Mob:: +1 (201) 492-7869

Professional Summary:

- Having Around 5 Years of Software developer specializing in J2EE, Java Web Application, XML and Web Services (RESTFULL and SOAP) application development. Complete multi-tiered application development lifecycle experience using J2EE standards.
- Expertise in developing web applications using Web2.0, MVC, Struts, Tiles, Servlets, JSP, JMS, XML, JavaScript, AJAX, Spring, Spring Boot, Hibernate and HTML, IVY.
- Extensive experience in developing various web based applications using **Hibernate 5.0** and **Spring 5.0 frameworks**
- Familiar with Application servers and web servers like BEA Web Logic, IBM Web Sphere and Apache Tomcat.
- Experience in developing J2EE web applications using Object Relational Mapping (ORM) frameworks including Hibernate 5.0.
- Experience in developing web services using SOAP and Restful web services.
- Expertise in object oriented JavaScript including Various Plug-Ins like Angular.JS and EXT.JS.
- Proficient in programming by using the IDE's such as Eclipse 3.2, My Eclipse 6.0, WSAD, RAD 6.1, 7.5.5 and 8.0.
- Managing Amazon Web Services (AWS) infrastructure with automation and configuration management tools such as Ansible, or custom-built.
- Experience using ANT, Junit and Log4j (open source framework).
- Good experience with version controls such as CVS (Code Version System), PVCS, SVN, VSS (Visual Source Safe) and Clear Case.
- Wrote extensive HQL (Hibernate Query Language) queries.
- Implemented Presentation layer using CSS Framework, Backbone Js, Angular Js, Knockout Js, Wire-framing, HTML5.
- Knowledge of emerging technologies such as AJAX and JSF.
- Extensive experience with Tomcat 5.5, Web Logic 8.1, 9.2, 10x, Web Sphere 5.1, 6.1, 7.0 and JBoss4.0 application servers.
- Well versed in using Software development methodologies like Rational Unified Process (RUP), Rapid Application Development (RAD), Agile Methodology and Scrum software development processes.
- Excellent experienced in RDBMS Design and databases like Oracle, MySQL, and SQL Server, MongoDB and Stored Procedures.
- Expertise with Build tools like Maven, Ant and continuous integration with Jenkins.
- Development experience database processes in writing SQL queries DB2, Oracle and PL/SQL programming, stored procedures, JSP, relational databases.
- Experience in developing Service Oriented Architecture using Web Services (SOAP, WSDL) and JMS.
- Quality Control Experience handling the quality check of the deliverables produced by my team.
- Knowledge and very good experience in all the phases of System Development Life Cycle (SDLC).
- Strong problem solving skills with an aptitude for learning and implementing emerging technologies.
- Excellent interpersonal, oral and written communication skills.
- Leadership ability to enforce good coding standards.

Technical Skills:

Programming Languages	Java 11, SQL
Java/J2EE Skills	JSP, Servlets, EJB, JDBC, JSP Taglibs, JavaBeans, RMI, JNDI, JMS, Struts, MVC, DAO, Tiles, XML, XSLT, SAX, DOM, UML, JUnit, ORM (Hibernate), CVS, Springs, scriptaculos, Schema Tron, Wire mock, Spring Boot, Spring Data, Spring Security, Micro services.
Web Services	XML, SOAP, UDDI, WSDL, RESTFULL, RMI and spring
IDE	Eclipse, IntelliJ, Visual studio code
Web/Application Servers	WebSphere 6.1/7.0, JBoss, Tomcat 7.0, Sun Java System Application Server (Sun ONE Application Server), Weblogic 8.1
Databases & Query	SQL Server 2008/2012, Oracle 10g/11g/19c, Sybase 12.5 and Sybase 15,

Mob:: +1 (201) 492-7869

Languages	MySQL, DB2
Web Designing	HTML, DHTML, CSS, JavaScript, Ajax
Operating Systems	Windows XP, Unix, Linux, Solaris, AIX 5.3
Versioning	CVS, VSS, Git Hub, Bit bucket

Professional Experience:

