for cloud-native deployments. Demonstrated ability to reduce system latency **by 30%**, automate repetitive tasks **by 40%**, and improve code coverage **by 25%** through unit testing and integration testing. Focused on delivering clean, maintainable, and testable code aligned with business goals.

Skills

- **Programming Languages:** Java, Python, SQL.
- **Web Technologies:** HTML, CSS, JavaScript, JSP, Servlet.
- **Frameworks:** Spring Boot, Spring MVC, Hibernate, Flask, React.js, Node.js.
- **Databases:** MySQL, PostgreSQL, MongoDB.
- **Tools & Platforms:** Git, Jenkins, Docker, Kubernetes, Maven, Gradle, Terraform.
- **Cloud & DevOps:** AWS (EC2, Lambda, S3), Azure (Functions, AKS, APIM), GCP, CI/CD pipelines.
- **Testing:** JUnit, Mockito, Postman, REST Assured.
- **Other:** Agile/Scrum, RESTful APIs, Microservices Architecture, IntelliJ, VS Code.
- **Software Development:** API Development, Microservices, Performance Optimization.

Education

- Master's Degree from Saint Louis University, St. Louis

Professional Experience

Bank of America | Software Engineer | Aug 2023 – Current

- Designed and implemented **RESTful microservices** using **Spring Boot and Java**, improving **API** response time **by 28%**.
- Developed and deployed containerized applications using **Docker** and **Kubernetes** on **AWS**, enhancing deployment speed **by 35%**.
- Automated unit and integration testing pipelines using **JUnit** and **Jenkins**, increasing test coverage **by 25%**.
- Integrated **Hibernate ORM** for efficient database interactions, reducing **SQL** execution time **by 20%**.
- Collaborated in **Agile** teams and participated in daily scrums, sprint planning, and code reviews.
- Utilized **Git** and **Bitbucket** for version control and pull requests management.
- Applied monitoring and logging tools to identify and fix critical bugs, reducing downtime **by 18%**.

Capital First | Software Engineer | Sep 2020 – Jul 2022

- Built scalable backend modules using **Java, Spring MVC**, and **Hibernate**, handling up to **500K** requests/day.
- Developed **JSP** and **Servlet**-based dynamic web pages, improving front-end functionality **by 40%**.
- Implemented **REST APIs** and consumed third-party services to support business logic and external integrations.
- Optimized **SQL** queries and performed **DB** tuning, reducing report generation time **by 22%**.
- Managed **CI/CD** pipelines with **Jenkins** and **Git**, automating deployment and rollback processes.
- Integrated logging (**Log4j**) and monitoring solutions, resulting in **30%** faster issue resolution.
- Participated in sprint reviews and backlog grooming in an **Agile/Scrum** environment.

Cred | Software Engineer | May 2019 – Aug 2020

- Developed backend services using **Python and Flask**, supporting credit card payment automation.
- Built data ingestion pipelines and integrated **APIs**, improving data processing efficiency **by 35%**.
- Wrote unit tests using **PyTest** and increased code reliability **by 20%**.
- Utilized **MongoDB** and **PostgreSQL** for managing transactional and user data.
- Automated repetitive tasks with **Python scripts**, saving up to 10 hours/week.
- Deployed services on **AWS EC2** and managed **S3 buckets** for file storage.
- Worked with **Git** for **version control** and **Jira** for task management.

Certification

- Microsoft Azure Associate
- Cisco Network
