EDUCATION

New York University (NYU)

Masters (MS) in Management and Systems, Major: Database Technologies and Data Analytics, GPA: 3.857

Narsee Monjee Institute of Management Studies (NMIMS) University

Bachelor of Technology, Major: Information Technology (IT), GPA: 3.67

New York, United States

May 2024

Mumbai, India

August 2020

EXPERIENCE

HVANTAGE TECHNOLOGIES, INC. USA

Data Analyst

Remote, United States

July 2024 – Present

- Developed and maintained **financial KPI dashboards** in **Power BI** and **Amazon QuickSight** tracking profit margins, revenue growth, and expense ratios, improving financial visibility by **30%** for senior stakeholders.
- Conducted **financial analysis, risk assessment, and compliance monitoring**, leading to a **15% improvement** in financial forecasting accuracy through **data-driven decision-making** in **capital markets**.
- Optimized **financial reporting and cash flow analysis**, collaborating with cross-functional teams in **finance, risk management, and capital markets**, ensuring adherence to **regulatory compliance** and governance standards.
- Leveraged **SQL and Python** for financial modeling and automation, streamlining **data integration and pipeline automation** in **Snowflake**, improving data accuracy by **25%** and reducing manual processing time by **40%**.

NEW YORK UNIVERSITY

Database Graduate Assistant

New York, United States

September 2022 – May 2024

- Worked on projects involving **SQL, Python, and Excel** for data retrieval, indexing, and query optimization, enhancing database performance and data processing efficiency.
- Automated data processing tasks using **Oracle, MySQL, and Azure**, optimizing query performance by 30%, and creating Tableau dashboards to enhance data-driven decision-making.

THINK AI

Business Data Analyst Intern

Irvine, California, United States

May 2023 – August 2023

- Analyzed **financial and operational data** using **SQL and Power BI**, improving **forecasting accuracy by 30%** for revenue and expense trends.
- Performed data mining** to optimize **expense tracking and KPI monitoring**, reducing **operational inefficiencies by 41%**.
- Gathered **business requirements** and created financial reports, documenting insights to improve **stakeholder communication and process efficiency**.
- Enhanced financial forecasting accuracy by 30% using **QuickBooks and Power BI**, leveraging **DAX calculations**, data modeling, and statistical techniques (paired t-tests, correlation, regression).
- Streamlined **KPI tracking** for revenue, expense margins, and cash flow trends, providing data-driven recommendations to business teams in an **Agile** environment for operational and financial improvements.

UNIVERSAL SOFTLAB

Associate System Engineer - Data Engineering Team

Indore, India

September 2020 – July 2022

- Designed and maintained **SQL-based** backend systems in **Oracle** to support **financial transaction tracking**, reporting, and audit processes for the COSMOS project, improving data efficiency by 20%.
- Performed **advanced financial data** analysis using **Excel (Pivot Tables, VBA, Index-Match, VLOOKUPS)** to automate client reports, enhance trend analysis, and support data-driven business decisions.

PROJECTS

Financial Analysis & Reporting (AI Finance, Power BI, Azure Data Studio-SQL)

- Conducted in-depth data analysis using **Azure services** and **Microsoft Excel** for **financial data**.
- Developed interactive **Power BI** dashboards showcasing KPIs such as revenue, expense ratios, profit margins, and cash flow trends from **QuickBooks**.

ProfitMax: Enhancing Revenue & Cost Optimization (SQL, Power BI, Python, Financial Metrics, Business Intelligence)

- Analyzed corporate financial data using **SQL and Python**, identifying trends in profit margins, revenue growth, expense ratios, and capital allocation, improving financial decision-making efficiency by 25%.
- Developed dynamic **Power BI dashboards** to visualize key profitability metrics, including return on assets (ROA), return on equity (ROE), revenue-to-expense ratios, and operating cash flow trends, improving financial reporting transparency.
- Designed automated financial models integrating **forecasting algorithms, regression analysis, and statistical risk assessments**, reducing manual financial reporting time by 40% while improving data accuracy and regulatory compliance.

SKILLS

Programming & Data Processing: SQL, Python, R, C++, SAS, MATLAB, JavaScript, PHP, NoSQL, ETL/ELT Processes

Data and Business Analytics & Visualization: Power BI, Tableau, Looker, Amazon QuickSight, Databricks, Azure Data Studio, Sigma, QuickBooks, Advanced Excel, Statistics, Forecasting, A/B Testing, Healthcare Analytics

Tools & Cloud Platforms: AWS, Azure, Oracle, UML, Figma, Think-Cell, JIRA, Asana, Slack, Agile

PUBLICATIONS AND CERTIFICATIONS

Research Papers Published: "Face detection using multi-stage CNN architecture," Presented at the 2nd International conference on IoT based Control Networks and Intelligent system (ICICNIC 2021); "Health Prediction using Machine Learning," International Journal of Science, Engineering and Technology (IJSET Journal), 2021.

Certificates: AWS Certified Data Engineer: Associate (On-going), Databricks Certified Data Engineer Professional, Google: Data Analytics Professional
