SUMMARY:

A results-driven Software Engineer with over 6 years of experience in full-stack development, specializing in Java, Spring Boot, Microservices, React.js, and cloud technologies. Expertise in building scalable, high-performance systems and RESTful APIs, with a focus on payment processing, e-commerce, and financial applications. Proven track record at top-tier companies such as Wayfair, the National Bank of Kuwait, and Accenture, delivering innovative solutions using Java, Spring, Kafka, Hibernate and AWS. Skilled in developing secure, efficient back-end services and responsive front-end interfaces. Strong foundation in Agile methodologies, CI/CD, and DevOps practices. Open to relocation and eager to contribute to dynamic teams and cutting-edge projects.

EDUCATION:

- Boston University | Master of Science, Software Development | Sep 2022 - May 2024 | GPA: 3.89
- Cochin University of Science and Technology | Bachelor of Technology, Electrical and Electronics Engineering | Jul 2012 - Apr 2016

TECHNICAL SKILLS:

Languages:	Java 8/11/17, JavaScript ES6/ES7, TypeScript 3.x/4.x, Python 3.x
Web:	React.js, HTML5, CSS3, Tailwind CSS, Material UI, Bootstrap 4/5
Web Services:	RESTful APIs, Reactive Programming, JSON, XML
Frameworks:	Spring Boot 2.x/3.x, Spring Framework, Node.js, Microservices Architecture
Databases:	MySQL, PostgreSQL, MongoDB, NoSQL
Design Patterns:	MVC, Singleton, Factory
SDLC:	Agile (Scrum), DevOps, CI/CD (Jenkins, GitLab CI)
Version Control:	Git, GitHub, Bitbucket
Cloud (AWS):	AWS (2020-2024) (EC2, S3, IAM, Lambda, CloudWatch, RDS, ECS, EKS)
IDEs:	IntelliJ IDEA 2020-2024, Eclipse 2020-2024, Visual Studio Code 2019-2024
DevOps Tools:	Docker, Jenkins
Operating Systems:	Windows 10/11, macOS 10.x/11.x, Linux (Ubuntu 18.x/20.x)
Application/Software:	Jira, Postman 7.x/8.x, GitLab
Server-Side:	Spring Boot 2.x/3.x, Node.js, Express
Client-Side:	React.js 16.8/17/18, HTML5, CSS3, JavaScript ES6/ES7, TypeScript 3.x/4.x, Bootstrap 4/5
Testing:	Selenium, JUnit, TestNG, Jest
Other	Kafka, Hibernate, Microservices, Maven

WORK EXPERIENCE:

Wayfair, Boston, MA

ROLE: Software Engineer

Mar 2024 - Present

Responsibilities:

- Spearheaded the revamp of Wayfair’s e-commerce payment processing platform using React.js and Tailwind CSS, optimizing the user interface for a smoother customer journey and boosting transaction success rates by 40% through improved navigation and user-centric design.
- Authored reusable, modular UI components with React.js, reducing development cycles by 25% and ensuring consistency and scalability across multiple e-commerce platforms and customer-facing touchpoints.
- Implemented CI/CD pipelines using Jenkins, automating deployment processes and reducing release times by 30%, ensuring faster and more reliable software delivery.
- Collaborated with cross-functional teams to integrate Java, Spring Boot, and RESTful APIs, enabling seamless data exchange between the front-end and back-end systems and enhancing the overall efficiency of Wayfair’s e-commerce transaction flows.

- Developed and maintained critical backend services using Java, Spring Boot, and Hibernate, improving database performance and ensuring robust handling of large-scale, real-time transaction volumes in Wayfair's global online marketplace.
- Facilitated the implementation of a Microservices architecture, improving system scalability and responsiveness, and leveraging Kafka for event-driven processing to ensure real-time updates on inventory and transaction statuses.
- Integrated payment processing features within the platform, ensuring secure and efficient handling of international payments and compliance with regulatory standards.
- Expertise in deploying and managing cloud-based solutions on AWS, ensuring continuous uptime, scalability, and optimal performance of Wayfair's e-commerce platform, while supporting high-volume transactions and dynamic inventory management.
- Contributed to the implementation of a Microservices architecture, boosting system scalability and leveraging Kafka for real-time inventory and transaction updates.

ENVIRONMENT: Java, Spring Boot, Hibernate, Spring Security, Spring Data JPA, Microservices, Kafka, RESTful APIs, React.js, Tailwind CSS, AWS, GCP, HTML5, CSS3, Bootstrap, Maven, Git, MySQL, PostgreSQL, JUnit, Docker, Kubernetes.

