EDUCATION

ILLINOIS INSTITUTE OF TECHNOLOGY

Master of Computer Science

Chicago, IL

August 2024 - April 2026

Courses: Design and Analysis of Algorithm, Data Mining, Computer Networks 1: Fundamentals, Machine Learning, Data Preparation and Analysis, Digital Healthcare Informatics and AI, Advanced Database Organization, Mobile Application Development, Big Data Technologies

TECHNICAL SKILLS

Languages: C++, Java, Python, SQL, JavaScript, Dart, HTML/CSS, R

Frameworks: React.js, Node.js, Express.js, Flutter, PyTorch, Keras, TensorFlow, Docker, OAuth 2.0

Tools: Visual Studio Code, MongoDB Compass, Linux, Postman, Git, Eclipse, Jupyter Notebook, Matlab

Libraries: Pandas, NumPy, Matplotlib, Seaborn, dplyr, ggplot2

Database: MongoDB, MySQL, PostgreSQL

EXPERIENCE

Associate Software Engineer

Dec 2023 – July 2024

ACS Technologies

Pune, IN

- Developed and maintained a high-performance, low-latency REST API using Node.js and MongoDB for mobile applications.
- Collaborated with the team to architect scalable APIs, aggregation services, and secure microservices on Azure.
- Assessed and redesigned an optimized MongoDB schema, reducing database size by 22% and improving system performance by 9%.
- Researched and integrated OAuth 2.0 Token-based authentication, strengthening security and streamlining client migration.

PROJECTS

TheraCareHx | Python, FastAPI, Streamlit, PostgreSQL, JWT, Git

March 2025 – May 2025

- Developed a secure health history management platform integrating Health Gorilla API and IMO NLP Service, with a FastAPI and PostgreSQL backend featuring JWT authentication, encrypted data storage, and password-protected PDF reports.
- Designed and implemented an interactive Streamlit dashboard for real-time medical record retrieval, condition tracking, family history mapping, and customizable health report generation.

EcomEase | MongoDB, React.js, Node.js, JWT, Postman, Git

Dec 2024 – Jan 2025

- Developed a full-stack MERN e-commerce application with user authentication, role-based access control, and shopping cart functionality.
- Built secure RESTful APIs with JWT-based authentication for efficient product management and user session handling.
- Utilized React Router for seamless navigation and state management using React Context API for global state handling.

Local Business Directory | Node.js, MongoDB, REST API, Postman, Git

Dec 2023 – July 2024

- Built API module for Local Business Directory, incorporating advanced search parameters. Optimized database performance through refined data structuring.
- Transitioned authentication to OAuth 2.0, enhancing security and improving user access.
