PROFESSIONAL SUMMARY

Data-driven and analytical 3+years of practical experience, the data analyst has worked with cloud data platforms like **AWS** and developed data pipelines, and scripted in **Python, R, SQL**, Kusto and Spark. effective data governance procedures and a strong expertise in quantitative fields, as well as the demonstrated ability to use BI technologies to transform complicated data into relevant insights. competent in process improvement techniques and Agile approaches.

PROFESSIONAL EXPERIENCE

Data Analyst

India

Tata Consultancy Services

April 2020– Aug 2023

- created and maintained scalable data pipelines with **Apache Spark** and **Databricks** to process huge, unstructured and structured datasets effectively.
- In order to optimize query performance and storage efficiency, ETL procedures were built to ingest and transform data from many sources (**Cosmos DB, SQL Server**) into **Kusto** and **Snowflake**.
- **Python, SQL**, and **R** code was used to automate reporting procedures, do statistical analysis, and provide business teams with superior insights.
- Real-time analytics, machine learning experiments, and cooperative development with cross-functional teams were conducted using Databricks notebooks. Applied **data governance** best practices using **Informatica DQ**, ensuring data quality, consistency, and compliance across platforms.
- created and implemented **Power BI and Tableau** interactive dashboards that let business stakeholders track KPIs and make informed decisions.
- Power Automate and SharePoint were used to automate the refresh of **Power BI** datasets, increasing the timeliness and accuracy of reports. Created smooth, end-to-end analytics pipelines by migrating data from **Cosmos DB to SQL**, then from **SQL to Kusto**, and lastly to **Power BI/Tableau**.
- Cloud-based storage, computation, and data transformation are supported by integrated data solutions inside the **AWS** ecosystem.
- worked in **Agile** settings, taking part in daily standups, sprint planning, and backlog grooming to match development with business requirements. Developed and refined Snowflake data warehouse models to facilitate real-time analytics and cut query times.

EDUCATION

Florida Atlantic University

Master's, Data Science & Analytics

Aug 2023- May 2025

Boca Raton, Florida

Aditya Engineering College

Bachelor's, Electronics & Communication Engineering

June 2016- Apr 2020

Surampalem, India

TECHNICAL SKILLS

Languages: Python, R, SQL, Spark

Data Tools: Snowflake, Informatica DQ, AWS (S3, Lambda, Redshift), Apache Spark

BI Tools: Tableau, Power BI,

Concepts: Data Warehousing, Unstructured Data, Data Quality, Data Governance, ETL

Methodologies: Agile, Lean, Six Sigma

Version Control: Git, Excel, GitHub

Domain: CRM / Business Intelligence

PROJECT

Sales performance dashboard: POWER BI

Built an interactive Power BI dashboard to visualize sales, profit, and regional trends, improving business decision-making and reducing reporting time by 40%.

CERTIFICATIONS

Trained in Full Stack developer in the platform of Wiley

Azure AI Fundamentals (AI-900) Online training by Microsoft

AWS certified Solutions offered by TCS
