

Satvik Singh

823 Lakehaven drive, Sunnyvale, California, 94089 | (716) 331-1378 | jaisatvik@gmail.com | www.linkedin.com/in/satvik-singh-a7b85359 | <https://github.com/S-atvikSingh>

Profile

A Software Engineer with over three years of professional experience in building and automating enterprise-grade solutions. My early work in Robotic Process Automation (RPA), ignited a deep interest in intelligent automation. This curiosity naturally evolved into a passion for Artificial Intelligence and Machine Learning, driving me to pursue a Master's degree in AI/ML. I am skilled in building full-stack AI applications and scalable solutions using Python, React, FastAPI, containerization, and cloud technologies. I am passionate about leveraging applied machine learning and scalable AI solutions to solve complex problems.

Experience

SOFTWARE ENGINEER | MOTHERSONSUMI INFOTECH & DESIGN (MIND) | (August 2020 – December 2023)

- Spearheaded automation projects integrating OEM websites with dealership systems (Toyota, Renault, etc.) using iMacros & UiPath RPA solutions, drastically reducing manual workload and improving data consistency.
- Supported automation integration with Salesforce, Java codebase and SQL Databases.
- Conducted feature design, testing, and support for in-house survey tool and reduced incoming tickets by 45%.
- Conducted feasibility testing using Corda-based blockchain to secure client financial data.
- Consistently rated 'Outstanding' in annual performance reviews.

Projects

AI-Powered Personalized Knowledge Assistant (July 2025-Aug 2025)

- Developed a full-stack AI knowledge assistant enabling semantic Q&A over user-uploaded documents, improving document accessibility and reducing search time.
- Implemented React + FastAPI frontend/backend, OpenAI GPT for intelligent Q&A, and Pinecone for vector search.
- Delivered context-aware responses using LangChain memory.
- Skills: Python, FastAPI, React, JavaScript, OpenAI API, Pinecone, LangChain, Github

Cardiovascular Disease Prediction Using Demographic Factors (Jan 2024 – Apr 2024, University at Buffalo)

- Built ML pipeline predicting cardiovascular risk from demographic data (age, sex, ethnicity, location).
- Applied six algorithms, achieving 99.8% accuracy with Logistic Regression and Random Forest.
- Created Tkinter GUI for user-friendly template upload, predictions, and visual analytics.
- Skills: Python, Scikit-learn, NumPy, Pandas, Matplotlib, Tkinter

Deep Learning Sentiment Analysis (Sept 2024 – Dec 2024, University at Buffalo)

- Built LSTM and CNN models on IMDb dataset; achieved 89% accuracy with CNN.
- Skills: Python, Deep Learning, LSTM, CNN, Trello

Education

Master of Science in Computer Science (AI/ML track)

University at Buffalo (SUNY), Buffalo, New York, USA | Jan 2024 - May 2025

Bachelor of Technology in Computer Engineering

Thapar Institute of Engineering & Technology, Patiala, Punjab, India | Aug 2016 - July 2020

Skills & Abilities

Programming & Frameworks: Python, Java, JavaScript, React, FastAPI, Tkinter, HTML/CSS, Git/GitHub, CI/CD

AI/ML & Deep Learning: Scikit-learn, NumPy, Pandas, Matplotlib, Seaborn, LangChain, OpenAI API

Cloud & DevOps: AWS, Docker, Kubernetes

Databases: SQL, NoSQL, Pinecone (Vector DB)
