

Sai Shanker Gaddam

Java Full Stack Developer

Herndon, VA, 20171 | (240) 893-8423 | shankar202749@outlook.com | LinkedIn

Summary

- Dynamic **Java Full Stack Developer** with **4+ years** of experience in developing scalable web applications and enterprise-grade solutions, integrating modern frameworks and tools like **Spring Boot**, **Angular**, and **Microservices architectures**.
- Proven expertise in designing **RESTful APIs**, enhancing backend performance by optimizing data processing through **Spring**, **Hibernate**, and **MySQL**, and delivering efficient, high-performance systems.
- Skilled in leveraging cloud platforms such as **AWS** and **Azure** for deployment, ensuring high availability, scalability, and security of applications, achieving **99.9%** uptime in production environments.
- Demonstrated leadership in implementing **Agile methodologies** and **CI/CD pipelines** using **Jenkins** and **GitLab CI**, reducing deployment times by **50%** and improving development workflows.
- Adept in database management using **MySQL**, **MongoDB**, and **PostgreSQL**, optimizing query performance and maintaining data integrity in high-transaction systems.
- Implemented **test-driven development (TDD)** using **JUnit** and **Mockito** to increase code reliability and ensure seamless software quality in complex environments.
- Continuously staying updated with cutting-edge technologies and trends in **Java**, **Cloud Computing**, **Microservices**, **React.js**, and **API Security**, ensuring robust solutions and future-ready applications.

Skills

Languages:	Java, Python, JavaScript, Typescript, SQL, C, C++, C#
Frameworks:	Spring Boot, Hibernate, Struts, Express.js, Node.js, Django, Spring Data JPA
Web Technologies:	HTML5, CSS3, JavaScript, Bootstrap, Angular, React.js, Tailwind CSS
J2EE Technologies:	Servlets, JSP, JDBC, JUnit, JMS, JSTL, Multi-threading, EJB, JavaBeans, JSF, Generics, Concurrency, and Collections
UI/UX:	Responsive Design, Single Page Applications (SPA), AJAX, JSON, REST APIs
Node.js:	Express.js, RESTful API Development
Databases:	MySQL, PostgreSQL, MongoDB, Oracle, Cassandra
Microservices & APIs:	RESTful APIs, SOAP APIs, GraphQL, Microservices Architecture
Cloud Platforms:	AWS (EC2, S3, Lambda, CloudFormation), Microsoft Azure
Containerization:	Docker, Kubernetes
CI/CD:	Jenkins, GitLab CI/CD, Travis CI
Version Control:	Git, GitHub, GitLab
Cloud Deployment:	AWS Elastic Beanstalk, Heroku, Azure App Services
Agile Tools:	Jira, Confluence, Trello
Testing:	JUnit, Mockito, Selenium, Postman
Other Tools:	Maven, Jenkins, Postman, Swagger, Gradle
IDE's:	Eclipse, Visual Code, Notepad++, NetBeans, Dream Viewer
Development Methodologies:	Agile (Scrum, Kanban), Test-Driven Development (TDD), DevOps practices
Serverless Architectures:	AWS Lambda, Azure Functions
Cloud-Native Solutions:	Microservices, Event-Driven Architectures
Security:	OAuth2, JWT, API Security Best Practices

Experience

CVS Health, USA | Java Full Stack Developer

Dec 2023 - Present

- Successfully implemented the entire Software Development Life Cycle (SDLC) for enterprise healthcare applications, spanning analysis, design, development, integration, and testing, ensuring 100% compliance with project deadlines.
- Actively participated in SCRUM meetings and followed Agile methodologies, enhancing issue resolution speed by 30% and effectively tracking project progress in a dynamic healthcare domain.
- Developed single-page applications (SPAs) for internal and external healthcare systems using HTML, CSS, TypeScript, Angular, and Angular CLI, leading to a 25% improvement in frontend performance and user engagement for patients and providers.
- Designed microservices architecture with Spring Cloud, enhancing service discovery, resilience, and configuration management in CVS Health's distributed systems.
- Built scalable and secure backend services for managing patient and prescription data, leveraging Spring Security and implementing robust access controls and data encryption mechanisms.
- Leveraged Oracle as the backend database, optimizing healthcare data operations by writing efficient stored procedures, and reducing query execution times by 20%.
- Utilized Spring Framework components (Spring Core, DAO, Spring ORM, Spring MVC) to create a robust business layer, achieving 15% faster processing times and seamless integration with third-party healthcare platforms.
- Configured CI/CD pipelines using AWS, Jenkins, and Kubernetes, automating deployments and reducing deployment time by 50% across multiple environments in compliance with HIPAA regulations.
- Adopted Test-Driven Development (TDD) practices using JUnit, achieving 95% code coverage and creating comprehensive documentation to support future scalability and upgrades.
- Conducted rigorous testing of RESTful APIs using Postman and Insomnia, ensuring 100% validation success for critical healthcare data operations, including GET, POST, UPDATE, and DELETE functionalities.
- Managed version control for enterprise applications using GitHub, ensuring 99.9% code integrity, and utilized IntelliJ IDEA to streamline development processes and improve overall productivity.

Avenir Technologies, India | Software Developer

Jan 2019 - Jun 2022

- Utilized Agile methodologies, including Scrum, to manage projects.
- Developed and maintained backend applications using Java 8/J2EE technologies, including Servlets, JSP, EJB, JPA, and Hibernate.
- Designed and implemented Microservices architecture with Spring Boot, integrating REST APIs.
- Employed ReactJS for dynamic UIs, integrating JSP, jQuery, Node.js, Bootstrap, JSON, and AJAX
- Implemented Spring Security for method-level and Spring AOP for URL-level authorization.
- Leveraged Hibernate ORM for efficient database interactions and data persistence.
- Applied Spring Dependency Injection (Spring IoC) to manage Spring Beans and improve code modularity.
- Integrated Apache Kafka for asynchronous communication between microservices.
- Designed dynamic web pages with React JS, JavaScript, HTML, CSS, jQuery, and TypeScript, focusing on interactive and responsive user interfaces.
- Developed scalable web applications with Spring Boot, Spring MVC, and Java 8, utilizing MVC architecture and SpringIoC for dependency management.
- Enhanced API security using Spring Security and OAuth2.0 for secure authentication and authorization.
- Managed and optimized PostgreSQL and MySQL databases, incorporating MongoDB NoSQL for flexible document storage solutions.
- Designed and deployed applications using AWS services, including EC2, EKS, DynamoDB, S3, Lambda, SNS, SQS, and API Gateway.
- Led database migration projects from DB2 to AWS DynamoDB, ensuring seamless data transfer and integration.
- Automated deployments and infrastructure management with Terraform.
- Integrated GitHub with Jenkins for CI/CD pipelines.
- Implemented automated testing frameworks including JUnit, Mockito, Cucumber, and Selenium.
- Utilized Splunk and Log4j for effective logging and monitoring
- Collaborated on project documentation and management tasks using Jira.

Education

- Master of Information Technology | Hood College, Frederick MD

Certifications

- IBM Certified Data Science Practitioner
- BridgeLabz Certified Linux, Hands-on Java Programming, and Git Skills
- HackerRank Certified Python Programming Language
