

SUMMARY

Java Full Stack Developer with 4+ years of experience designing and deploying cloud-native, enterprise-grade digital banking and financial applications. Skilled in Java 8–17, Spring Boot, Spring Cloud, React, Angular, and microservices, with hands-on expertise in AWS, CI/CD (continuous integration and continuous delivery), and containerized deployments. Experienced in developing RESTful microservices and GraphQL APIs, implementing OAuth2/JWT for secure payments and transactions, and optimizing performance with PostgreSQL, Redis, and Kafka. Adept in Agile/Scrum delivery, collaborating with stakeholders, mentoring junior developers, and delivering solutions that support digital transformation, regulatory compliance, and customer experience improvements.

SKILLS

- **Languages:** Java (8–17), JavaScript, TypeScript, SQL, Python (basic)
- **Frontend:** ReactJS, Angular (v14), Redux, Next.js, NgRx, HTML5, CSS3, Bootstrap
- **Backend & Frameworks:** Spring Boot, Spring MVC, Spring Cloud (Eureka, Config, Gateway), Hibernate, Microservices, RESTful APIs, GraphQL
- **Databases:** PostgreSQL, MySQL, Oracle, MongoDB (NoSQL), Redis, Elasticsearch
- **Messaging & Streaming:** Apache Kafka, RabbitMQ, JMS
- **Cloud & DevOps:** AWS (EC2, S3, RDS, Lambda, Glue, CloudFormation), Terraform, Docker, Kubernetes, Jenkins, GitHub Actions, ArgoCD, CI/CD Pipelines
- **Testing & Automation:** JUnit, Mockito, Selenium, Jest, React Testing Library, Postman, SoapUI, ReadyAPI, SonarQube
- **Other Tools & Practices:** Git, Maven, Bitbucket, JIRA, Log4j2, Agile/Scrum (Sprint Planning, Retrospectives, Daily Stand-ups)

EDUCATION

- Master's in Computer Science, Texas Tech University, Lubbock, TX

EXPERIENCE

Ally Financial

Jul 2024 – Current

Java Full Stack Developer

- Designed and implemented cloud-native microservices using Java 17, Spring Boot, and Spring Cloud with Eureka and API Gateway.
- Developed customer-facing loan servicing features with Angular 14 and React, reducing onboarding time and improving digital adoption rates by 20%.
- Built RESTful microservices and GraphQL APIs to integrate multiple financial services, enhancing interoperability across enterprise banking platforms.
- Implemented Spring Security with OAuth2 and JWT for secure, role-based access and regulatory compliance in payment workflows.
- Leveraged Kafka and JMS for event-driven architecture, reducing transaction latency by 30%.
- Deployed applications on AWS (EC2, RDS, S3, Lambda, Glue) using Terraform IaC for automated environment provisioning.
- Automated CI/CD pipelines with Jenkins and GitHub Actions, using Docker and Kubernetes for reliable deployments.
- Partnered with stakeholders, business analysts, and QA teams in Agile sprints, ensuring timely feature delivery aligned with compliance and business goals.

Kotak Mahindra Bank

Sep 2020 - Jul 2023

Java Full Stack Developer

- Developed digital banking portals for customer onboarding and loan management using Spring Boot, ReactJS, and PostgreSQL, reducing processing time by 25%.
- Built REST APIs and introduced GraphQL queries to optimize retrieval of financial data across distributed systems.
- Integrated Kafka for real-time event streaming and Redis caching to scale high-volume payments and account management modules.
- Enhanced system security with Spring Security + OAuth2, ensuring secure authentication for sensitive financial APIs.
- Conducted unit, integration, and regression testing with JUnit, Mockito, Selenium, and Postman, cutting production issues by 40%.
- Used AWS CloudWatch and Log4j2 to monitor applications, ensuring high availability and compliance in financial transactions.
- Actively participated in Agile ceremonies (sprint planning, retrospectives, daily stand-ups) and mentored junior engineers on coding best practices.
