

EDUCATION

The University of Texas at Dallas - Texas, USA <i>Master of Science, Information Technology and Management</i>	May 2025
MIT World Peace University - Pune, INDIA <i>Master in Computer Science</i>	May 2019
Maeer's Arts, Science & Commerce - Pune, INDIA <i>Bachelor in Computer Science</i>	May 2017

SKILLS

Security Tools	: Wireshark, Kali Linux, Metasploit, Nessus, Snort, OWASP ZAP, Splunk
Programming & Scripting	: Python, Bash, PowerShell, C++, C
Frameworks & Platforms	: NIST Cybersecurity Framework, ISO/IEC 27001, LDAP, Active Directory
Compliance & Risk	: PCI DSS, HIPAA, GDPR, Vendor Risk management
Cloud & Other Technical Skills	: Pen Testing, Vulnerability Assessment, Incident Response, Threat Intelligence, Microsoft Azure, AWS

CERTIFICATIONS

Google cybersecurity certificate, CompTIA Security+ (ongoing), Practical Network Pen testing(ongoing), Microsoft Cybersecurity Analyst Professional Certificate, ISC2 Systems Security Certified Practitioner, Cyber Incident Response Specialization, Information Systems Auditing, Controls and Assurance, Certified Information Security & Ethical Hacker, AWS Cloud Practitioner, Microsoft Certified Azure Fundamentals

WORK EXPERIENCE

Security Analyst Intern at TDigital– Dallas, Texas **May 2024 – December 2024**

- Developed security roadmaps aligning projects with AT&T's objectives, achieving GDPR and ISO 27001 compliance
- Conducted vulnerability assessments and collaborated with IT teams to implement remediation strategies, improving security posture
- Designed and implemented Incident Response Plans, cutting security incident response time by 17% through threat simulations
- Performed penetration testing on client applications using tools like Nmap, Hydra, Metasploit, and Burp Suite, mitigating 20-30 critical vulnerabilities including SQL injection, XSS, Content Security Policy misconfigurations, source code disclosure
- Prepared detailed penetration test reports, providing actionable recommendations that reduced recurring vulnerabilities by 20%
- Utilized Splunk to monitor security logs, identify 15-20 threats monthly, investigate root causes, ensuring proactive risk mitigation

Technical and Business Operations Analyst | Amdocs Ltd. – Pune, India **August 2019 – July 2023**

- Migrated 30+ applications from on-prem to Microsoft Azure, enhancing scalability, security and performance
- Automated scripts using Python and PowerShell for vulnerability assessments and error log analysis, reducing manual effort by 40%.
- Collaborated with cross-functional teams to deploy system hardening techniques and improve endpoint security across the enterprise.
- Deployed multiple shuttles to check the efficiency of alerting system in applications leading to 30% reduction of triages
- Executed regular patch deployments for servers, applications, and databases to bolster system security and reliability.
- Implemented vendor risk assessment protocols, ensuring compliance with GDPR and corporate security standards to minimize risks

IT Audit Intern | Symantec Software India Private Ltd - Pune, India **January 2019 – June 2019**

- Performed SOX compliance risk assessments, supporting routine audits and documentation to achieve ISO 27001 standards
- Developed IT audit action plans, reducing findings by 25% enhancing the organization's governance and risk management processes.
- Enhanced IT governance and risk management processes, leading to a 30% reduction in cybersecurity incidents
- Conducted security control assessments and recommended enhancements, reducing cybersecurity incidents by 30%
- Utilized Data and Analytics (D&A) tools such as Excel, Alteryx, SQL, Python, and Power BI to extract, analyze data, and execute substantive audit procedures, assisting in documentation to enhance audit efficiency and accuracy

PROJECTS

Commonwealth Bank Introduction to Cybersecurity Job Simulation on Forge **October 2024**

- Built data visualization dashboards using Splunk to uncover patterns and insights in historical customer data, aiding in fraud detection
- Responded to cybersecurity incidents by notifying teams, gathering information, containing attacks, and supporting recovery efforts.
- Enhanced security awareness expertise by designing infographics promoting best practices for secure password management

Mastercard Cybersecurity virtual experience program on Forge **August 2024**

- Undertook a job simulation where I served as an analyst on Mastercard's Security Awareness Team
- Identified and reported phishing and other security threats, enhancing incident response capabilities
- Analyzed organizational gaps in security training, implementing new courses to address vulnerabilities and strengthen team awareness