HomeStreet Bank, Seattle, WA

Sept 2024 – Till Date

Senior Java Consultant

- Design and Develop role based web application that provides the Production Services Branch (PSB) users a tool to ingest patent data coming from various source systems, maintain, and retrieve patent text, image and metadata for the US and Foreign data collections.
- Developed multiple key elements of the data ingestion effort, such as the multi-threaded ingestion using Java thread Cassandra.
- Developed an image retrieval service, using Spring RESTful, Cassandra.
- Developed MVC design pattern based User Interface using ExtJs, XML, HTML and Struts.
- Responsible for design and implementation of the family of web applications and web services that make up the product line. Includes multiple GUI web applications as well as a RESTful web service API that publicly exposes the underlying operations.
- Deployed the application on AWS (Amazon Web Services) for scalable solutions.
- Used Frameworks such as JQuery and ExtJS UI for UI development.
- Expert level experience with Web based Application design & development using Java/ J2EE Technologies like JSP, JSF, JQuery, JavaScript, HTML5, CSS, XML and JMS.
- Experienced with Core Java concepts such as Serialization, IO, Multithreading, Collections, Concurrency and Exception Handling.
- Created iterative mockups, prototypes and production-ready XHTML/HTML5, CSS/CSS3.
- Created advance SQL scripts in PL/SQL Developer to facilitate the data in/out flow in Oracle.
- Developing exceptional web UI in Angular JS & Developed facilities for stripping long error messages from minified JavaScript code for Angular JS. Implemented a custom Closure Compiler runner to accomplish error stripping and published as angular/ng-closure-runner.
- Performed configuration, deployment and support of cloud services including Amazon Web Services (AWS)
- Rewrote internal error throwing API to allow long strippable error messages. Implemented error browser in docs.angularjs.org to help developers get information on errors occurring in minified builds.
- Data Binding using jquery and javascript templating with handlebars js.
- Implemented the Web layer using Spring Boot and Inversion of Control throughout the application in all the layers for bean wiring.
- Worked on build tools ANT, MAVEN Jenkins & Nexus.
- Used Spring Core, JBPM & multi-threading as part of enhancing Bundler process with in Content Management System.
- Designed, developed and maintained the data layer using Hibernate and performed configuration of EJB.
- Designed new applications/flows in JAVA SPRING framework.
- Experience on generating XML/XSD to send the request to the Messaging server.
- Experience on working with XSD, XML Schemas.
- Experience working in AGILE development environment.
- Used log4j to log the error messages to the log files.
- Highly skilled in using Version Control Management tools like SVN, CVS, and GIT.
- Used Oracle Web logic server to run the application.

Name :: Sateesh

Email :: boggavarapu.sateesh99@gmail.com

Mob:: +1 (201) 492-7869

- Creating build scripts using ANT and used Jenkins for continuous build and deploys application in Dev and Test environment.
- Implemented Jenkins for continuous integration to maintain the code quality.
- Interacting with the Quality team about the issues, bugs found and fixing them in the testing phase of the application.

Environment: Java 11, Angular 14, Hibernate 5, Prime faces 4, JQuery, Docker, Express JS, HTML5, CSS3, Spring boot, JBoss, Oracle Web logic Server, Ext JS, Git, SOAP/ Restful Web services, RDBMS, Jenkins, Oracle 19c, Web services (SOAP), JMS.

Elevations Credit Union, Boulder, CO

Sept 2023 – Aug 2024

Java/J2EE Developer

Responsibilities:

- Involved in Analysis, Design, Development, Integration and Testing of application modules.
- Followed agile methodology for development process.
- Worked closely with Business analyst to understand the current process.
- High level and low level designing using best practices and techniques of J2EE.
- Developed Activity diagram, Sequence diagrams and Use case diagrams.
- Designed web pages using JSP, Struts, XSL, HTML, DHTML, AJAX and client side validation with JavaScript.
- Integrate the ExtJs/Sencha framework with Oracle BPM.
- Developed Session and Entity beans for encoding the business logic and handling different transactions.
- Worked on AWS, High Availability Practices and deploying backup/restore infrastructure.
- Worked on Node JS as part of the serverless architecture assignment with AWS functions development for get Customers as part of the mobile project development.
- Microservices development using Node JS with Amazon AWS Dynamo DB NoSQL database.
- Extensively worked on spring framework for developing the control logic and interacts with Domain.
- Involved in developing the front end applications using web technologies like HTML and CSS.
- Built Web pages that are more user-interactive using AJAX, JavaScript, and JQuery.
- Experienced with Java Multithreaded programming to develop multithreaded modules and applications.
- Involved in write application level code to interact with APIs, Web Services using AJAX, JSON and XML.
- Designed and developed intranet web applications using JSP, JavaScript and CSS.
- Interacted with java controllers (Ajax, and JSON to write/read data from back end systems) using RESTful Services.
- Define technical requirements based upon business requirements.
- Utilized various JavaScript and JQuery libraries, AJAX for form validation and other interactive features.

