SUMMARY

Data Science professional with a graduate degree and 5 years of experience in analyzing large datasets and creating high-impact Machine Learning models to provide valuable business insights and address complex scalability challenges in various industries. Expert in leveraging Python, R, and SQL to collect, evaluate, and interpret data in supporting informed decision-making.

TECHNICAL SKILLS

Programming	:	Python, R (dplyr, ggplot2, Factor, Forecast, Caret), SQL, NoSQL, PySpark, Bash, API Development
Analytics Tool	:	Sklearn, NLTK, Pandas, NumPy, Gensim, TensorFlow, Pytorch, Keras
Core Competencies	:	Statistics, Data Analysis, Feature Extraction, Predictive Analytics, Machine Learning, Classification (Logistic Regression, SVM, Decision Tree, Random Forest, XGBoost, LightGBM, Adaboost, Deep Learning), Regression, Clustering, NLP (Open NLP, Gensim, Spacy, LDA, Topic Modeling), Time Series forecasting, A/B Testing, LLMs (BERT), Hugging face, Finetuning LLMs (PEFT, LORA, RLHF)
Environments	:	Anaconda, Jupyter Notebook, RStudio, MATLAB, GIT - Version Control, UNIX
Visualization	:	Matplotlib, Seaborn, Tableau, Power BI (DAX, Power Query), Advanced Excel
Cloud Technology:	:	AWS (EC2, RedShift, S3, boto3), GCP, Azure Databricks, JD Edwards

EXPERIENCE

Motrex LLC

Alpharetta, GA

Data Analyst Procurement

September 2023 – Present

- Engineered a content creation bot with GEN AI – CHAT GPT 4 LLM by harnessing You tube data, transcript API and hugging face summarizer model on trending news to scrape transcripts and summarize text leading to 15% efficiency in content production
- Constructed prompts and queried AI opinion on summary using Open AI's Chat GPT API Key while also automated daily content generation and publication on medium blog yielding 50% consistency in blog traffic over 6 months
- Generated precise estimate pricings for Trays and Racks through Predictive Modelling with Regression and Random Forest model on historical data from April 2020 to March 2024. Attained an MAPE of 20% while identifying key cost drivers to team
- Revamped Tableau dashboards and automated excel report entries highlighting insights and saving 2 hours of manual work

Med kick

Tampa, FL

Data Analyst Intern

May 2023 – August 2023

- Initiated leveraging AWS (EC2, S3) to securely store and integrate data to interactive dashboards in Power BI, culminating in a remarkable 30% surge in overall productivity and performance for organization
- Employed robust web scraping techniques to extract data from client's website and enhanced data availability by 50%

South Star Energy Services

Atlanta, GA

Data Analyst Intern

August 2022 – April 2023

- Executed a robust time series forecasting initiative for a Southern gas company's call center, leveraging ARIMA and other statistical models with extensive IVR and call data spanning from Jan 2019 to Jul 2023, with the objective of optimizing staffing levels for efficient call handling, minimizing agent idle time, and ensuring accurate predictions for next month.
- Commenced BERT LLM usage by generating rich contextual embeddings for feature extraction, classification of review data and upgraded model performance to 70%
- Operated XGBoost to classify and anticipate the probability of credit card customers defaulting on payments by extrapolating credit payment history and achieved a log loss of less than 0.45.

Way cool Foods and Products Pvt. Ltd

Chennai, India

Data Analyst

July 2020 – July 2022

- Developed and Deployed TensorFlow classifiers, object detection models into Linux based virtual machines to predict product quality and modulated model's architecture to fit constraints and improved quality by 70%
- Established APIs and Cron jobs for data migration to deployment, cutting workload by 50%, budget by 35% and directed a team of 10 interns for data wrangling over 100k image dataset of grains for R&D of ML models
- Demonstrated proficiency in utilizing the Spark GC platform to process a massive review dataset of 2,595,000 rows and conducted sentiment analysis with PySpark based on ratings and tokens
- Conducted extensive exploratory data analysis (EDA) to identify crucial hierarchical features for forecast target attributes and applied text-blob for handling broken words and cosine similarity for expanding abbreviations in product descriptions.
- Integrated Fb Prophet model to handle sudden sales spikes during COVID, ensuring accurate forecasts. Scaled the solution for 100 retailers using pandas User-Defined Functions in Azure Databricks.

EDUCATION

Georgia State University – J. Mack Robinson College of Business

Atlanta, GA

Master of Science in Data Science & Analytics (GPA 4.0)

December 2023

Indian Institute of Technology Tirupati

Andhra Pradesh, India

Bachelor of Technology in Electrical Engineering (GPA 3.8)

June 2020

CERTIFICATIONS

Generative AI with Large Language Models – DeepLearning.AI

November 2023
