

SHAISHAV TAYDE

75000 Verano Rd, Irvine, CA - 92617 | P: 949 232-7611 | stayde@uci.edu | [LinkedIn](#) | [Portfolio](#)

WORK EXPERIENCE

SRI International

Menlo Park, CA

Computation and Data Science Intern (GenAI)

06/2024 - 12/2024

- Collaborated with researchers to automate scoring process, initially used **few-shot learning** with LLMs and later fine-tuned **BERT** models to create an ensemble grading system, achieving **80%** human-machine agreement.
- Engineered a conversational AI chatbot using **RAG**, leveraging **Vector DB** and **LangChain** to store and retrieve long-term contextual history, used **Streamlit** for UI of the app.
- Developed a **Python** script for synthetic data generation, utilized ReportLab and **prompt engineering with Llama3.1** to create PDFs, resolving data scarcity issue.

Tata Consultancy Services

Pune, India

Data Scientist

06/2021 - 08/2023

- Increased e-commerce website **Conversation Rate** by **5%** through engineering a collaborative filtering **Recommender System**, coordinated with stakeholders to design and execute **A/B testing** to validate impact.
- Attained a **3%** relative reduction in customer churn by implementing a **CLTV model**, used survival analysis and developed a **Power BI** dashboard for visualizations.
- Collaborated with ML engineers to orchestrate a **CI/CD ML-Ops** pipeline to streamline services for model lifecycle management and automated deployment using **ML Flow** and **AWS services**.
- Achieved a **15%** uplift in customer experience using **VoC** analysis, implemented **statistical methods** with website performance metrics and customer reviews for data-driven optimization.

PROJECTS

FineTuneEz – A tool to streamline HF training framework [\[Link\]](#)

- Designed a Python package for data scientists to seamlessly fine-tune HF pretrained models and perform downstream tasks with minimal setup, eliminating boilerplate code and accelerating development.
- Developed a framework for leveraging few-shot learning prompts with **LLM**, streamlining model adaptation for **NLP** tasks.

Poultry-guard – A Chicken Disease Classifier (*Deep-Learning and Cloud Integration*) [\[Link\]](#)

- Developed an end-to-end Deep Learning project focused on building a Coccidiosis disease classifier model for chickens. Utilized object classifier algorithm and **Tensor 2.X API**, achieved test recall of **95 percent**.
- Implemented an end-to-end Machine Learning Operations (**ML-Ops**) pipeline using **GitHub Actions** and deployed the entire workflow within the **AWS cloud environment**.

EDUCATION

University of California, Irvine

Irvine, CA

Master of Computer Science

09/2023 - 12/2024

Relevant Coursework: AI, Database Management Systems, Machine Learning and Data Mining (Current)

CGPA: 3.9/4

SRM Institute of Science and Technology

Chennai, India

B. Tech (Major: Computer Science)

06/2017 - 05/2021

CGPA: 3.85/4

SKILLS AND CERTIFICATIONS

Programming Skills: Python, SQL, R, DAX

Tools and Frameworks: Snowflake, Google Cloud, AWS, Big-Query, Adobe Analytics, version control (Git, GitHub) TensorFlow, PyTorch, Streamlit, Pandas, NumPy, Docker, Gitlab, ML Flow, transformers, scikit-learn, spark, LangChain, Pinecone, Power BI

Certifications: Google Cloud Platform - Associate Cloud Engineer (GCP - ACE)
