

# SANTHOSH REDDY

## Java FullStack Developer

✉ gantlasaireddy99@gmail.com ☎ 9452140706 🌐 [linkedin.com/in/santhosh-reddy-1100301b3](https://www.linkedin.com/in/santhosh-reddy-1100301b3)

### PROFILE

---

Experienced Java Developer with **5 years** in building scalable web applications using Java 8, Spring Boot, Hibernate, and RESTful APIs. Skilled in front-end technologies like AngularJS, React and JSP, cloud platforms (AWS, Docker, PCF), and Microservices. Proficient in database design with MySQL, PL/SQL, and MongoDB. Strong in Agile, TDD, and tools like Jenkins and GitHub.

### SKILLS

---

**Programming & Frameworks::** Java, Python, JavaScript, Typescript, Nodejs, PHP, SQL, HTML, CSS, XML, JSP, JPA, JMS, JDBC, Junit, Log4j, Spring Boot, Hibernate, JSF, AngularJS, React.js, Redux, Express.js, Restful APIs, Linux/Unix, Spring Batch, IntelliJ, Eclipse, NetBeans, Visual Studio

**Tools & Technologies::** AWS, Azure, Docker, Kubernetes, Harness, Ansible, Puppet, Terraform, Git, Maven, Kafka, Jenkins, GitHub, SVN, Agile, GraphQL, Elastic Search, Apache Camel, Scrum, JIRA, Splunk, uDeploy, SDLC, PuTTY, Gradle, JUnit, Rally, Postman, OWASP, SOAP, REST, Microservices

**Infrastructure & Systems::** EC2, S3, VPC, Lambda, DynamoDB, API Gateway, CloudFront, SQL Server, Oracle DB, MySQL, MongoDB, Cassandra, DB2, NoSQL, LDAP, OAuth, Windows, UNIX (Mac & Linux), Apache Tomcat, JBoss, WebLogic, SSO

**Version Control & Methodologies::** Git, SVN, Agile, Scrum

**Web Services::** SOAP, REST, Microservices, Docker, Jenkins, Kafka

### PROFESSIONAL EXPERIENCE

---

#### Software Engineer 2, *The Home Depot*

Aug 2023 – present | Atlanta, Georgia

- Analyzed, designed, developed, tested, and deployed new user stories and product features to enhance scalability and performance for The Home Depot's e-commerce platform, following Agile methodologies (Scrum, TDD).
- Designed and implemented RESTful APIs using Spring Boot for new features, ensuring high-quality code.
- Spearheaded microservices architecture implementation with Spring Boot, Docker, Kafka, and AWS, enhancing scalability and reliability.
- Optimized single-page applications (SPA) using Angular 14, HTML5, CSS3, and JavaScript, creating dynamic and responsive interfaces.
- Utilized TypeScript's static typing and interfaces to build scalable and maintainable Angular applications, reducing runtime errors.
- Secured API endpoints with OAuth2 and JWT, ensuring secure communication and user authentication.
- Configured Kafka consumers and producers for real-time event-driven communication across distributed services.
- Deployed applications on AWS EC2 with Elastic Load Balancing (ELB) and exposed APIs via AWS API Gateway for efficient access.
- Developed and optimized complex SQL queries in Oracle, enhancing data retrieval efficiency and ensuring smooth integration with microservices for The Home Depot's e-commerce platform.
- Automated CI/CD pipelines using Jenkins, Gradle, and GitHub, improving deployment efficiency.
- Provided on-call support to quickly resolve critical production issues, ensuring platform uptime and reliability.
- Implemented distributed data storage and retrieval systems using Apache Cassandra, optimizing scalability and fault tolerance.
- Leveraged Apache Cassandra to design a fault-tolerant, highly available data layer, optimizing read/write performance to support The Home Depot's large-scale e-commerce transactions.

- Implemented Elasticsearch to optimize search functionalities, enabling fast and accurate retrieval of product data across The Home Depot's e-commerce platform, improving query performance by 40%.
- Wrote and optimized complex PL/SQL queries in Oracle and MongoDB for backend data processing.
- Managed cloud infrastructure and services, including AWS Lambda, S3, and Pivotal Cloud Foundry (PCF).
- Implemented Agile methodologies like Test-Driven Development (TDD) and conducted unit testing using JUnit to ensure high-quality deliverables.

**Associate Software Engineer, Price Waterhouse Copper**

Jul 2019 – Nov 2021 | Hyderabad, India

- Developed and maintained a Client Financial Management System using Java, Spring Boot, and Hibernate, enhancing financial data analysis and reporting.
- Designed and deployed microservices architecture with Node.js and AWS Lambda, improving scalability and reducing operational costs.
- Independently migrated the client dashboard for PwC's analytics platform from JSP to TypeScript with React, ensuring enhanced performance, improved scalability, and delivering a seamless user interface for data visualization and reporting tools.
- Created and consumed RESTful web services using Spring Boot for seamless system integration and efficient communication between services.
- Configured AWS services including EC2, S3, and RDS (MySQL) for application deployment, storage, and database management.
- Enhanced system scalability and maintainability by aligning GraphQL endpoints with Spring Boot and Node.js services.
- Built and containerized applications with Docker and deployed on AWS ECS, ensuring consistent performance across environments.
- Automated CI/CD pipelines using Jenkins and AWS Code Pipeline, streamlining testing and deployments.
- Implemented Redux for efficient state management and improved scalability in PwC's analytics platform.
- Used Redux-Saga for managing side effects and asynchronous operations, ensuring smooth data flow in PwC's applications.
- Integrated Apache Cassandra to manage distributed data storage for high-volume financial transactions, ensuring low-latency and high availability.
- Implemented JWT-based authentication for secure user access and API protection.
- Optimized ReactJS components with Redux and React Router for efficient state management and smooth navigation.
- Developed automated Python scripts for unit and integration testing, leveraging frameworks like PyTest to ensure robust test coverage and high code quality for backend services.
- Automated unit and integration testing using JUnit, Mocha, and Chai, ensuring high code quality.
- Monitored and logged applications using AWS CloudWatch, enabling proactive issue resolution.

**Java Developer, Wipro**

Jul 2018 – Jun 2019 | Hyderabad, India

- Developed a Supply Chain Management System using Spring MVC, Hibernate, and MongoDB, streamlining inventory and order processing.
- Designed database schema and created complex SQL queries and stored procedures to meet business requirements.
- Utilized JavaScript ES6+ features, including Promises and async/await, to streamline asynchronous operations and enhance code readability.
- Built responsive, dynamic user interfaces using React, JavaScript, HTML5, and CSS3, leveraging React Hooks and Context API for state management.
- Deployed microservices on Azure App Services and automated CI/CD pipelines using Azure Pipelines for seamless deployments.
- Utilized Node.js for real-time data synchronization, improving system responsiveness and enhancing the overall user experience.
- Designed MongoDB schemas to handle semi-structured data, ensuring flexibility and scalability while integrating MongoDB with Spring MVC for real-time data processing.
- Reduced support tickets by 25% through efficient problem-solving and improving application reliability.

## **CERTIFICATES**

---

- Trained in Java development through Wipro Talent Next program
- Certified Software Development Trainee (October 2020).
- Certified Data Processing Specialist by Aspiring Minds (AMCAT), July 2020.
- Cybersecurity Awareness Certified
- Certified in MySQL
