EDUCATION

New York University (NYU) | *M.S. in Computer Engineering* Sep 2022 - May 2024
Relevant Courses: Software Engineering, Data Structures and Algorithms, Big Data, Machine Learning, Internet Architecture and Protocol, Real Time Embedded Systems, Computing Systems Architecture, Deep Learning, Network Security.

SRM Institute of Science and Technology (SRMIST) | *B.Tech. in Computer Science & Engineering* Jun 2015 - May 2019

EXPERIENCE

Full Stack Developer | **The Athenaeum, New York City** Sep 2023 - Present

- Created a Discord server and developed a bot using **Python** and **Discord.js** to automate user onboarding and verification.
- Built web apps using **React**(frontend), **Next.js** and **MongoDB**, reducing load times by 25% with optimized rendering.
- Developed backend APIs using **Node.js** and **Express** with secure authentication and efficient error handling.
- Managed **CI/CD** pipelines with **AWS ECS**, and **Docker** for seamless deployment.
- Integrated third-party APIs and **webhooks** to enable real-time data syncing across platforms.

Cloud Services Intern | **City of New York Office of Technology and Innovation (NYC OTI)** Jun 2023 - Aug 2023

- Consolidated 15 **SharePoint** sites and integrated with **TeamsPlanner**, boosting efficiency by 30%.
- Troubleshooted, diagnosed, and resolved over 50 AWS/Azure cloud issues, significantly reducing downtime.
- Established and maintained over 40 wiki pages for the cloud team, providing essential information on cloud applications and accounts, and managed AWS account access, optimizing operations for **EC2** and **S3 buckets** using **AWS CLI** commands.

Senior Systems Engineer | **Infosys Ltd., Bangalore, India** Jan 2019 - May 2022

- Optimized Finacle's interest rate module using **Python**, **Java**, **C++** and, **SQL**, boosting accuracy and performance.
- Built a Java-based investment prediction app with 95% accuracy, supporting 500+ daily users in financial decisions.
- Reviewed code and implemented event-driven architecture with **Pub/Sub**, improving transaction processing speed by 40%.
- Resolved 3+ feature defects/day during business testing, using agile methodologies ensuring smooth deployments.
- Built scalable enterprise systems **Python**, **SQL**, **Java Spring**, **Hibernate**, and **AngularJS**.
- Automated recurring manual tasks with **shell scripts** and SQL procedures, reducing operational overhead.

PROJECTS

Clothing Swap Platform , Personal Project Oct 2024 - Present

- Built a full-stack clothing exchange app using **Next.js**, **React**, and **Tailwind CSS** with custom 5-image uploads per listing.
- Implemented dynamic listing forms with real-time validation and error feedback.
- Integrated responsive UI, iconography (**React Icons**), and seamless routing for smooth user experience.
- Designed backend APIs (**Next.js API Routes**) with **MongoDB** for listing and user data management.

Climate Pulse, New York University Jan 2023 - May 2023

- Scraped 10,000+ Reddit posts and 100,000 comments on climate change using **PRAW**.
- Built a big data pipeline integrating **Reddit API**, **MongoDB**, **Spark**, and **BigQuery**.
- Performed sentiment analysis with **Spark ML** and a fine-tuned **BERT** model (90% accuracy).

"Just Breathe" Health tech device, New York University Aug 2022 - Dec 2022

- Developed a \$50 embedded system with an **STM32F429** microcontroller for SIDS prevention.
- Analyzed sensor data using **Python** libraries: **NumPy**, **Pandas**, and **Matplotlib**.
- Implemented real-time audio-visual alerts using **Pygame**.

Smart Home System, SRM Institute of Science and Technology Jan 2019 - May 2019

- Built an **IoT**-based smart home system with voice-enabled lighting, temperature, and intruder detection.
- Integrated **DHT11**, **LDR module**, and **PIR motion sensor**.
- Developed **Python**-based Android notifications for rain detection using **Raspberry Pi** (96% accuracy).

SKILLS

Languages / Frameworks / Tools: Java, Spring Boot, Hibernate, React, Next.js, nodeJS, Python, Javascript, Typescript, Express.js, JUnit, Jira, Jest, Kubernetes, Figma, Jenkins, Kafka, Postman, Nexus, SQL, NoSQL, Swift, Redux, Excel, Tableau, Pytorch, Tensorflow, Mongo DB, PostgreSQL, Prisma, C++, C, C#, PHP, HTML, CSS, Github, AWS CLI, GCP, Dataproc, Docker.

TECHNICAL CERTIFICATIONS:

- Meta AR Developer Professional Certificate (*Coursera-ongoing*)
- The Odin Project- Web Development Fundamentals(*ongoing*)
- Foundations of AR (*Meta, Coursera-Aug 2023*)
- Intro to Augmented Reality and ARCore (*Coursera-Oct 2021*)
- Deep Learning Specialization (*Coursera-Sep 2021*)
- Intro to Machine Learning (*Kaggle-Apr 2021*)
- Python Programming (*Kaggle-Apr 2021*)
- MongoDB Basics (*mongoDB University-Jan 2020*)
- Data Science: R Basics (*edX-Oct 2017*)
- Introduction to Modern Application Development (*NPTEL-Sep 2017*)
