SUMMARY

Driven Full Stack Engineer with around 5 years of extensive hands-on experience with a master's degree in computer science, overseeing the end-to-end design and development of robust backend and frontend software solutions across the complete software development life cycle. Demonstrated expertise in crafting responsive user interfaces and delivering feature-rich web applications that elevate user experiences. Proficient in a wide range of technologies, including Java, Node.js, AWS, React, Python, SQL, facilitating seamless and efficient development processes.

EXPERIENCE

HIREART (OUTLIER)

Dallas, TX

Software Engineer

Mar 2024 – Aug 2024

- Collaborated with a team to implement a robust web application, handling both **front-end** and **back-end** development using **React/Next** and **Spring Boot**, adhering to best practices and incorporating testing to ensure optimal performance and reliability.
- Designed and implemented **AWS Lambda** functions to automate the extraction and transfer of data from a relational database to an Amazon **S3 bucket**, enhancing data availability and supporting scalable cloud storage solutions.
- Developed and managed **CI/CD** pipelines to significantly enhance efficiency and accelerate deployment processes.
- Translated Figma **UI/UX** designs into responsive, interactive, and visually appealing front-end components using **Material UI** with **React.js**, ensuring seamless functionality, accessibility, consistency, and an optimal user experience across devices.
- Proficiently employed advanced state management techniques to ensure efficient data flow using **React Context and Redux**.
- Participated in Scrum development cycles, including sprint planning and daily stand-ups, to foster a collaborative environment.

CHARVI IT (GOOGLE X)

MOUNTAIN VIEW, CA

Full-Stack Developer

Sep 2022 – Dec 2023

- Managed back-end services using **Spring**, focusing on performance enhancements and secure data transactions.
- Configured **Kafka** with Java **Spring** to establish a scalable solution for managing and processing streaming logs from 200+ robots.
- Developed adaptable user interface with exceptional responsiveness and customizable features using **Angular**.
- Proficiently employed advanced state management techniques to ensure efficient data flow using **NgRx**.
- Designed and implemented unit tests cases using **JUnit** and **Mockito**, to enhance the robustness and reliability of components.
- Increased application performance through optimization techniques, resulting in enhanced speed and responsiveness.
- Performed detailed code review, which improved overall coding standards and efficiency by up to **15%**.

OPTIMUM PARTNERS, AMMAN, JORDAN

Amman, Jordan

Software Engineer

Apr 2021 – Sep 2021

- Built a highly scalable and resilient microservices based advertising and consumer analytics platform with **Node** and **Express**.
- Built and implemented highly responsive web user interface and **React.js** components while performing state management.
- Developed and maintained comprehensive unit tests for React components to ensuring robust functionality and high code quality.
- Participated in Scrum development cycles, including sprint planning and daily stand-ups, to foster a collaborative environment.
- Reduced jobs run time **65%** by applying data structure during upgrade of **Python Cron jobs**.

IGTINAM

Amman, Jordan

Full-Stack Developer

Jan 2019 – Mar 2021

- Developed scalable, high-performance microservices projects using **Java/Spring** and **NodeJS/Express** for global deployments.
- Utilized **React.js** to create visually appealing and highly functional user interfaces that seamlessly adapt to all screen sizes.
- Proficiently established efficient stored procedures and organized SQL queries for streamlined database management.
- Conducted 1:1 meetings with stakeholders to collect feedback and define project requirements for successful implementation.

EDUCATION

MAHARISHI INTERNATIONAL UNIVERSITY, IOWA, USA - 2023

Master of Computer Science

PHILADELPHIA UNIVERSITY OF JORDAN, SALT, JORDAN - 2020

Bachelor of Software Engineering

SKILLS

- Languages: Java, Python, Java Script, TypeScript.
- Web: JavaScript, TypeScript, Node.js, React.js (Hooks, Context, Redux, Material-UI, Bootstrap), Angular.js, HTML5, CSS3, JSON, RESTful, XML, Microservices, SOA, Tomcat, Nginx
- Frameworks: Node.js, Spring (MVC, Boot, AOP, Data, Cloud), Hibernate, Express.js, Kafka, Redis, Kubernetes
- Databases: Postgres, MySQL, MongoDB, Cassandra.
- Cloud: AWS (IAM, S3, RDS, SNS, Lambda, SQS, CloudFront, CloudWatch, ECR).
- Design Patterns: Observer, Command, Proxy, Decorator, MVC, CQRS, Event Sourcing, Saga, Two Phase Commits
- Tools: Git, GitHub, JIRA, Maven, VS Code, IntelliJ, Jenkins, Postman, Prometheus,
- SDLC: Agile, Scrum, Waterfall
- Testing: JUnit, jasmine, React Testing Library.
- Other: Data Structures & Algorithms, Object Oriented Design, Functional Programming, Software Development Life Cycle, Distributed Systems, Multi-threading, Linux

ACADEMIC PROJECTS

STACK OVERFLOW, MIU – 2023

Incorporated stack overflow inspired principles into an academic project, designing it with scalability in mind to accommodate high user volumes and future expansions. developed a robust architecture that effectively handles increased user traffic and ensures optimal performance. implemented efficient database structures, streamlined query handling, and optimized server configurations to support seamless scalability. The project demonstrates an ability to architect and build systems that can effectively handle significant user loads while maintaining stability and performance.

LECTURE ORGANIZER, PHILADELPHIA UNIVERSITY – 2018

Developed a web application utilizing the Django Framework to streamline lecture organization within classrooms. Employed a comprehensive design approach to create a user-friendly interface that optimizes the management of lectures and enhances overall classroom efficiency.
