SUMMARY

Experienced Software Engineer with 3+ years of expertise in **Java**, cloud platforms like **AWS**, and **CI/CD** automation. Proficient in building **scalable microservices**, containerization with **Docker** and **Kubernetes**, database optimization with PostgreSQL, MongoDB, and MySQL, and debugging complex systems. Expertise in **RESTful APIs**, security with OAuth 2.0, MFA, and RBAC, and delivering high-performance applications in **Agile environments**.

WORK EXPERIENCE

Software Developer, AiBi Technologies LLC | United States Aug 2024 - Present

- Engineered **RESTful APIs** using **NodeJS**, Express, and PostgreSQL, optimizing response times by 40% and scaling capacity to 2M+ daily transactions with zero downtime for real-time data processing.
- Revamped frontend with **React**, Typescript, and Redux, implementing advanced JavaScript object model principles to enhance reactivity and state management, reducing page load time by 25% and improving SEO rankings.
- Refined **PostgreSQL** and **Redis** efficiency, enhancing query execution by 40% through indexing, caching, and database tuning, guaranteeing sub-100ms latency for 2M+ queries/day.
- Orchestrated microservices deployment on AWS ECS and Kubernetes using **Terraform**, **Helm**, and **jenkins**, shortening deployment cycles by 30% and ensuring 99.95% uptime for critical business services.
- Fortified authentication measures with **OAuth 2.0**, **MFA**, and **RBAC**, achieving **security compliance** and reinforcing access control for 100K+ users while mitigating unauthorized access incidents by 40%.

Software Developer, Walgreens | United States May 2023 - Apr 2024

- Built high-throughput microservices with Java, **Spring Boot**, and Apache Velocity, amplifying resource efficiency by 25% and enabling scalable, reactive content generation.
- Optimized real-time event processing pipelines with **Kafka** and **RabbitMQ**, increasing message throughput by 40% and sustaining fault-tolerant, low-latency distributed processing.
- Refactored Cosmos DB transactions by refining **JPA** and **Hibernate ORM** configurations, advancing query efficiency by 40% and minimizing system bugs by 30% through **Selenium** automation and **unit testing**.
- Implemented monitoring solutions with Prometheus and **Elasticsearch**, dropping query latency by 35% and speeding up incident resolution time by 40% via preemptive anomaly detection.
- Architected fault-tolerant **APIs with resilient patterns**, securing 99.9% uptime under peak load and maximizing availability for critical workflows.

Software Developer, Bank of America | Mumbai, India Sep 2020 - Apr 2022

- Developed and scaled backend services using Java, Spring Boot, and **RESTful APIs**, reducing inter-service communication latency by 30% while upholding high availability for real-time financial transactions.
- Accelerated **GraphQL**-powered applications, integrating with React.js in MVC architecture, improving **Core Web Vitals** by 30%, boosting data retrieval by 40%, and enhancing frontend responsiveness for financial dashboards.
- Designed resilient database solutions with Amazon **DynamoDB**, leveraging **partitioning**, **indexing**, and caching strategies to elevate query efficiency by 35% and ensure real-time transaction consistency.
- Implemented robust authentication measures by integrating **RBAC**, **Okta SSO**, and **JWT** authentication, lowering security vulnerabilities by 50% and enforcing secure role-based access control across financial workflows.

SKILLS

Programming Languages: C, C++, Java, J2SE, Python, JavaScript, TypeScript.

Web Technologies: Angular, Vue, Ember.js, **DOM manipulation**, Bootstrap, XML, JSON, **Glimmer**, HTML, CSS.

Databases: SQL, MySQL, PostgreSQL, Oracle DB, MongoDB, DynamoDB, Cassandra, **Redis**, Elasticsearch.

Tools: Postman, Git, Jira, VS Code, Eclipse, Bitbucket, Maven, Gradle, Django, Power Bi, Tableau, Swagger.

Cloud & DevOps: AWS, GCP, Azure, Docker, Kubernetes, Playwright, Terraform, **Jenkins**, Prometheus, SFTP.

EDUCATION

Syracuse University | New York, United States

Aug 2022 - May 2024

Master of Science in Cyber Security
