

Raunak Sharma

Dallas, TX 75254 | (801) 259 5255 | raunaksharma2214@gmail.com | linkedin.com/in/raunak-sharma-3085b5290

Professional Summary

Data Analyst with 7+ years of experience building scalable data pipelines, automated workflows, & advanced analytics solutions using SQL, Python, Power BI, and Tableau. Adept in Agile environments & cross-functional collaboration. Expert in data governance, data quality, & transforming complex datasets into actionable insights.

Education

University of Utah – David Eccles School of Business, Salt Lake City, UT *Aug 2023 – Dec 2024*
M.S. in Business Analytics **GPA: 3.73/4**
Martin Tolchin Scholarship, Hinckley Institute *Aug 2024 – Dec 2024*
International Scholars Award, David Eccles School of Business *Aug 2023 – Dec 2024*
Relevant Coursework: Database Theory & Design, Statistics & Predictive Analytics, Cloud Computing, Data Visualization, Machine Learning, Data Mining, Analytical Decision Making, Data Science & Big Data analytics

Technical Skills

Languages: SQL, Python, R | **Libraries:** Pandas, NumPy, Matplotlib, Scikit-learn, TensorFlow, PySpark | **Modeling:** ARIMA, XGBoost, SVM, A/B Testing, Regression Analysis | **Cloud & Databases:** GCP (BigQuery, Dataflow), AWS (S3, EC2, EMR), Snowflake, PostgreSQL | **Tools:** Power BI, Tableau, Git, JIRA, Excel, Lucidchart, PowerPoint, Airflow, Alteryx | **Concepts:** ETL/ELT, Data Modeling, API Integration, Data Governance

Experience

Data Analyst, Numero Data LLC *Nov 2025 – Present*
(Remote)

- Optimize analytics workflows and build scalable data pipelines using SQL, Python, AWS (EC2/EMR/RDS), Airflow, and Snowflake to support enterprise reporting.
- Develop end-to-end ETL solutions and enforce data documentation & governance standards across business teams.
- Maintain and troubleshoot Alteryx Server infrastructure, improving workflow automation and reducing processing time for high-volume data tasks.

Financial Education Research Analyst, Financial Wellness Center *Apr 2025 – Nov 2025*
Salt Lake City, UT

- Analyzed data using SQL and Python to uncover performance gaps and streamline reporting workflows.
- Designed automated KPI dashboards and recurring Power BI reports, enhancing trend visibility and speeding leadership decision-making by 15%.

Data Analyst Intern, Canyon Guard *Sep 2024 – Dec 2024*
Alta, UT

- Performed statistical and exploratory analysis on transportation datasets, delivering insights that contributed to a 25% reduction in congestion-related costs.
- Created centralized analytics views for 1K+ legal and operational documents, improving data retrieval efficiency and reducing search time by 18%.

Programming Intern, Financial Wellness Center *May 2024 – Aug 2024*
Salt Lake City, UT

- Built predictive models (SVM, ARIMA, regression) to assess financial counseling outcomes, identifying 83% budgeting and 79% credit improvements.
- Transformed raw survey and behavioral data into interactive insights and presented findings to 500+ students, increasing program engagement by 55%.

Projects

Financial Counseling Efficacy Analysis *Jul 2024 – Aug 2024*
Leveraged Python, R, and SQL to boost budgeting by 83% and credit utilization by 79%

AI-Driven Cyber Security Product Strategy *May 2024 – Jul 2024*
Devised go-to-market AI roadmap using Scikit-learn and TensorFlow; projected \$660K revenue and 5% market share

Database Simulation Model for Disney+Hotstar *Aug 2023 – Dec 2023*
Built SQL-backed platform extension; boosted ad revenue by 8% and viewer engagement by 5%