NATIONAL BANK OF KUWAIT, Kuwait City

Dec 2021 - June 2022

ROLE: Senior Software Development Engineer

Responsibilities:

- Developed front-end components for a new sales CRM tool using React.js, ensuring a responsive and visually appealing user interface for one of the largest banks in the Middle East.
- Implemented dynamic UI components with Material UI, enhancing usability and accessibility while maintaining design consistency across the application.
- Collaborated with cross-functional teams to integrate front-end modules with back-end systems, delivering seamless features such as account details, transaction history, and beneficiary information.
- Played a vital role in delivering critical project features by coding and debugging key functionalities for smooth implementation.
- Optimized front-end performance by refining and debugging code to ensure smooth user interactions and enhanced system responsiveness.
- Worked closely with backend developers, ensuring robust data flow between the front-end modules and back-end services, aligning with project requirements.

ENVIRONMENT: React.js, Material UI, JavaScript, HTML5, CSS3, Git, RESTful APIs, Node.js, MySQL, JUnit, Docker.

URSOURCE PVT LTD, Kuwait City

Oct 2020 – Nov 2021

ROLE: Software Development Engineer

Responsibilities:

- Integral role in developing and delivering innovative frontend solutions for e-commerce platforms, online food delivering platforms and corporate web products, utilizing React.js, HTML, CSS, and JavaScript to create responsive and user-friendly interfaces.
- Collaborated on building scalable, modular e-commerce applications using Microservices architecture, ensuring enhanced flexibility and maintainability across multiple projects.
- Demonstrated proficiency by designing, developing, testing, and deploying 7 projects within a year, including online food ordering websites and corporate applications, with a focus on high-quality, responsive designs.
- Leveraged Bootstrap for creating responsive layouts and ensuring cross-device compatibility and smooth user experience on both desktop and mobile platforms.
- Integrated Java and Hibernate for backend services, optimizing database operations and ensuring seamless data handling across applications.
- Orchestrated real-time data processing and event-driven communication using Kafka, ensuring efficient handling of transactions and user interactions within the applications.

ENVIRONMENT: Java, Microservices Architecture, Spring Boot, Hibernate, Kafka, React.js, HTML5, CSS3, JavaScript, Bootstrap, RESTful APIs, MySQL, Postman, Git, Docker, JUnit, Maven.

ACCENTURE, Bangalore, India

March 2017 - Nov 2019

ROLE: Software Development Engineer

Responsibilities:

- Authored and developed responsive web applications for the insurance claim process using React.js, Redux, and Bootstrap, ensuring seamless interaction for users uploading and reviewing medical charts.

- Crafted and integrated RESTful APIs with Node.js, optimizing data flow between front-end applications and back-end systems to support medical chart indexing and review.
- Optimized database operations with MySQL, improving query performance and maintaining the integrity of patient and provider data during critical processes.
- Carried out API testing with Postman, verifying the stability and reliability of interactions between different components in the insurance claim application.
- Developed and executed automated tests using Selenium WebDriver with Java and Python, ensuring the robustness and reliability of the applications across environments.
- Collaborated on end-to-end deployment processes using Git and Docker, overseeing smooth transitions from development through to testing and production.
- Facilitated the optimization of user interface elements in React.js to ensure an intuitive and responsive user experience for both claimants and providers.
- Acquired proficiency in managing cloud-based deployments and ensuring scalable solutions through Docker and continuous integration workflows.

ENVIRONMENT: Java, JavaScript, Python, React.js, Redux, HTML5, CSS3, Bootstrap, Node.js, Spring Boot, Hibernate, MySQL, RESTful APIs, Selenium WebDriver, Postman, JUnit, Kafka, Git, Docker, AWS, Maven, IntelliJ IDEA, Jenkins, GitLab CI, Microservices Architecture, AWS Lambda.

PROJECTS:

E-commerce Platform

- Developed an e-commerce website using React.js and Tailwind CSS, enabling users to browse products, add items to a cart, and place orders seamlessly. Utilized Java Spring Boot for the back-end, integrating with a MySQL database for product and order management. This project demonstrates proficiency in modern front-end technologies, responsive design, and RESTful API integration.

Professional Networking Platform

- Developed a professional networking platform using React.js, HTML5, CSS3, and Google Firebase, enabling users to create professional connections and discuss business and employment topics. Integrated Spring Boot for secure authentication and user management, and used Firebase for real-time data synchronization.

OTHER PROJECTS:

- **Netflix Clone:** Developed using React.js, Node.js, and Express, with MongoDB for data storage, showcasing expertise in full-stack development.
- **Expense Sharing App:** Created a simple, user-friendly app using Java Spring Boot, React, and Hibernate for backend database interactions, showcasing strong understanding of financial application development.
- **Train Ticket Booking System:** Developed using Spring Boot and MySQL, offering seamless booking and ticket management.
- **Library Management System:** Built with Java, Spring Boot, and Hibernate, demonstrating expertise in designing database-driven applications with CRUD functionalities.
