

PROFESSIONAL SUMMARY :

Results-driven Data Engineer with 5 years of experience in building and optimizing data pipelines, managing databases, and working with large-scale datasets. Proficient in SQL, Python, and big data technologies such as Hadoop, Spark, and AWS. Skilled in ETL development, data modeling, and cloud-based data solutions to drive actionable insights and business decisions. Adept at collaborating with cross-functional teams to deliver high-impact data solutions.

TECHNICAL SKILLS :

- Programming Languages: Python, SQL, Java, C++
 - Data Engineering Tools: Hadoop, Spark, Apache Kafka, Airflow, AWS Glue, Databricks
 - Cloud Platforms: AWS (S3, EC2, RDS, Redshift), Azure
 - Database Management: SQL, Oracle, PostgreSQL, MongoDB
 - ETL & Data Integration: Talend, Informatica, AWS Glue, PySpark
 - Visualization Tools: Tableau, Power BI
 - Soft Skills: Communication, Problem-Solving, Team Collaboration
-

EDUCATION :

Master of Science in Computer Science

University of North Carolina at Charlotte, Charlotte, NC

CGPA: 3.75

- Big Data Analytics: Hands-on experience with Hadoop and Spark for processing large datasets.
- Information Visualization: Created dashboards using Tableau and D3.js to present data insights.
- Cloud Computing: Designed scalable solutions on AWS and Azure.

Bachelor's in Information Technology

Anurag Group of Institutions, Hyderabad, India

CGPA: 8.5

- Relevant Coursework: Data Structures, Database Management Systems, Machine Learning, Object-Oriented Programming.
 - Senior Thesis: Predictive Analytics for Weather Forecasting Using Machine Learning Models.
-

PROFESSIONAL EXPERIENCE:

Vivekananda Group of Institutions - India

Data Analyst - 2 years

- Utilized SQL and Python to extract, clean, and analyze large datasets, identifying trends that informed strategic business decisions.
- Developed interactive dashboards using Tableau to visualize key performance indicators, enhancing data accessibility for non-technical stakeholders.
- Conducted A/B testing to assess the effectiveness of marketing campaigns, leading to a 15% increase in conversion rates.

Exafluence - India

Data Engineer - 3 years

- Designed and implemented scalable data pipelines to process and analyze large datasets, reducing data processing time by 20%.
 - Utilized ETL processes to extract, transform, and load data from various sources into centralized data warehouses.
 - Collaborated with data scientists to ensure data availability and quality for analytical modeling.
-

KEY PROJECTS :**E-COMMERCE STORE** - TypeScript, Angular, Express.js, Stripe

- Developed an e-commerce webshop with product browsing, cart management, and secure payments using Stripe.
- Implemented user registration, order processing, and admin product management for seamless transactions.

PHOTOSHARE APP- JavaScript, Node.js

- Developed a photo-sharing app enabling users to upload, share, and manage images in real-time.
- Implemented features like user authentication, image upload, and sharing functionalities using Node.js for backend operations.

FINDING MISSING PEOPLE USING AI- AWS Amazon Rekognition, Python, Flask

- Developed a mobile app with police-admin and user interfaces, utilizing AWS Rekognition for facial recognition and image comparison to track missing persons.
- Built an end-to-end system with Flask (backend) and ReactJS (frontend), implementing deep learning models for image similarity matching.

DATA SCIENCE HACKATHON- Python, Google Collab, Pandas, Matplotlib

- Developed a data repository on women's health by collecting and analyzing NIH cancer-related data, visualizing disease distribution across Indian states.
- Created Matplotlib visual reports to highlight trends and correlations, aiding public health decision-making.

OPINION MINING OF PRODUCT REVIEWS- Python, Scikit-learn, Natural Language Processing (NLP)

- Developed an application to aggregate and analyze Amazon product reviews using machine learning for sentiment classification.
- Provided consolidated product ratings, improving decision-making by applying feature extraction and sentiment analysis.
-

CERTIFICATIONS :

- AWS Cloud Practitioner - Udemy
- Tableau Data Scientist Certification
- Programming Essentials in Python – Cisco
- Python BootCamp - Udemy

KEY STRENGTHS :

- Expertise in designing scalable data pipelines and workflows for large datasets.
- Strong knowledge of cloud-based data solutions and big data technologies.
- Proven ability to collaborate across teams to deliver efficient and effective data solutions.
