

Mohammed Saqlain Patel

Full Stack Developer
saqlain@jobemails.net | (562)-254-2767 | [California](#) | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

Summary

Proficient Full Stack Developer with 3+ years of experience in designing, developing, and deploying scalable web applications using Java, React, and Spring Boot. Expertise in RESTful APIs, microservices, CI/CD pipelines, and cloud technologies (AWS, GCP). Adept at enhancing system performance, implementing secure user authentication, and leading end-to-end development. Skilled in leveraging Docker, Kubernetes, and Terraform for efficient deployment while ensuring optimal performance and user experience.

Technical Skills

- **Frontend Development:** React.js, Redux, JavaScript, AJAX, WebSocket, HTML5, CSS3, Bootstrap, Angular
- **Backend Development:** Node.js, Express, Python, Flask, Java (Spring Boot, Spring MVC)
- **Database Management:** PostgreSQL, AWS RDS, MongoDB, MySQL, Sequelize ORM, GraphQL
- **Cloud & Deployment:** AWS (S3, CloudFront, Lambda, Elastic Beanstalk, EC2), GCP (BigQuery, APIGEE, Cloud Functions), Docker, Kubernetes, Terraform, Jenkins
- **CI/CD & DevOps:** GitHub Actions, AWS CodePipeline, Ansible
- **Testing & Quality Assurance:** Jest, React Testing Library, JUnit, Mockito, Selenium, Postman, PyTest
- **Others:** REST APIs, SOAP APIs, Hibernate, JPA, Microservices Architecture, XML, JSON, SonarQube, Agile (Jira, Git, Bitbucket)

Professional Experience

Full Stack Developer, Voya Financial

08/2024 – Present | Remote, USA

- Designed and developed a Budgeting and Finance Tracker application, using React for the frontend and Spring Boot for backend services, enabling users to track expenses, set budgets, and analyze financial data securely.
- Built an interactive and responsive user interface with React, Ant Design, and Chart.js for dynamic financial insights. Implemented forms for expense tracking, budgeting, and visualizations with seamless UI components for enhanced user experience.
- Developed RESTful APIs using Spring Boot to manage user data, transactions, and budgeting details. Designed API endpoints for expense tracking, account management, and user notifications, ensuring scalability and performance. Integrated Firebase Authentication for secure user login.
- Integrated WebSockets for real-time financial updates, allowing users to instantly view changes in their financial data, such as spending and budget changes. This feature enhances user engagement by providing immediate notifications and insights.
- Implemented unit and integration tests with JUnit and Mockito for backend services, ensuring robust functionality. Used Jest and React Testing Library for frontend tests. Automated the deployment pipeline with Jenkins for continuous integration and delivery (CI/CD).
- Deployed the application on GCP Cloud Run for efficient scaling and cost-effective performance. Utilized Terraform to manage infrastructure as code and Docker for containerization, ensuring seamless deployment in cloud environments.

Software Engineer, Tata Consultancy Services Ltd

05/2021 - 01/2023 | Hyderabad, India

- Designed and deployed scalable microservices architecture for a German bank, leveraging RESTful APIs, Spring Boot, and Spring Security to enable critical business applications and ensure secure, seamless system integration.
- Improved API response times by 40% through caching SAP proxy results and optimizing multithreaded Core Java logic, ensuring faster data retrieval and enhancing system performance for high-volume transactions.
- Led the development of batch processors for API workflows, automating account opening processes, generating Excel reports, and securely uploading data to SFTP servers to streamline operations and improve efficiency.
- Implemented end-to-end development of CPD Service, integrating four banking systems into a unified platform, enhancing communication and reducing manual dependency by 30%.
- Authored detailed workflow documentation and performed rigorous testing (JUnit, Mockito, INT, UAT), boosting code coverage by 20% and reducing team queries by 25%. Optimized code with SonarQube, lowering complexity by 35%.
- Built robust back-end solutions using Hibernate, JPA, and advanced SQL queries for CRUD operations and stored procedures. Enhanced database connectivity with JDBC and optimized data storage for scalability.
- Actively participated in Agile sprints, managing Jira tasks, and collaborating on Git and Bitbucket for version control and code reviews. Tested APIs with POSTMAN and SOAP, resolving production issues to improve system stability by 15%.

Software Engineer Intern, Tata Consultancy Services Ltd

03/2021 - 05/2021 | Bangalore, India

- Engineered, validated, and optimized RESTful APIs by implementing XML-based SOAP testing, ensuring high code reliability, maintainability, and reusability for enhanced software functionality and system performance.
- Acquired expertise in software engineering principles, emphasizing robust API design, testing frameworks, and lifecycle management, enabling efficient development processes and seamless application integration.

Node.js Developer, Rohini Tech Media Pvt Ltd

05/2020 - 03/2021 | Hyderabad, India

- Designed and deployed backend solutions by integrating MongoDB and Redis caching, optimizing data retrieval for improved application performance and scalability in a cloud-based environment.
- Implemented secure user authentication using Gmail-OAuth, enhancing system security, and automated email notifications through SendGrid, ensuring timely communication and improved user experience.
- Developed OTP verification systems using Msg91, streamlining user authentication processes and strengthening data protection measures, contributing to a robust and user-friendly web development infrastructure.

Education

Master of Science, California State University

2023 – 2024 | Long Beach, CA, USA

Computer Science

Bachelor of Technology, VNR Vignana Jyothi Institute of Engineering and Technology

2017 – 2021 | Hyderabad, India

Computer Science and Engineering
