Summary

Front-end engineer working at Sports Excitement, specializing in responsive and accessible user interfaces using React, Next.js, and TypeScript. Proven ability to integrate REST APIs and collaborate effectively with design and backend teams. Experienced in utilizing GitHub and Agile methodologies to enhance project delivery and ensure high-quality outcomes through rigorous testing practices.

Skills

- Python, Java, C#, C++, SQL, MongoDB, Perl, XML
- HTML5, CSS3, JSON, JavaScript
- React, Next, Angular, Django
- GitHub, Jira, Trello, Microsoft Office Suite, Agile, Scrum, unit testing, object-oriented programming

Professional Experience

Full Stack Developer, 03/2025 — Current

Sports Excitement — Queens, New York

- Collaborated with cross-functional teams, including designers, product managers, and backend developers, to define and implement new user-facing features in a dynamic sports web platform.
- Developed and maintained responsive UI components using Next.js, HTML5, Tailwind CSS, and TypeScript, ensuring consistency across browsers and devices.
- Integrated Cloudflare APIs via Python scripts for optimizing CDN performance and enhancing application security. I wrote unit and integration tests using pytest to ensure data consistency across components, and reduce regression bugs.
- Managed Agile sprints in Taiga, and used GitHub for version control and collaboration.

Software Developer, 05/2022 — 06/2023

Expanion — Chennai, Tamil Nadu

- Contributed to the development of a fully functional and visually engaging learning platform webpage using React.
- Collaborated with team members to ensure seamless integration of frontend components with backend services, enhancing the overall user experience. Created REST APIs for user management, content delivery, quiz evaluation, and progress tracking, with PostgreSQL as the backend.
- I wrote unit and integration tests using pytest and coverage.py to ensure code quality and 90%+ test coverage. Utilized GitHub for version control and collaboration, maintaining clean and organized codebases, with regular commits and pull requests. Worked on multi-tier enterprise software solutions, integrating UI, APIs, and database layers.

Education

05/2025 Clark University — Worcester, MA

Master of Science Computer Science

05/2023 Anna University — Chennai, IN

Bachelor of Science Computer Science

Academic Project

Capstone. 08/2024 – 12/2024

Clark University, Worcester, MA

- Developed a scalable logistics application for Sun Roadways using Angular.js, TypeScript, Python, and MySQL to streamline cargo booking, delivery tracking, and logistics operations. Enabled features such as partial/blind manifest handling, inbound/outbound delivery management, and shipment scheduling. Integrated line trip sheet management to optimize truck utilization and route efficiency.
