

SUMMARY

Data Analyst with **4+ years** of experience in designing, developing, and implementing Data Warehouse solutions and analytical workflows. Proficient in SQL, Python, and R with expertise in data cleaning, wrangling, exploratory analysis, visualization, and predictive modeling. Skilled in leveraging tools such as Tableau, Power BI, and Excel for interactive dashboards and reporting. Strong background in SDLC (Agile & Waterfall), ETL pipelines, and SQL development (tables, triggers, views, stored procedures). Experienced in Text Analytics, statistical modeling, and advanced visualization using Python and R libraries (NumPy, Pandas, Matplotlib, SciPy, ggplot2). Adept at collaborating with cross-functional teams to deliver accurate, compliant, and actionable insights that drive business decisions.

SKILLS

Methodologies:	SDLC, Agile, Waterfall, Data Validation & Governance, User Acceptance Testing (UAT)
Language:	Python, R, SQL
IDEs:	Visual Studio Code, PyCharm
Packages:	NumPy, Pandas, Matplotlib, SciPy, ggplot2 Statistical Modeling, Predictive Analytics, Root Cause Analysis
Visualization Tools:	Tableau, Power BI, Microsoft Excel
Database:	MySQL, SQL Server
Other Skills:	Data Cleaning, Data Wrangling, Critical Thinking, Communication Skills, Presentation Skills, Problem-Solving, Cross-Functional Collaboration (QA, Clinical, Regulatory, Operations)
Cloud:	Azure Cloud, Microsoft Azure (data pipelines, storage, cloud-based analytics)

EDUCATION

Masters of Computer Science | California State University Fullerton, CA

Bachelor of Computer Engineering | Savitribai Phule Pune University, Pune, Maharashtra

EXPERIENCE

Abbott Laboratories, CA | Data Analyst

March 2025 – Current

- Validate and analyze clinical and operational datasets **in collaboration with QA teams, ensuring data accuracy, consistency, and compliance with FDA, EMA, and ICH-GCP guidelines.**
- Support business users and stakeholders **by resolving data-related issues, troubleshooting discrepancies, and delivering QA and data quality monitoring reports.**
- Perform root cause analysis (RCA) on data anomalies,** identify trends and recurring issues, and implement corrective/preventive actions to strengthen data integrity.
- Design and maintain test cases, validation scripts, and documentation** to support data governance, audit readiness, and regulatory compliance.
- Develop dashboards, visualizations, and ad-hoc reports** to monitor clinical trial performance, operational efficiency, and regulatory compliance metrics.

UnitedHealth Group, CA | Data Analyst

Feb 2023 - Feb 2025

- Implemented **Agile methodologies** to streamline project life cycles for report design and development, enhancing overall project efficiency.
- Developed and executed predictive analytics use cases using **Python**, contributing to data-driven **decision-making** processes.
- Created interactive dashboards in **Tableau**, utilizing advanced calculations and parameters to improve decision making efficiency by 20%.
- Leveraged **Python** libraries such as **NumPy**, **Pandas**, **Matplotlib**, and **SciPy** to develop algorithms, resulting in a 15% reduction in data processing time.
- Designed and optimized **SQL** scripts for creating tables, sequences, triggers, views, and materialized views, boosting database performance by 30%.
- Conducted thorough requirements gathering and source data analysis to identify business rules for data migration and data warehouse development.

BrainByte Infotech, India | Data Analyst

Aug 2018 - Jul 2021

- Utilized **Waterfall methodologies**, actively participating in daily stand-ups, showcases, and sprint retrospectives.
- Contributed to **financial forecasting** and **budget analysis** for new marketing strategies, ensuring alignment with company goals.
- Automated a web-scraping tool using Python, increasing marketing content generation efficiency by 25%.
- Streamlined business reporting and dashboard creation with **Excel**, **Power BI**, and **PowerPoint**, cutting report generation time by 30%.
- Developed and implemented complex **data models** and logical **database designs**, defining database requirements and designing efficient data structures.
- Performed **data collection, cleaning, wrangling, analysis,** and **machine learning** model building using R and Python.
- Wrote complex **SQL queries** to validate data and ensure accuracy at the field level.
- Demonstrated strong analytical, **communication**, **problem-solving**, and **time management** skills through comprehensive **data analysis** and presentation of results.
