EXPERIENCE:

Data Analyst | VERIZON

May 2024 - present

- Oversaw the maintenance and integrity of databases, ensuring data accuracy, consistency, and availability for analysis and reporting.
- Utilized SQL and other data querying tools to extract, clean, and transform data from various sources, preparing it for analysis and reporting.
- Delivered technical support and assistance to users regarding data-related issues, including troubleshooting and resolving data discrepancies and access problems.
- Created and generated regular and ad-hoc reports and dashboards using Tools like Excel, Tableau, and Power BI to provide insights and support decision-making processes.
- Implemented and monitored data quality checks to identify and correct data issues, ensuring high-quality and reliable data for business operations.
- Identified and recommended improvements to data processes and workflows to enhance efficiency and accuracy in data management and analysis.

Data Analyst-I | The Startup System

Oct 2023- April 2024

- Conducted in-depth analysis of early-stage product performance and customer feedback to help shape business strategies.
- Collaborated with product and marketing teams to identify key metrics and track the success of new feature rollouts.
- Built ad-hoc data models to analyze sales pipelines, customer acquisition, and retention trends in a fast-paced startup environment.
- Created and maintained interactive dashboards to provide real-time insights for decision-making, supporting rapid growth.
- Assisted in data-driven **A/B testing** for product optimization, improving conversion rates by 15%.
- Analyzed competitor data and market trends to inform pricing strategies and guide product development.

Business Intelligence Intern | DRDO – India

Jan 2022 - March 2022

- Created and maintained interactive dashboards using Power BI/Tableau to track key performance indicators (KPIs) and present data insights to project teams.
- Analyzed large datasets to identify trends and anomalies, supporting data-driven decision-making processes for ongoing research and development projects.
- Utilized SQL to extract, clean, and transform data from multiple sources, ensuring data accuracy and relevance for analysis and reporting.
- Generated comprehensive reports and visualizations to communicate findings and recommendations to senior analysts and project managers, aiding in strategic planning and project evaluations.
- Assisted in integrating data from various systems and sources into a centralized data warehouse, improving data accessibility and usability for analysis.

Jr Data Analyst | NJR Infotech

Jan 2020 – Dec 2021

- Collected, cleaned, and analyzed financial data to support business decisions and ensure data accuracy.
- Built Power BI dashboards to visualize key financial metrics, including revenue, expenses, and profit margins.
- Wrote SQL queries to extract, filter, and manipulate financial data from relational databases.

- Assisted in risk analysis by identifying discrepancies and anomalies in transaction data.
- Automated monthly financial reports using Excel and Power Query, saving 30% of reporting time.

EDUCATION:

Clark University; Worcester, MA

Master of Science in Information Technology, GPA- 3.67/4

Guru Nanak Institute of Technology; Hyderabad, India

Bachelor of Technology in Electronics and Communications Engineering, GPA – 7.0/10

SKILLS:

- **Data Analysis:** Excel (advanced functions), SQL, Python (Pandas, NumPy).
- **Data Visualization:** Tableau, Power BI, Matplotlib.
- **Database Management:** MySQL, PostgreSQL, MongoDB, Redshift.
- **Statistical Analysis:** Hypothesis testing, regression analysis.
- **Cloud Platforms:** AWS (Redshift), Azure (SQL Database), Google Cloud (Big Query).
- **BI Tools:** Reporting and data insights.

PROJECTS:

Zomato Data Analysis [Python | Pandas | Matplotlib| Seaborn | Data Visualization]

- Conducted an in-depth data analysis of the Zomato restaurant dataset to answer questions about customer behavior, restaurant ratings, and spending patterns.
- Key findings included identifying the most popular restaurant types, understanding spending patterns for two people, and analyzing customer ratings by service mode.
- Visualized data trends with charts, including bar graphs, box plots, and line plots.

E-Commerce Customer Purchase Behavior Analysis [Python| Pandas| Seaborn| Matplotlib| Scikit-learn]

- Conducted Exploratory Data Analysis (EDA) on 5,000+ customer transactions to uncover key spending patterns
- Applied RFM Segmentation to classify customers into loyalty segments, identifying top spenders and churn risks
- Built interactive visualizations to highlight monthly sales trends and customer buying behavior using Seaborn and Matplotlib
- Optimized customer segmentation by implementing data cleaning pipelines and handling missing values
- Derived actionable insights to support customer retention strategies and churn prediction

CERTIFICATIONS:

AWS Solution Architect – Associate

2024

IT Fundamentals – IBM

2024

AWS Cloud Practitioner

2023

EXTRA-CURRICULAR:

- Member of Rotary Club, Fundraiser in NGO.
- One-on-one tutor.
- Volunteering: Tech volunteer at a local library – Assisted patrons with tech-related questions.
