

Sai Satish Chandhra Piske

Business Data Analyst

TX, USA | +1(940) 337-5958 | sathishchandhrapiskesai@gmail.com | [LinkedIn](#)

SUMMARY

Business Data Analyst with 4+ years of experience delivering data-driven insights, business process improvements, and reporting solutions across financial services, consulting, and technology industries. Strong background in business analysis, requirements gathering, and stakeholder communication, bridging the gap between business needs and technical solutions. Proficient in SQL, Power BI, Tableau, Python, and Excel for advanced analytics, predictive modeling, and KPI tracking. Collaborates with product managers, developers, and business leaders to optimize workflows, automate reporting, and improve decision-making efficiency. Recognized for improving reporting efficiency, automating manual processes, and enabling cross-functional teams with actionable insights.

SKILLS

Programming & Scripting: Python (Pandas, NumPy, Scikit-learn, Matplotlib), R, SQL (MySQL, PostgreSQL, Snowflake, Redshift)

Visualization & BI: Power BI, Tableau, Looker, Domo (dashboards, drill-downs, DAX, automation)

Data Platforms/Analytics: Salesforce Data Management, SAP BW/BO, Data Profiling, Data Transformation, KPI Tracking, Forecasting

Finance & Ops Analytics: P&L Analysis, Variance Analysis, Financial Modeling, Workforce Planning

Cloud Platforms & Big Data: AWS (S3, Glue, Athena, Redshift), GCP (BigQuery, Dataflow), Azure Data Factory, Hadoop, Spark, Hive

Project & Process Management: Business Analysis, Requirement Gathering, Agile, Scrum, Workflow Optimization

Collaboration: Stakeholder Management, Documentation, Data Governance, Training & Mentorship

Tools & Documentation: MS Office Suite, Google Workspace, Lucidchart, Visio, Business Process Modeling (BPMN), BRD/FRD

EXPERIENCE

Business Data Analyst, Northern Trust, USA

Nov 2024 – Present

- Gather requirements from stakeholders and leverage **stakeholder communication** to design and implement interactive dashboards in **Power BI**, improving data governance and reducing reporting turnaround time by 35%.
- Automated monthly financial and operational reporting using **SQL** and **Python**, including data mapping processes and other systems, saving 20+ hours per week in manual effort.
- Partnered with **Finance** and **Operations** to build forecasting models for workforce planning, improving labor cost accuracy by 15% while ensuring compliance with data governance standards.
- Conducted predictive analytics to identify client service risks, integrating insights from **SAP** and other enterprise data systems, reducing **SLA** breaches by 12%.
- Collaborated cross-functionally with managers, developers, and business leaders to ensure analytics aligned with business goals.

Data Analyst, Hexaware Technologies, India

Sep 2021 – Dec 2022

- Led the development and enhancement of the **HexaRisk™** Dashboard by gathering business requirements, cleaning raw financial data, and designing intuitive visuals to provide real-time portfolio risk insights using Python, SQL, and Power BI.
- Delivered integrated insights by merging **HexaRisk™** and **HexaSpend™** analytics into unified dashboards, allowing leadership teams to monitor both investment risk and corporate spending trends within a centralized reporting framework.
- Developed **SQL queries and ETL pipelines** for consolidating multi-source data, improving data accuracy and consistency across platforms.
- Designed **Tableau dashboards** for client reporting, enabling executives to monitor KPIs in real-time.
- Partnered with clients to **document business rules, KPIs, and reporting requirements**, ensuring solutions met operational needs.
- Conducted **root cause analysis** on discrepancies across finance and HR datasets, improving data quality and trustworthiness.
- Contributed to automation initiatives by building Python scripts for **data cleansing and normalization**.

Business Analyst, Kellton, India

Jul 2019 – Aug 2021

- Directed the implementation of **FinTrust™** DLOS by gathering business requirements, mapping loan workflows, and designing automated approval processes using **JIRA**, **Visio**, and **SQL**, enabling seamless integration of credit scoring APIs.
- Led **requirements gathering sessions** with stakeholders, translating business needs into functional specifications for analytics and reporting solutions.
- Streamlined reporting workflows by implementing **standardized reporting templates**, reducing cycle time to insights by **20%**.
- Worked closely with IT teams to validate **data mapping (source-to-target)** for Salesforce and SAP integration projects.
- Assisted in implementing **Agile practices**, including backlog grooming, sprint planning, and user story documentation.
- Designed dashboards to visualize portfolio performance, diversification ratios, and risk metrics within the **InvestSmart™** Analytics Suite, empowering financial stakeholders to make informed investment decisions with improved accuracy.
- Enhanced stakeholder collaboration by facilitating requirement workshops, managing **UAT** sessions, and documenting workflows using Confluence, which streamlined feature delivery and reduced implementation issues by over 70%.

EDUCATION

Master's in Business Analytics, Midwestern State University, TX, USA

Dec 2024

PROJECTS

Bursttrack FY17 Performance Analysis and Strategy Optimization

- Conducted comprehensive market analysis and optimized global investment strategies by evaluating regional Sharpe Ratios and implementing strategic pricing adjustments, resulting in stabilized market share, aligned advertising strategies, and improved decision-making for enhanced return efficiency.

Retail Sales Data Analysis and Inventory Forecasting (Python Automation Project)

- Analyzed daily sales data for 4,000+ retail products and forecasted inventory needs using Python, automating reporting and visualization while creating stakeholder-friendly documentation for strategic planning.
