Summary — Full Stack + AI Engineer with 4+ years of experience as a Software Engineer delivering scalable financial, educational, and enterprise solutions. Skilled in Python, Java, C++, and JavaScript frameworks (React, Angular, Vue) with strong exposure to production engineering, data analysis, secure coding, and cloud infrastructure. Adept at working in Agile/SCRUM teams to design and deliver reliable technology solutions that reduce risk and support business growth.

Skills

Languages: Python, Java, C++, JavaScript (ES6+), TypeScript, SQL

Framework/Libraries: React.js, Angular, Vue.js, Electron.js, Node.js, jQuery, Webpack, Tailwind CSS,

Testing/DevOps: Jest, Playwright, Karma, CI/CD, AWS, GCP

Other: AI Agents, MCP servers, LLMs, Ollama, LangChain, Splunk, Dynatrace, PagerDuty

Academic Experience

State University of New York (Binghamton, USA)

Feb 2025 – Present

Graduate Assistant

- Collaborated with the Computer Science department to build internal tools for tracking student applications and assisting staff in monitoring progress. Developed a Vue.js frontend and Node.js backend to record student demographics, analyze subject pairings, and integrated Ollama models to parse transcripts for automated insights.

Experience

Rocket Mortgage (Detroit, USA)

May 2025 – Aug 2025

Software Development Engineer Intern

- Built an MCP server integrating LangChain with Splunk, PagerDuty, BookStack, and Dynatrace APIs, streamlining on-call incident response with historical search, recurring issue detection, contextual docs, and LLM-based postmortem reports.
- Contributed to the Servicing team of a mortgage platform by enhancing post-loan workflows, developing features for EMI scheduling, bank updates, tax docs, and secure form access.
- Wrote unit, integration, and end-to-end tests using Jest and Playwright to improve reliability and user flows.
- Deployed cloud data workflows on AWS ECS/EC2, collaborating with teams to deliver scalable infrastructure.

Kiwitech (Noida, India)

Nov 2021 – Jun 2024

Software Development Engineer

- Built the BAR-I bar inventory system with a C++ backend and a React.js frontend, integrating barcode scanners and weight scales to monitor bottle-level inventory and track sales and also contributed to the Electron.js desktop app.
- Developed jQuery extension for encrypted credential sharing, used by 2,000+ users.
- Built flight-scheduling tool in Angular with Mailchimp and optimized frontend using Webpack bundling, reducing load time 20%..
- Led peer code reviews and mentored juniors on React/Node.js and promoted Playwright testing adoption.

Teamie (Bangalore, India)

Dec 2020 – Aug 2021

Software Development Engineer

- Enhanced lesson-transfer workflows for 1,000+ students using Angular.js, Vue.js, TypeScript, SASS.
- Deployed production systems with GCP & CircleCI and removed third-party tools, saving 30+ hrs/month.

Valuefy Solutions (Mumbai, India)

Jan 2020 – Nov 2020

Software Development Engineer

- Built Angular 5 mutual fund platform with Node.js and SQL backend and implemented secure cart-based transactions with Razorpay & Billdesk gateways and real-time updates.

Education

State University of New York, Binghamton

Aug 2024 – May 2026

Master of Science in Computer Science

GPA 3.5

Relevant Coursework: Design and Analysis of Algorithms, Programming Languages, Web Programming, Cloud Computing

Jaypee University of Engineering and Technology

Aug 2016 – May 2020

Bachelor of Technology in Computer Science

GPA 7.6 / 10

Relevant Coursework: Data Structures and Algorithms, Object Oriented Programming, Database, Operating Systems
