

Professional Summary

Analytical and detail-oriented Data Analyst with hands-on experience in data visualization, statistical analysis, and business intelligence reporting. Proficient in transforming complex datasets into actionable insights using SQL, Python, Tableau, and Power BI. Adept at data cleaning, feature engineering, and creating interactive dashboards that support strategic business decisions. Experienced in collaborating across business and technical teams to define KPIs, automate workflows, and improve performance. Currently pursuing an M.S. in Business Analytics with a strong foundation in database management, data warehousing, and applied decision modeling.

Work Experience

Deputy Manager and Business Data Analyst, HDFC Bank LTD, Mumbai, MH, India

July 2022 – November 2023

- Designed data-driven insights to improve business efficiency and reduce operational delays by 15%.
- Designed and documented data flow diagrams and mapping rules for seamless system integration.
- Automated weekly MIS reports in Excel using macros and dynamic dashboards, saving 5+ hours per week.
- Partnered with cross-functional teams to standardize reporting KPIs across retail operations.
- Conducted UAT and data validation, ensuring 99.8% data accuracy in migration and analytics processes.
- Streamlined ingestion pipelines and delivered a critical analytics project 20% ahead of schedule.

Skills & Knowledge

Data Analytics: Data Wrangling, Exploratory Data Analysis (EDA), Trend & KPI Analysis, A/B Testing, Statistical Modeling
Visualization & Reporting: Tableau, Power BI, Excel Dashboards, Data Storytelling, Business Intelligence (BI) Tools
Technical Skills: SQL, Python (Pandas, NumPy, Matplotlib, Seaborn), ETL, SSIS, Data Warehousing, R Programming
Database Tools: SQL Server, MySQL, PostgreSQL, MS Excel (VLOOKUP, Pivot Tables, Power Query)
Soft Skills: Analytical Thinking, Communication, Problem Solving, Stakeholder Collaboration, Time Management

Education

Master of Science in Business Analytics (GPA: 4/4), East Texas A&M University, TX. (Expected Graduation: December 2025)

Courses: Database Management, Python, Data Warehousing, Data Visualization, Applied Decision Modeling, Business Data Science.

Bachelor of Engineering in Computer Science (GPA: 3.74/4), Savitribai Phule Pune University, MH, India (Graduated May 2022)

Academic Projects

Crime Analytics Data Warehouse | SQL Server, SSIS, Tableau

- Built a star schema and ETL workflows to aggregate multi-source crime data.
- Delivered visual dashboards to highlight hotspots and law enforcement efficiency.

Salary Prediction & Homework Automation Project

- Developed a regression model ($R^2 = 0.79$) to estimate salary ranges based on demographic and job data.
- Automated repetitive analysis tasks through menu-driven Python scripts.

Retail Sales Analysis Dashboard | Tableau

- Created an interactive dashboard analyzing regional sales and profit trends.
- Used calculated fields and filters to identify seasonal performance gaps and improvement opportunities.

Obesity Level Predictions | SQL, Python, Power BI

- Predicted obesity levels in Dallas by analyzing habits and physical activity, supporting health equity and UN SDGs.
- Used SQL DBMS to clean and manage datasets; performed queries for data preprocessing and integration.
- Conducted exploratory analysis to uncover relationships between lifestyle habits and obesity levels. Visualized insights in Power BI, correlating exercise frequency, sleep duration, and occupation type with BMI.

Certifications

- IBM Databases and SQL for Data Science Certificate (Coursera)
- Google Advanced Data Analytics Professional Certificate (Coursera)
- Google Data Analytics Professional Certificate (Coursera)
- The Business Intelligence Analyst Course (Udemy)
- R for Data Science: Analysis and Visualization (LinkedIn and Udemy)
