PROFILE

Full Stack Developer with 1+ year of professional experience, skilled in both front-end and back-end development. Proficient in building and maintaining scalable web applications, implementing robust solutions using object-oriented programming (OOP), and collaborating effectively with teams to troubleshoot and optimize software systems. Experienced with modern frameworks, cloud services, and end-to-end application development.

EXPERIENCE

Paysfer e-Mart (Remote – USA) - Full Stack Developer

Aug 2025 – Present

- Developing and maintaining core features for the e-commerce platform across front-end and back-end using ReactJS, NodeJS, and MongoDB.
- Implemented secure file upload and storage using Google Cloud Storage, and managed data persistence via Firestore and API Gateway.
- Enhanced UI responsiveness and accessibility, improving user engagement and mobile usability.
- Contributed to business logic in order processing, inventory management, and customer interaction workflows.

Sopra Steria India – Software Engineer

Aug 2022 – Aug 2023

- Managed critical components of the Market Data Processing Project for stock transactions, ensuring seamless operations.
- Enhanced the Market Data Processing Project by solving technical challenges and optimizing user application functionality.
- Improved user experience and application performance through ongoing refinement efforts.
- Collaborated across teams to gather requirements and develop robust solutions.
- Conducted thorough code reviews to maintain high standards and an efficient, error-free codebase.

ACADEMIC PROJECTS / PERSONAL PROJECTS

Travel-Guide - Smart Travel Companion ([github.com](#))

Jan 2025 - May 2025

- Developing a cross-platform mobile application using React Native (Expo) and TypeScript, designed to enhance travel experiences through real-time location-based recommendations.
- Implementing personalized suggestions for tourist attractions, accommodations, and events based on user preferences.
- Integrating local businesses to provide exclusive offers and increase customer engagement.
- Designing a social sharing feature, enabling users to share experiences, photos, and event details.
- Incorporating a local guide booking system, allowing users to connect with verified tour guides.

Wellness Buddy ([github.com](#))

April 2024 – May 2024

- Developed "Wellness Buddy" Android app using Kotlin and Jetpack, connecting users with health conditions to certified professionals or student advisors.
- Implemented user profiles using Firebase.
- Utilized Gravatar API for avatar generation, improving user engagement.
- Planned future updates include appointment scheduling to streamline user-coach interactions and in app secured chat.

Brain Tumor Detection using Image Processing Techniques ([github.com](#))

Nov 2021 – Feb 2022

- Implemented a user-friendly application that provides a complimentary initial assessment to identify the presence of a medical condition, enhancing accessibility and user engagement.
- Engineered functionalities within the application to efficiently process MRI scans, employing advanced algorithms to detect tumors accurately, ensuring timely and precise diagnosis.

EDUCATION

Pace University New York, NY.

May 2025

Master of Science (MS) in Computer Science

GPA: 3.86/4

Relevant Coursework: Computer Systems and Concepts, Algorithms and Computing Theory, Database Management Systems

Kallam Haranadhareddy Institute of Technology (KHIT), AP, India.

April 2022

Bachelor of Technology (B. Tech) in Electronics and Communication Engineering

GPA: 3.17/4

Relevant Coursework: Data Structures, Programming.

TECHNICAL SKILLS

Programming Languages:

Python | Java | JavaScript | TypeScript

Database Management:

MySQL | PostgreSQL | MongoDB

Scripting Languages /

Markup: HTML | CSS

Tools / Software:

Git | VS Code | IntelliJ IDEA | SFTP

Frameworks / Libraries:

React JS | React Native | Node JS | Express JS | Bootstrap | Spring Boot | Spring MVC | Android Jetpack | Redux Toolkit

Cloud Platforms & Services:

Firebase | Google Cloud Platform (GCP) – Cloud Storage Buckets, Cloud Run, Cloud Functions, Cloud Jobs, Cloud Services, Automation

ADDITIONAL TRAINING & CERTIFICATIONS

- At Sopra Steria trained in JAVA programming and Frame Works.
