

SUMMARY

SAP Cloud Consultant with 4+ years of experience specializing in SAP HANA and SAP Business Technology Platform (BTP). Expertise in cloud-based SAP solutions, database modeling, integration, and performance optimization. Adept at designing scalable architectures and ensuring seamless cloud deployment. Strong problem-solving skills with a deep understanding of SAP's ecosystem and business processes. Strong in FICO-MM/SD integration, financial reporting, month-end/year-end closing, and cost element accounting. I am skilled in writing complex SQL queries and optimizing databases, with hands-on experience in the SAP Activate Methodology for successful project delivery.

SKILLS

- SAP Cloud Solutions:** SAP HANA, SAP BTP, SAP Cloud Platform (SCP), SAP S/4HANA
- Database Management:** SQL, HANA CDS Views, Calculation Views
- Integration & Middleware:** SAP CPI, OData, REST, SOAP
- Cloud Technologies:** AWS, Azure, GCP (SAP-certified environments)
- Development Tools:** ABAP on HANA, Fiori, Java, Node.js
- Security & Authorization:** SAP Identity Management, OAuth, JWT
- DevOps & CI/CD:** Git, Jenkins, Docker, Kubernetes
- BI & Analytics:** SAP Analytics Cloud (SAC), BW/4HANA, Power BI

EXPERIENCE

Wells Fargo, USA SAP HANA CLOUD DEVELOPER	Feb 2024 – Current
- Configured and managed SAP S/4HANA Financial Accounting (FI) and Controlling (CO) modules, optimizing financial workflows and reducing month-end closing time by 20%. - Developed and optimized HANA database views and procedures for real-time analytics. - Worked with SAP Data Services to extract, transform, and load (ETL) data into HANA. - Assisted in SAP S/4HANA implementations, ensuring best practices in data modeling. - Automated data workflows, reducing manual effort and processing time by 40%. - Implemented and optimized General Ledger (GL), Accounts Payable (AP), and Accounts Receivable (AR) settings in SAP HANA, enhancing financial data accuracy and reducing errors by 15%. - Administered Asset Accounting (AA) and Cost Center Accounting (CCA) in SAP HANA, ensuring precise asset depreciation tracking and reducing discrepancies by 25%. - Deep knowledge of the implementation project methodology and common toolsets - Strong Work Management process and solution integration experience - Implementation and integration experience in SAP modules such as SAP BW and SAP PI and key project domains of data, training, and security - Client Management: Manage day to day interactions with executive clients and sponsors. Gather requirements from client stakeholders and ensure that we’re exceeding their expectations at each step of the engagement - People Development: Serve as counselor and coach to up-and-coming consultants and managers. Provide input and guidance into Deloitte’s staffing process and actively participate in staff recruitment and retention activities. Provide leadership and support for delivery teams and staff in local offices	
Accenture Solutions, Roche Dia IT (SAP ERP Project), India SAP ABAP Developer	Aug 2021 – Dec 2022
- Integrated SAP FICO with MM and SD on HANA, streamlining financial data processing and reducing interdepartmental transaction times by 30%. 3 - Optimized SAP HANA database performance through advanced query tuning and indexing, achieving a 40% reduction in query response times. - Supported financial consolidation and reporting using SAP Group Reporting on HANA, improving real-time visibility across global entities. - Developed SAP Fiori applications on BTP, customizing financial reporting dashboards that improved report generation efficiency by 25%. - Delivered multiple SAP S/4HANA implementations using SAP Activate Methodology, successfully completing three rollouts and increasing system utilization by 20%. - Implemented security measures and role-based access in SAP BTP to ensure data integrity. - Developed interactive Fiori applications for better user experience and efficiency in business processes. - Led financial closing processes using SAP HANA’s real-time processing capabilities, reducing month-end and year-end closing times by 15% and ensuring compliance with financial regulations. - Developed HANA SQL procedures and CDS Views for data reconciliation, reducing discrepancies by 20% and improving audit accuracy.	

- Enhanced Profitability Analysis (CO-PA) reporting using SAP HANA’s advanced analytics and Cost Element Accounting (CEA), providing 10% better insights into cost allocation and profitability.

KPMG by InsideSherpa, India | SAP CLOUD CONSULTANT

Jul 2019 – Aug 2021

- Configured and optimized SAP S/4HANA Finance (FI) modules, including General Ledger (GL), Accounts Payable (AP), and Accounts Receivable (AR), leveraging HANA’s in-memory computing to enhance data integrity and reduce manual tasks by 25%.
- Designed and implemented SAP HANA models, optimizing data retrieval and processing times by 30%.
- Lead the design, implementation and support of Big Data, Analytics, HANA and Cloud solutions for SAP customers
- Lead SAP HANA modeling efforts and provide Analytics recommendations in the development of new solutions as well as the improvement of existing solutions for SAP customers3Have the ability to conduct and lead SAP Big Data and Analytics-related discussions at customers in an advisory capacity
- Interact with both business and technical stakeholders of clients to provide a sound technical solution that meets business needs
