

SAVANTH KUMAR ALLA

Charlotte, NC | +1 (980)369-8085 | savanthkumaralla@gmail.com | www.linkedin.com/in/savanthalla

CAREER OBJECTIVE

An adept professional with five years of valuable technical experience, recently completed a master's degree to further enhance skills and knowledge. Seeking a challenging position that leverages expertise, coupled with a commitment to ongoing learning and professional growth.

PROFESSIONAL SUMMERY

Technical Experience: Four years of experience in ServiceNow development, maintenance, and administration.

ServiceNow Modules: Extensive technical implementation experience with ServiceNow modules including Change Management, Incident Management, Problem Management, Service Catalog, and Configuration Management.

Client Interaction: Proven ability to interact with clients, understand their requirements, provide sizing, and develop customer-facing portals and applications.

Expertise: Expertise in designing and configuring ITSM (Incident, Change, Problem), CSM (Customer Service Management) modules, ITAM (Software and Hardware Asset Management) modules, ITOM (IT Operations Management) modules, ITBM (IT Business Management) modules and HRSD (HR Service Delivery) modules.

Administrative Skills: Skilled in creating roles, profiles, email services, page layouts, workflow alerts and UI actions, UI Policy's and approval processes.

CMDB Development: Proficient in the design and development of CMDB (Configuration Management Database).

Access Control: Experienced in creating Access Control Rules (ACL) and utilizing scripting tools to automate routine tasks in ServiceNow.

SLA Configuration: Adept at creating and configuring SLAs as per requirements.

Production Support: Production support experience with strong problem-solving capabilities.

Testing Experience: Experience in functional testing, GUI testing, integration testing, user acceptance testing, and regression testing, adhering to SDLC processes like Waterfall, Agile (Scrum), and Test-Driven Development.

Communication Skills: Excellent communication and interpersonal skills.

Team Collaboration: Ability to work collaboratively in a team environment and manage multiple tasks effectively.

Operating System: Windows, Linux, IOS, Ubuntu

Other Tools: ECLIPSE, MS Office, Citrix

PROFESSIONAL EXPERIENCE

Software Engineer	Dec 2024 – Present
CloudSystems LLC	Charlotte, NC, USA
• Overseeing the day-to-day operations of support and maintenance in ServiceNow. • Managing users, creating user groups, assigning roles, and defining data access levels. • Modifying the ServiceNow platform and supporting applications based on business requirements. • Implementing security requirements, managing failed logins, handling password encryption, setting access control rules, and managing audit logs. • Reviewing and adjusting data, handling imports/exports, archiving data, and defining database columns and tables.	

- Handling various service requests from consumers and clients, addressing unique demands efficiently.
- Customizing form designs and managing related list layouts.
- Integrating ServiceNow with third-party applications and data sources for seamless functionality.
- Administering user access, creating user groups, and assigning specific roles and data access levels.
- Developing custom dashboards and reports in ServiceNow to provide real-time visibility and analytics.
- Configuring and managing email notifications, inbound actions, reports, gauges, and home pages.

ServiceNow System Support

Jul 2024 – Dec 2024

Edgware Technologies

Dallas, TX, USA

- Managed user administration, including creating user groups, assigning roles, and defining data access levels.
- Effectively managed the complete lifecycle of hardware assets, from request and acquisition to deployment, management, and retirement, ensuring smooth operations and compliance.
- Created and maintained detailed hardware models and asset records, facilitating accurate tracking of asset tags, warranties, contracts, and vendor agreements.
- Developed vendor catalogs, created and managed contracts for hardware assets, and handled asset disposal orders, ensuring compliance with vendor agreements.
- Created cost centers and managed expense lines, providing insights into organizational spending and optimizing asset-related expenses at all levels.
- Automated workflows by scheduling jobs, creating depreciation rules, and managing transfer orders between locations, increasing operational efficiency.
- Developed interactive dashboards and reconciliation reports to monitor asset status, transfer orders, and asset refreshes, providing real-time insights into hardware asset management.
- Conducted regular asset audits, ensuring up-to-date information and compliance with organizational and regulatory standards.
- Imported hardware asset records and created transform maps to ensure seamless data integration with existing systems.
- Managed hardware refresh cycles, such as replacing outdated laptops, and created reclamation orders to reclaim assets from end-users.
- Handled various service requests from consumers and clients, addressing their unique requirements.
- Modified form designs and managed related list layouts for improved usability.
- Administered user access controls, created user groups, and assigned roles with appropriate data access levels.

