PROFESSIONAL SUMMARY

Software developer with 2+ years of experience delivering scalable, high-availability applications using Java, JavaScript, React, Flutter, and RESTful APIs. Proven expertise in re-architecting systems for performance and resiliency, implementing event-driven architecture, and collaborating across cross-functional teams. Experience spans healthcare, fintech, and enterprise platforms with a strong background in CI/CD and Agile delivery.

PROFESSIONAL EXPERIENCE

Software Development Engineer | Vyva Consulting Inc | Remote | Aug 2023 – Present

- Built **FastAPI microservices** integrated with Salesforce, automating \$50M+ incentive tracking and eliminating 95% of manual workflows.
- Developed **React-based dashboards** connected to real-time SQL Server data, improving KPI visibility by 30% for leadership.
- Optimized **Spark SQL** pipelines processing 1M+ daily records, reducing runtime by 40% through partition tuning and query optimization.
- Designed **REST APIs** for anomaly detection using Python & GCP, preventing \$250K+ quarterly revenue leakage.
- Delivered CI/CD pipelines with GitHub Actions + Docker, ensuring **99.9% uptime** for production deployments.
- Partnered with BI and product teams to accelerate feature delivery by 20%.

Data Engineering Intern | BNP Paribas CIB | Chennai, India | Feb 2023 – Jul 2023

- Developed **Python (Pandas) ETL scripts** to clean and process TB-scale datasets for risk analytics.
 - Automated manual Excel-based processes, reducing reporting time from 8 hrs to 45 mins.
 - Created **Azure SQL + Power BI dashboards** for real-time trading analytics.
 - Built **time-series forecasting** models in Python, improving prediction accuracy by 12%.
 - Contributed to **fraud detection** ML models (XGBoost) achieving **85% precision**.
-

PROJECTS

SIMS – Surgical Inventory Management System | React, Firebase, Tailwind CSS

- Built a **role-based healthcare inventory platform** with real-time user activity logging and 7-day retention.
- Designed **Admin Request System** for bug reports, feature requests, and high-priority workflow tracking.
- Implemented inventory CRUD operations, low-stock alerts, supplier tracking, and expiry monitoring.
- Created **interactive analytics dashboards** using Recharts, reducing decision-making time by 40%.
- Integrated Firebase Authentication, Firestore, and security rules for secure access control.

Gut Guru – AI-powered Gut Health Tracking App | Flutter, Firebase, Python, GCP

- Designed and developed a **cross-platform (iOS/Android/Web)** AI health app integrating smartwatch data for gut health analytics.
 - Architected **multi-phase product roadmap** including AI gastroenterologist chatbot, symptom tracking, stress-to-symptom correlation, and personalized health recommendations.
 - Implemented **Firebase cloud storage & Firestore** for logs, reports, and user history, enabling long-term trend analytics.
 - Integrated **ML models** for symptom prediction and personalized task generation, improving user adherence by 35%.
 - Designed futuristic **dark-themed UI** optimized for Android with real-time health insights and interactive analytics.
-

SKILLS

- Languages:** Java, JavaScript, Python, SQL, Dart
 - Frontend:** React 18, Flutter, Tailwind CSS, Recharts
 - Backend:** FastAPI, RESTful APIs, Node.js (familiar)
 - Data & Cloud:** Spark, Databricks, Azure, GCP, Firebase
 - Databases:** PostgreSQL, Oracle, Azure SQL, Firestore
 - DevOps:** GitHub Actions, Docker, CI/CD, Airflow (familiar)
 - Other:** Event-driven architecture, Data Modeling, AI/ML integration, Agile delivery
-

CERTIFICATIONS

- Fabric Data Engineer Associate certification (2025)
 - Salesforce Certified AI Associate (2025)
-

EDUCATION

Master's in Data Science and Applications | University at Buffalo | New York | USA
