

# Shashikumar Akler | DevOps / AWS Engineer

| Chicago, IL | +1 (314) 220-1759 | aklershashikumar@gmail.com | LinkedIn |

## PROFESSIONAL SUMMARY

Results-driven DevOps and AWS Engineer with 4 years of hands-on experience in architecting, automating, and optimizing mission-critical deployments in AWS cloud environments. Proven expertise in leveraging tools like Jenkins, Docker, Kubernetes, Terraform, and Ansible to streamline CI/CD pipelines, enhance scalability, and improve infrastructure reliability. Adept at driving end-to-end cloud migrations, container orchestration, infrastructure as code (IaC), and security best practices to meet enterprise-grade standards. Passionate about innovation, automation, and continuous improvement to accelerate software delivery and ensure operational excellence.

## TECHNICAL SKILLS

**Cloud Platforms:** AWS (EC2, S3, IAM, VPC, RDS, Route53, ELB, CloudWatch, CloudTrail, CloudFront, Auto Scaling, EFS, SES, SNS)

**DevOps Tools:** Git, GitHub, Jenkins, Docker, Kubernetes, Ansible, Terraform, Maven, SonarQube, Nexus

**CI/CD & Automation:** Jenkins Pipelines, GitOps, Build & Release Automation, Infrastructure as Code (IaC)

**Scripting & Languages:** Shell Scripting, YAML, HCL, Python scripting

**Monitoring & Logging:** AWS CloudWatch, SNS Alerts, Grafana, Prometheus

**Operating Systems:** RHEL, CentOS, Ubuntu, Windows

**Other Tools:** JIRA, Tomcat, Apache, MySQL

**Certification:** Aws solution architect

## PROFESSIONAL EXPERIENCE

### DevOps Engineer | Cisco

Jan 2025 – Present | Remote, USA

- Computerized deployment of over 150+ cloud resources using Terraform and Ansible, reducing manual intervention by 80% and increasing provisioning speed by 40%.
- Built and optimized CI/CD pipelines for 12+ microservices using Jenkins and GitHub, cutting release cycles from weekly to daily and enabling zero-downtime deployments.
- Containerized and orchestrated 30+ AI-driven applications with Docker and Kubernetes, improving scalability and uptime to 99.99%.
- Enabled real-time infrastructure monitoring using AWS CloudWatch and SNS, leading to a 50% reduction in incident response time and Prepared remediation of critical issues.
- Strengthened cloud security posture by implementing IAM policies, VPC segregation, and CloudTrail auditing, resulting in 100% compliance with internal audit and security standards.
- Improved developer onboarding and productivity by 30% through systematized GitOps workflows and streamlined infrastructure provisioning.
- Partnered with global security and networking teams to integrate secure CI/CD practices into Cisco's AI-powered digital platforms.

### DevOps/Cloud Engineer | Cognizant

Jan 2020 – Jun 2023 | India

- Delivered AWS-based infrastructure solutions to 10+ enterprise clients, improving deployment time by 60% and reducing operational overhead.
- Automated provisioning and configuration of 200+ cloud resources across multi-tier environments using Terraform and Ansible, reducing setup time from days to under 2 hours.
- Implemented and maintained CI/CD pipelines for 20+ applications, cutting release failures by 40% and enhancing deployment consistency across environments.
- Introduced prepared monitoring using CloudWatch and SNS, reducing mean time to recovery (MTTR) by 30% and enhancing service-level agreement (SLA) adherence.
- Collaborated with cross-functional Agile teams across healthcare, retail, and finance domains, driving DevOps maturity and reducing deployment risk by 50%.
- Conducted knowledge sharing and training for internal teams, improving DevOps tool adoption and usage across departments by 40%.

## EDUCATION

### Webster University

Oct 2023 – Mar 2025 | St. Louis, MO

Master of Arts in Information Technology

### Cvr College of Engineering

May 2015 – Apr 2019 | India

Bachelors in Electrical engineering

## PROJECTS

### AWS Cloud Migration & Automation (SciQuest, USA)

- Migrated legacy infrastructure to AWS Cloud with emphasis on security, scalability, and automation.
- Created complete CI/CD pipelines using Jenkins integrated with Git, Maven, and Docker.
- Implemented EFS with EC2s for shared storage across applications.
- Enabled Auto Scaling and Load Balancers for fault tolerance and high availability.
- Configured SNS alerts for system and VPC-level notifications.

### DevOps Deployment Pipeline (Citi Group)

- Managed EC2 deployment pipelines with Docker and Jenkins.
- Created custom Docker images and deployed to container registry.
- Used ansible for configuration management and automated deployments.
- Enabled versioning, ACLs, CRR in S3 and DNS configurations using Route53.
- Integrated CloudWatch for event-driven alerts and system metrics.