Software Analyst

Mar 2021 – Jul 2022

Accenture – Client: Boehringer Ingelheim

India

- Led a team of 10 members, communicated strategy, and guided the team towards meeting targets.
- Managed day-to-day activities within the ServiceNow platform.
- Designed applications by developing application tables, forms, access controls, and integrating workflows.
- Administered users, groups, roles, and data loading into ServiceNow using import sets daily, weekly, or as needed.
- Oversaw ServiceNow admin activities, including user and group administration.
- Developed custom dashboards and reports in ServiceNow for real-time visibility.
- Focused on configuration, scripting, and integrations.
- Developed Access Control List (ACL) rules for forms, tables, modules, and managed groups/roles as required.
- Managed email notifications, inbound actions, reports, gauges, and home pages.
- Utilized Business Rules, Client Scripts, UI Policies, UI Scripts, UI Actions, and UI Pages.
- Resolved defects and user stories.
- Conducted testing in the Dev instance and UAT before production deployment.
- Achieved a 99% success rate in deploying ServiceNow products into customer environments.
- Diagnosed client issues and designed resolutions based on deep product knowledge.

Associate Software Engineer

Mar 2020 – Mar 2021

Accenture

India

- Delivered Change, Incident, Problem, and Configuration Management with a 95% resolution rate.
- Enhanced the change management module, improving usability for stakeholders.
- Configured Incident, Problem, Change, and Configuration Management modules in ServiceNow.
- Developed custom and scoped applications tailored to business needs.

- Integrated ServiceNow with network monitoring tools for proactive incident management and faster resolution.
- Implemented ServiceNow Customer Service Management (CSM) to centralize customer interactions across channels (phone, email, chat, self-service portals).
- Migrated customizations between instances.
- Managed Incident, Problem, and Change Management processes, ensuring continual service improvement.
- Monitored and prioritized service-aligned queues, resulting in an 18% increase in operational efficiency.
- Acted as a liaison between the client and Accenture operations teams for support and escalations.
- Communicated service delivery health to stakeholders and explained performance issues or risks.
- Ensured cloud orchestration and automation met target SLAs with minimal downtime.
- Conducted performance meetings to share performance and consumption data and trends.
- Served as a shared resource supporting the following clients: Walmart, GSK, ETS, CVS Health, Novo Nordisk and Marathon Petroleum Corporation.

Associate Software Engineer

Aug 2019 – Mar 2020

Accenture – Client: Cigna Healthcare

India

- Collaborated with clients to meet specific functional requirements within ServiceNow.
- Configured email notifications and inbound actions.
- Worked on ServiceNow modules including Incident, Problem, Change, Service Catalog, and Email.
- Developed workflows for Incident Management, Change Management, Service Requests, and SLAs.
- Created buttons and context menus on forms and lists using UI actions.
- Maintained and documented the ServiceNow platform to meet business requirements, supporting ITIL and business processes.
- Designed and implemented new functionality using Business Rules, UI Policies, and Access Lists.
- Applied Scrum/Agile development methodology.
- Developed custom applications, modules, tables, and views as per client requirements.
- Managed bug fixes and enhancements for out-of-the-box applications like Service Catalog and Service Level Management.
- Configured application-related fields, forms, lists, views, email notifications, user roles, and access controls.
- Documented and reviewed the quality of change records to improve processes.
- Customized the user interface of Incident, Problem, and Change Management applications using UI Policies, Business Rules, and Client Scripts.
- Tailored the ServiceNow platform to meet specific requirements, including custom applications, workflows, and UI enhancements.
- Translated healthcare-specific needs into technical requirements by collaborating with stakeholders.

INTERNSHIP

ServiceNow Academic Partner Program (SNAPP)

May 2018 – Apr 2019

ServiceNow

India

- Selected to participate in the prestigious ServiceNow Academic Partner Program, offered to top colleges in India.
- Trained and certified as a ServiceNow Developer with a focus on real-world industry practices and applications.
- Completed a year of intensive training led by industry-trained experts and certified professionals, with a focus on ServiceNow's core modules.
- Developed a strong understanding of key ServiceNow modules and their implementation in business environments.
