WORK EXPERIENCE

Crispin Corporation

February 2023 – Present

Software Developer

Raleigh, NC

- Designed and developed a dynamic React/Redux web app that interfaces with a backend service via REST API to display and manage data in a SQLite database, using Vite to optimize build time.
 - Integrated web service with RESTful backend API to fetch and update data, enabling seamless, real-time interaction with business logic layer.
- Codeveloped Python-based backend service to manage end-to-end communication between frontend and another backend service via RabbitMQ, REST API, and Flask.
- Led development of a full-stack monitoring service from the ground up, developing a Python/SQLite backend and a Node.js UI with REST API integration for real-time data visualization.
 - Designed and developed database schema for SQLite database, ensuring efficient data processing and storage.
- Collaborated closely with development team in an Agile environment, participating in daily standups, sprint planning, code reviews, and task management using Jira and Confluence.
- Managed codebase using Git, merging branches, resolving conflicts, and maintaining clean commit history.
- Wrote clean, reusable code to ensure clarity, scalability, and maintainability.

Oregon State University

April 2021 – August 2021

Undergraduate Learning Assistant: Introduction to Programming II

Corvallis, OR

- Aided student learning via weekly one-on-one office hours sessions.
- Graded students' programs and provided detailed feedback and suggestions for improvement.
- Collaborated with professors and other ULAs to support students.
- Responded in detail to student questions on class discussion boards.

EDUCATION

Oregon State University

September 2022

Bachelor of Science in Computer Science

Corvallis, OR

- Honors: *magna cum laude* (GPA: 3.81)

University of Virginia

December 2016

Bachelor of Arts in Biology

Charlottesville, VA

SKILLS

- Languages:** Proficient in Python, JavaScript/TypeScript, SQL, and HTML/CSS. Some experience in C/C++.