Environment: Soap UI, Springintergration, XSLT, XML, Java/J2ee, JSP, Struts 1.1, Spring 4.0, Hibernate, Eclipse 3.2, EJB 2.0, Web sphere Server 6.x, Ext JS, Restful Web Services, AJAX, CSS, SDLC, JavaScript, JSON, XML, JSTL, JavaScript, Log4, Maven.

Aon Hewitt, Bangalore India

June 2022 – August 2023

Java/J2EE Developer

Responsibilities:

Name :: Sateesh

Mob:: +1 (201) 492-7869

- Involved in Analysis, Design, Development, Integration and Testing of application modules.
- Worked closely with Business analyst to understand the current process.
- High level and low level designing using best practices and techniques of J2EE.
- Developed Activity diagram, Sequence diagrams and Use case diagrams.
- Designed web pages using JSP, Struts, XSL, HTML, DHTML, AJAX and client side validation with JavaScript
- Developed Session and Entity beans for encoding the business logic and handling different transactions.
- Extensively worked on spring framework for developing the control logic and interacts with Domain.
- Involved in various components in the application framework using design patterns like Session Façade, Value Object, Service Locator, Singleton and Transfer Object.
- Extensively used Hibernate ORM in data access layer to write DAOs. Developed hibernate mapping and Configuration files.
- Worked on DAO and CBO layer in Hibernate.
- Involved in Connection RDBMS from Servlets.
- Worked on JUnit test cases.
- Involved in Integration Testing.
- Attending functional problems and giving the clarification or solution to the Team members, defining workflows, business process and the database updates as per the requirements.
- Good experience to write the build script-using Ant for deploys and backup.
- Design and implementation of tables, stored procedures, views, SQL statements for database operations.
- Written Shell script in UNIX for production Environment for Deployment and Scheduling Tasks in UNIX.

Environment: Java/J2ee, JSP, Struts 1.1, Spring 2.0, Hibernate, Action Script 2.0,Eclipse3.2, EJB 2.0, Web sphere Server6.x, Restful Web Services ,AJAX, SQL, CSS, SDLC, JavaScript, JSON, XML, ANT, JSTL, pl/sql,JavaScript, JUnit, Unix, Log4,Maven.

CMC Limited, India
Java/J2EE Developer

January 2021 – May 2022

Responsibilities:

- Involved in all phases of the project, Requirement Analysis, Design, Coding,and Unit testing.
- Designed and developed the application using Agile methodology.
- Used Object Oriented Analysis (**OOA**) and Object-Oriented Design (**OOD**) techniques using Unified Modeling Language (**UML**) and Rational Rose.
- Developed the Application using Spring **MVC** Framework by implementing Controller, Service classes.
- Responsible to enhance the UI using **HTML**, JavaScript, **XML**, **JSP**, **JSP** Tag libraries, Spring Tag libraries, **CSS** as per the requirements and providing the client side using JQuery validations.
- Performed data manipulation on the front-end using JavaScript and **JSON**.
- Used **AJAX** framework for server communication and seamless user experience.
- Developed Server-side components and published Services (local, remote and web using **EJB**, **MDB**, Web Services) under the Service Oriented Architecture principals.
- Involved in writing Spring Configuration **XML** file that contains declarations and other dependent objects declaration.
- Explored Spring **MVC**, Spring **IOC**, Spring **AOP** and Hibernate in creating the POC.
- Used Hibernate for persistence framework, involved in creating DAO's and used Hibernate for **ORM** mapping.
- Developed Web services component using **XML**, **WSDL**, and **SOAP** with **DOM** parser to transfer and transform data between applications.
- Implemented **SOAP** to develop **REST**-Based Web services
- Used Soap UI for testing the Web services.

Name :: Sateesh

Mob:: +1 (201) 492-7869

- Use of **MAVEN** for dependency management and structure of the project.
- Used **GIT** for version control and Log4j for application logging and debugging
- Involved in fixing bugs and unit testing with test cases using JUnit framework.
- Performed functional and integration testing, extensively involved in release/deployment related critical activities. Configured Java Messaging Services (**JMS**) on WebLogic Server using Eclipse **IDE**.

Environment: JDK 1.6, EJB2.0, JSP, JDBC, JNDI, WSDL, SOAP, WebLogic 6.1, RAD, Eclipse, XSLT, CSS, JavaScript, HTML, XML, SQL, PL/SQL, Oracle10g, Toad, ANT, Clear Case, Linux.
