

SANKET KULKARNI

Chicago, IL | P: (312) 536-4403 | skulkarni27@hawk.illinoistech.edu | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

SUMMARY

Results-oriented Full Stack Developer with 4 years of experience, architecting scalable digital products using React, Node.js, Fast API and AWS. Proven ability to optimize workflows, reduce software defects, and enhance user engagement with innovative solutions. Strong problem-solving and leadership skills. Dedicated to delivering scalable, high-performance, and efficient solutions with a focus on quality

WORK EXPERIENCE

HYPHENOVA – California, United States of America

Full Stack Developer

Sept 2024 – Nov 2024

- Engineered a mobile application front-end with React Native, creating intuitive, user-centric interfaces boosting engagement by 25% and reduced load times by 15%. Developed and integrated backend services with FastAPI, enhancing full-stack functionality
- Crafted user interfaces using Figma and Flutter, aligning design with user needs and business objectives to drive a 20% increase in user satisfaction scores. Led research, wireframing, prototyping, and usability testing to refine the user journey, reducing drop-off rates by 15%. Partnered with cross-functional teams to synchronize front-end and back-end efforts, accelerating the development cycle by 30%

FLEXTRONICS TECHNOLOGIES INDIA PVT. LTD. – Pune, INDIA

Associate Software Engineer

Nov 2020 – July 2023

- Devised and executed comprehensive test plans for the Factory Application, driving a 98% reduction in software bugs and ensuring a smooth, error-free implementation
- Directed a cross-functional team to implement an optimized S&OP process, boosting workflow efficiency by 20% and sustaining a 99% on-time delivery rate. Developed and integrated SQL User-Defined Procedures to address customer needs, cutting support tickets by 25%. Leveraged advanced SQL techniques to build complex functions, streamlining data processing and enhancing performance
- Harnessed the Infor LN ERP tool to enhance factory operations and optimize workflow, leading to a 20% reduction in production time. Facilitated effective communication strategies to synchronize cross-functional teams, successfully reducing project delays by 20%

SCROBITS TECHNOLOGIES – Pune, INDIA

Full Stack Developer

Jan 2020 – Oct 2020

- Designed and implemented full-stack solutions for clients (Profile-Sketch & Warranty Ninja) using React, Node.js, APIs, Firebase, HTML/CSS, and JavaScript. Applied innovative problem-solving to resolve technical issues, achieving a 40% decrease in customer complaints while enhancing product reliability and user satisfaction
- Architected scalable backend services with Node.js, cutting response times by 30%, and crafted responsive front-end applications using React and Next.js. Integrated advanced Angular features, increasing user engagement and retention by 20%
- Orchestrated API integrations using C# and REST, minimizing data transfer errors by 20% and accelerating time to market by 15% through seamless collaboration with cross-functional teams on front-end and back-end development

SKILLS

Programming Language: Python, Java, C/C++, C#, Node.js, SQL, HTML5, CSS, Next.js, React, Solidity, JavaScript, TypeScript, Angular JS

Software and Build Tools: AWS, Firebase, VS Code, Git-Hub, Git, Wireshark, Android Studio, Flutter flow, JIRA, Slack, Postman, Docker, Azure Dev-Ops, CIC Flow Meter, Chameleon Cloud, GCP, Flask, PyCharm, Figma, Sprint Boot, TensorFlow, Keras LSTM, Tableau, Dataverse, PowerApps, Power BI, Express.js, LangChain, N8n Workflow Automation

Soft Skills: Communication, Leadership, Teamwork, Problem Solving, Decision-Making, Adaptability, Time Management, Creativity

PROJECT EXPERIENCE

Fine-Tune a Job Title Embedding Model using Synthetic Training Data

Jun 2025 – Aug 2025

- Developed a fine-tuned job title classification model by generating synthetic training data with GPT-3.5, improving retrieval accuracy for similar roles. Built and deployed Streamlit app to visualize real-time clustering and retrieval results for user interaction

LinkedIn Outreach Automation – Agentic AI

May 2025 – Jul 2025

- Built an AI-driven automation pipeline using N8n that integrates ChatGPT, Apify, Excel, and PhantomBuster to streamline LinkedIn outreach with minimal manual intervention. The workflow dynamically generates targeted Apollo links, scrapes and stores prospect data, and sends personalized connection requests, reducing data collection and outreach time by over 80%

AI Agent – Python

Apr 2025 – May 2025

- Built an AI agent in Python capable of web search, task execution, and memory retention using LangChain & Anthropic Claude API. Integrated prompt engineering and agent-based planning to enable dynamic, multi-step reasoning and autonomous decision-making

Detection of DDOS attack using Machine Learning Technique

Jan 2024 – May 2024

- Collaborated on detecting DDoS attacks using machine learning with the CICD dataset, simulating attacks via H-ping, parsing traffic with CIC Flow Meter, and training an ML model to identify malicious traffic

Deep Bilateral Learning on Real-time Image Enhancement

Oct 2023 – Dec 2023

- Researched real-time image enhancement using Convolutional Neural Networks (CNN), inspired by bilateral grid processing and local affine color transforms. Trained CNN on I/O image pairs to predict coefficients for a locally affine model in bilateral space

Voting Application using Blockchain Technology

Jan 2023 – Dec 2023

- Collaborated on enhancing an electronic voting system by designing a blockchain-based architecture to prevent vote tampering, using SHA-256 to convert vote data into 256-byte binary values. Published project paper in IJRSEM. ([Published Paper](#))

EDUCATION

ILLINOIS INSTITUTE OF TECHNOLOGY – Chicago, USA

Aug 2023 – May 2025

Master's in computer science, GPA: 3.6

SAVITRI BAI PHULE PUNE UNIVERSITY – Pune, INDIA

Aug 2016 – May 2020

Bachelor's in computer engineering, GPA: 3.6
